June	13,654	294
July	6,506	309
August	11,182	401
September	6,231 (1 st /2 nd) 863 (Booster)	325
October	3991 (1 st /2 nd) 2622 (Booster)	279
TOTAL (as of 10/31/21)	57,478	1471

Supply Update

Monoclonal Antibody (mAb) Treatment Funding

HSCRC Program Funding will support Monoclonal Antibody Treatment

- The HSCRC COVID-19 Community Vaccination Grant Program has been expanded to allow awarded funding to cover mAb treatment related costs.
- Participating hospitals will be able to partner with MDH to identify and target patients who may benefit from mAb treatment.
- This new allowable use of existing funding is a continuation of our vision to use the COVID-19 vaccine infrastructure hospitals have started to create in communities and apply it to other areas of need.
- In addition to addressing the public health crisis that COVID-19 has created, this program is also consistent with our Total Cost of Care Model goals to reduce unnecessary ED utilization and other potentially avoidable utilization.

mAb Discussion

- Is your hospital currently providing mAb treatments in the community?
- Can your hospital utilize the infrastructure developed under the Community Vaccination Grant Program to also support community-based mAb treatment?
 - Can vaccine staff/resources be redeployed to mAb?
- Are there additional supports your hospital will need to implement community-based mAb treatment?

Maryland Department of Health Collaboration

For hospitals that can redeploy Community Vaccination Program resources to mAb treatments, the Maryland Department of Health will be able to share data on COVID-19 positive patients to target outreach.

If your hospital is interested in joining the mAb treatment program, please contact the Maryland Department of Health mAb team or:

- Dr. Howard Haft - howard.haft@maryland.gov
- Danielle Lohan - danielle.lohan1@maryland.gov

Reminder: Reporting

- All November activity reports must use the **updated** template that reports boosters and pediatric doses separately from 1st and 2nd doses.
 - The updated reporting template was issued on November 4, 2021 and includes an additional column for reporting pediatric doses.
- November Report is due tomorrow, Friday, December 10.
- In the coming weeks, HSCRC will work with MDH to define the protocol to report mAb treatments.
- Email reporting questions to hscrc.grants@maryland.gov

Promotional Opportunities for Community Vaccination Sites

- MDH will be selecting a limited number of vaccine clinic events to promote each week.
- If you would like your event to be considered for promotion, please complete the survey found here by this Friday at noon: <https://docs.google.com/forms/d/e/1FAIpQLSdh5FywHX5H3oE9cx8XhN0LyyQj8A6LqRgMYhbBmIRVCQ0yGw/viewform>
- MDH will determine the scope of any promotional support for select events. If your clinic is selected for promotion, a GoVAX communications team member will contact you.
- All promotional activity is time sensitive. All information captured in the survey must be complete, confirmed and received at least two weeks in advance in order to be considered for promotion.
- If you are unable to access this survey, please send an email to meredith.herzing@maryland.gov and include the following information:
 - Event Name and Description
 - Event Date and Time
 - Event Location
 - Web Address and Social Media Handles
 - Targeted Demographics
 - Notable Guests/Dignitaries
 - Event Contact Name and Email
 - Attach any visual assets, graphics or promotional materials
