#### Q1. COMMUNITY BENEFIT NARRATIVE REPORTING INSTRUCTIONS

The Maryland Health Services Cost Review Commission (HSCRC or Commission) is required to collect community benefit information from individual hospitals in Maryland and compile it into an annual statewide, publicly available report. The Maryland General Assembly updated §19-303 of the Health General Article in the 2020 Legislative Session (HB1169/SB0774), requiring the HSCRC to update the community benefit reporting guidelines to address the growing interest in understanding the types and scope of community benefit activities conducted by Maryland's nonprofit hospitals in relation to community health needs assessments. The reporting is split into two components, a Financial Report and a Narrative Report. This reporting tool serves as the narrative report. Detailed reporting instructions have been distributed to your hospital's community benefit contacts, and additional copies can be requested at the email below.

In this reporting tool, responses are mandatory unless specifically marked as optional. If you submit a report without responding to each question, your report may be rejected. You would then be required to fill in the missing answers before resubmitting. Questions that require a narrative response have a limit of 20,000 characters. This report need not be completed in one session and can be opened by multiple users.

For technical assistance, contact <a href="https://example.com/hc-edu.ncm/">https://example.com/https://ex

#### Q2. Section I - General Info Part 1 - Hospital Identification

Q3. Please confirm the information we have on file about your hospital for the fiscal year.

	Is this informa	ation correct?	
	Yes	No	If no, please provide the correct information here:
The proper name of your hospital is: TidalHealth McCready Pavilion	•	0	TidalHealth McCready Pavilion located in Crisfield, Maryland is now a Freestanding Medical Facility and is no longer a designated hospital. It is currently a department of TidalHealth Peninsula Regional.
Your hospital's ID is: 210045	•	0	TidalHealth McCready is a department of TidalHealth Peninsula Regional. The HSCRC will continue to use the now defunct CMS Certification ID 210045.
Your hospital is part of the hospital system called TidalHealth	•	0	
The primary hospital community benefit (HCB) Narrative contact at your hospital is Katherine Rodgers	•	0	
The primary HCB Narrative contact email address at your hospital is katherine.rodgers@tidalhealth.org	•	0	
The primary HCB Financial report contact at your hospital is Cindy Sapp	•	0	
The primary HCB Financial report contact email at your hospital is cindy.sapp@tidalhealth.org	•	0	

Q4. Please select the community health statistics that your hospital uses in its community benefit efforts.

✓ Median household income	Race: percent White
✓ Percentage below federal poverty level (FPL)	✓ Race: percent Black
✓ Percent uninsured	Ethnicity: percent Hispanic or Latino
✓ Percent with public health insurance	✓ Life expectancy
✓ Percent with Medicaid	✓ Crude death rate
✓ Mean travel time to work	✓ Other
✓ Percent speaking language other than English at home	

Q5. Please describe any other community health statistics that your hospital uses in its community benefit efforts.

TidalHealth McCready Pavilion uses combined primary and secondary health statistics to provide an understanding of the health status, health disparity, quality of life and risk factors to provide insight into the needs of our community. Specific health indexes that are reviewed include an index of disparity, health equity index, food insecurity index and mental health index. In addition, we track households without a vehicle, racial ethnicity diversity and extensively rely on the ALICE report as a way to define and identify households and geographic regions that struggle with basic health and household necessities but do not qualify for Federal Assistance.

### <sub>Q7.</sub> Section I - General Info Part 2 - Community Benefit Service Area

Q8. The next group of questions asks about the area where your hospital directs its community benefit efforts, called the Community Benefit Service Area. You may find these community health statistics useful in preparing your responses.

29. Please select the county or counties located in your	Prince George's County													
Allegany County	Charles County	Prince George's County

#### Q47. Section II - CHNAs and Stakeholder Involvement Part 4 - Meaningful Engagement

Q48. Community participation and meaningful engagement is an essential component to changing health system behavior, activating partnerships that improve health outcomes and sustaining community ownership and investment in programs. Please use the table below to tell us about the external partners involved in your most recent CHINA. In the first column, select and describe the external participants. In the second column, select the level of community engagement for each participant. In the third column, select the recommended practices that each stakeholder was engaged in. The Maryland Hospital Association worked with the HSCRC to develop this list of eight recommended practices for engaging patients and communities in the CHNA process.

Refer to the FY 2023 Community Benefit Guidelines for more detail on MHA's recommended practices. Completion of this self-assessment is mandatory for FY 2023.

Level of Community Engagement								
Informed - To provide the community with balanced & Oolstain death of the problem, alternatives, and/or opportunities and/or solutions solutions								

Other Hospitals Please list the hospitals here:														
	Informed - To provide the community with balanced & objective information to assist them in understanding the problem, alternatives, opportunities and/or solutions	Consulted - To obtain community feedback on analysis, alternatives and/or solutions	to ensure their concerns and aspirations are	Collaborated - To partner with the community in each aspect of the decision including the development of alternatives & identification of the preferred solution	the decision-	Community- Driven/Led - To support the actions of community initiated, driven and/or led processes	ldentify & Engage Stakeholders	Define the community to be assessed	Collect and analyze the data	Select priority community health issues	Document and communicate results	Plan Implementation Strategies	Implement Improvement Plans	Evaluate Progress

Q54. Please explain why your hospital has not adopted an implementation strategy. Please include whether the hospital has a plan and/or a timeframe for an implementation strategy.

This question was not displayed to the respondent.

TidalHealth McCready Pavilion has finalized their 2022 Community Benefit Implementation Strategy / CHIP, which was put together with our partners from the Wicomico and Somerset County Health Departments. As we transition to the new plan, some of the health strategies and initiatives shall continue as there will be overlap from the previous implementation plan. TidalHealth and partners will be concentrating on the following community benefit healthcare themes moving forward as identified in the 2022 CHNA: Access to health services, Health equity within our communities, Chronic disease management, Behavioral Health, and overall Wellness. TidalHealth, Somerset County Health Department (SCHD) and Wicomico County Health Department (WiCHD) worked collaboratively to develop this Community Health Improvement Plan and Implementation Strategy in response to the 2022 Community Health Needs Assessment. The collaborative approach reduces duplication of resources and provides a more comprehensive approach to addressing health improvement Plan (or CHIP) is a long-term, systematic effort to address public health problems based on the results of community health needs assessment. Health and other governmental education and human service agencies, in collaboration with community partners, use this plan to set priorities, coordinate and target resources. At the heart of this plan are the fundamental goals and actions that will enable communities to improve health and environment, implement policies to support healthy lifestyles, increase access to health services, and strengthen safety net systems that foster more effective and equitable delivery of health services. Conduent HCI worked with the Partnership as a leadership committee to create a joint framework that serves both the needs of the nonprofit hospital and health department partners, as well as the entire service area encompassing the Lower Eastern Shore of Maryland. In addition, Katherine Rodgers, TidalHealth's Director of Community Health Initiatives co-chairs the Wico

Other Social Determinants of Health

✓ Health Behaviors - Sleep

 $\ensuremath{\textit{Q75}}.$  If available, please provide a link to your hospital's strategic plan.

https://www.tidalhealth.org/about-us/mission-values

Q76. Do any of the hospital's community benefit operations/activities align with the Statewide Integrated Health Improvement Strategy (SIHIS)? Please select all that apply and describe how your initiatives are targeting each SIHIS goal. More information about SIHIS may be found here.

✓ Diabetes - Reduce the mean BMI for Maryland residents

TidalHealth's Community Health Implementation Plan (CHIP) aligns with the SIHIS goals for diabetes. One of the prioritized health topics in the 2022 CHNA is Chronic Disease and Wellness, and Diabetes is named as one of the five chronic disease areas of focus. Goals, objectives, strategies, and activities are established and underway to prevent and reduce diabetes. These initiatives include expansion of evidence-based healthy lifestyle programming such as Chronic Disease Self Management, National Diabetes Prevention Program, and other community-based healthy eating and physical activity programs such as Sustainable Change and Lifestyle Enhancement (SCALE) program in Somerset and Wicomico County. Mobile health screenings include diabetes risk assessments, education, and referral to PCPs for follow-up care and recommendations.

✓ Opioid Use Disorder - Improve overdose mortality

TidalHealth's Community Health Implementation Plan (CHIP) aligns with the SIHIS goals for addressing opioid use disorder and improving overdose mortality rates. Behavioral health was identified as a priority area in the most recent CHNA. Goals, objectives, strategies, and activities are established and underway to address substance use disorder and mental health conditions. The 2022 CHIP includes goals and activities specifically to reduce the instances of opioidrelated deaths. It also includes initiatives to increase access to treatment and prevention services such as the Crisis Stabilization Center. TidalHealth Peninsula Regional works in partnership with Somerset and Wicomico County Health Departments on collaborative initiatives such as Narcan expansion program9s), educational messaging, Opioid Intervention Teams, Community Outreach Addictions Team, and informational campaigns.

✓ Maternal and Child Health - Reduce severe maternal morbidity rate

TidalHealth's Community Health
Improvement Plan (CHIP) aligns with
SIHIS goals for addressing maternal
and child health, specifically to
reduce severe maternal morbidity rate
and maternal health disparities.
TidalHealth has a priority area that
includes goals, objectives, and
strategies to address access and
health equity. TidalHealth is engaged
with community-based partners to
increase access to equitable maternal
care - prenatal and post-partum - for
Haitian women. Strategies include
expanding access to community health
workers and linguistically and
culturally sensitive services.

	Maternal and Child Health - Decrease asthma-related emergency department visit rates for children aged 2-1
$\Box$	None of the Above

Q77. (Optional) Did your hospital's initiatives during the fiscal year address other state health goals? If so, tell us about them below

TidalHealth Peninsula Regional's strategies align with various state and local plans for population health improvement, improved quality of care, and a reduction in the total cost of care. For example, the interventions/initiatives address the State integrated Health Improvement Strategy goals for Hospital Quality: Reducing avoidable admissions and readmissions; Care Transformation Across the System: Improve care coordination for patients with chronic conditions; Total Population Health: Diabetes, reduce the mean BMI for adult Maryland residents; Total Population Health: Opioid use disorder, reduce overdose mortality. The program's interventions are also aligned with the following State Health Improvement Process (SHIP) framework measures: Healthy Living Measures: Increase the proportion of adults who are not overweight or obese; increase physical activity; increase life expectancy. Access to Health Care Measures: Increase the proportion of people with primary care providers; reduce the uninsured emergency department visits. Quality Preventative Care: Reduce Emergency Department visit at de to diabetes; reduce Emergency Department visit rated we to diabetes; reduce Emergency Department visits for addictions. Related Conditions: Provide annual seasonal influenza vaccinations. TidalHealth wants to ensure alignment with National, State, and local health improvement plans developed utilizing the Community Health Needs Assessment as a guideline.

#### Q78. Section IV - Physician Gaps & Subsidies

Q79. (Optional) Please attach any files containing further information and data justifying physician subsidies at your hospital.

(This year, all information on physician gap subsidies is collected on the financials. However, if you have additional information on these subsidies to report, you may do so through attachments here.)

#### Q80. Section V - Financial Assistance Policy (FAP)

Q81. Upload a copy of your hospital's financial assistance policy.

EY23 Financial Assistance - Uncompensated Care.ndf

132.4KB application/pdf

Q82. Provide the link to your hospital's financial assistance policy.

https://www.tidalhealth.org/medical-care/financial-admin-services/billing/tidalhealth-financial-assistance

Q83. Has your FAP changed within the last year? If so, please describe the change.

No, the FAP has not changed.

Yes, the FAP has changed. Please describe:

Q84. Maryland acute care and chronic care hospitals are required under Health General \$19-214.1(b)(2)(i) COMAR 10.37.10.26(A-2)(2)(a)(i) to provide free medically necessary care to patients with family income at or below 200 percent of the federal poverty level (FPL).

Please select the percentage of FPL below which your hospital's FAP offers free care.

Q85. Maryland acute care and chronic care hospitals are required under COMAR 10.37.10.26(A-2)(2)(a)(ii) to provide reduced-cost, medically necessary care to low-income patients with family income between 200 and 300 percent of the federal poverty level.

Please select the range of the percentage of FPL for which your hospital's FAP offers reduced-cost care.

Q86. Maryland acute care and chronic care hospitals are required under Health General §19-214.1(b)(2)(iii) COMAR 10.37.10.26(A-2)(3)(a) to provide reduced-cost, medically necessary care to patients with family income below 500 percent of the federal poverty level who have a financial hardship. Financial hardship is defined in Health General §19-214.1(a)(2) and COMAR 10.37.10.26(A-2) (1)(b)(i) as a medical debt, incurred by a family over a 12-month period that exceeds 25 percent of family income.

Please select the range of the percentage of FPL for which your hospital's FAP offers reduced-cost care for financial hardship.

Q87. Please select the threshold for medical debt as a percentage of family income above which qualifies as a financial hardship.

#### Q88. Section VI - Tax Exemptions

Q89. Per Health General Article §19-303 (c)(4)(ix), list each tax exemption your hospital claimed in the preceding taxable year (select all that apply)

- ✓ Federal corporate income tax
- State corporate income tax
- State sales tax
- ✓ Local property tax (real and personal)
- Other (Describe)

Q91.

#### Attention Hospital Staff! IMPORTANT!

You have reached the end of the questions, but you are not quite finished. Your narrative has not yet been fully submitted. Once you proceed to the next screen using the right arrow button below, you cannot go backward. You cannot change any of your answers if you proceed beyond this screen.

We strongly urge you to contact us at <a href="https://hcbhelp@hilltop.umbc.edu">hcbhelp@hilltop.umbc.edu</a> to request a copy of your answers. We will happily send you a pdf copy of your narrative that you can share with your leadership, Board, or other interested parties. If you need to make any corrections or change any of your answers, you can use the Table of Contents feature to navigate to the appropriate section of the narrative.

Once you are fully confident that your answers are final, return to this screen then click the right arrow button below to officially submit your narrative.

# Community Health Improvement Plan Strategies and Indicators

# Community Health Improvement Plan Strategies and Indicators

2023 - 2025

## **Executive summary: Ideas into action**

TidalHealth, Somerset County Health Department (SCHD) and Wicomico County Health Department (WiCHD) worked collaboratively to develop this Community Health Improvement Plan and Implementation Strategy in response to the 2022 Community Health Needs Assessment. The collaborative approach reduces duplication of resources and provides a more comprehensive approach to addressing health improvement. For purposes of this report, the three leading organizations: TidalHealth, SCHD, and WiCHD will collectively be referred to as "the Partnership."

A community health improvement plan (or CHIP) is a long-term, systematic effort to address public health problems based on the results of community health assessment activities and the community health improvement process. Health and other governmental education and human service agencies, in collaboration with community partners, use this plan to set priorities, coordinate and target resources. At the heart of this plan are the fundamental goals and actions that will enable communities to improve health and environment, implement policies to support healthy lifestyles, increase access to health services, and strengthen safety net systems that foster more effective and equitable delivery of health services.

Conduent HCI worked with the Partnership as a leadership committee to create a joint framework that serves both the needs of nonprofit hospital and health department partners, as well as the entire service area encompassing the Lower Eastern Shore of Maryland and Sussex County, Delaware.

# 2022 Maryland Statewide Integrated Health Improvement Strategy (SIHIS)

In 2019, the State of Maryland collaborated with the Center for Medicare and Medicaid Innovation (CMMI) to establish the domains of health care quality and delivery that the State could impact under the Total Cost of Care (TCOC) Model. The collaboration also included an agreed-upon process and timeline by which the State would submit proposed goals, measures, milestones, and targets to CMMI. As a result of the collaboration with CMMI, the State entered into a Memorandum of Understanding (MOU) that required Maryland to provide a proposal for the Statewide Integrated Health Improvement Strategy (SIHIS) to CMMI by December 31, 2020. The SIHIS aligns statewide efforts across three domains that are interrelated and, if addressed successfully, have the potential to make significant improvement in not just Maryland's healthcare system, but in the health outcomes of Marylanders.

### The top health priorities identified for the Maryland SIHIS were:

- 1. Hospital Quality
- 2. Care Transformation Across the System
- 3. Total Population Health Diabetes
- 4. Total Population Health Opioid Use Disorder
- 5. Total Population Health Maternal and Child Health

The interconnectedness of Maryland's greatest health challenges, along with the overall consistency of health priorities identified in the CHNA assessment, indicates many opportunities for collaboration between a wide variety of partners at and between the state and local level, including physical and behavioral health organizations and sectors beyond health. It is our hope that this framework will serve as a foundation for such collaboration.

To view the full 2021 Statewide Integrated Health Improvement Strategy, please visit:

https://hscrc.maryland.gov/Documents/Modernization/Statewide Integrated Health Improvement Strategy/SIHIS 2021 Annual Report FINAL w appendix.pdf

# 2022 Delaware Statewide Integrated Health Improvement Plan (SHIP)

The State Health Assessment (SHA), State Health Improvement Plan (SHIP), and the Division of Public Health's organizational strategic plan are prerequisites for State Health Departments that pursue National Public Health Accreditation Board Accreditation (PHAB).

The State Health Department's SHIP addresses the needs of all citizens in the state. The SHIP is a long-term, systematic plan to address issues identified in the SHA. The purpose of the SHIP is to describe how the health department and the community it serves will work together to improve the health of the population in their jurisdiction. The community, stakeholders, and partners can use a solid SHIP to set priorities, direct the use of resources, and develop and implement projects, programs, and policies.

# The Evidence-based and Promising Strategies across SHIP priority areas for 2020 include:

- Chronic Disease
- · Maternal and Child Health
- Substance Use Disorder
- Mental Health

## Hospital Internal Revenue Services (IRS) Requirements

Certain hospitals as set forth in the Section 501(r) regulations are required to complete a CHNA and corresponding implementation strategy at least once every three years in accordance with regulations promulgated by the Internal Revenue Service pursuant to the Patient Protection and Affordable Care Act (ACA), 2010. The partnership collaborating on this CHIP framework adopted the most recent CHNA in April 2022 in accordance with requirements in the Affordable Care Act and IRS 990 Schedule H requirements.

# Public Health Accreditation Board (PHAB) Accreditation Requirements

PHAB accreditation is a process that supports health departments to improve and strengthen quality, accountability and performance. WiCHD has been PHAB accredited since 2016; SCHD is currently working towards initial PHAB accreditation. To receive and maintain PHAB accreditation, health departments, along with their partners must have a comprehensive approach to assessing community health. The assessment results are then used to develop and implement a community health improvement plan (CHIP) to address the highest health needs identified. The CHIP provides guidance to the health departments, its partners, and stakeholders for improving the health of the population within the jurisdiction.

## **Identifying and Prioritizing Needs**

The Partnership reviewed and discussed the scoring results of the prioritized significant community needs and identified three priority areas for subsequent implementation planning. These three priority areas are:

- Access and Health Equity
- 2. Behavioral Health
- 3. Chronic Disease and Wellness

To better target activities to address the most pressing health needs in the Partnership worked collaboratively to participate in two virtual working sessions along with weekly collaborative sessions facilitated by Conduent HCI. A central piece of these virtual exercises was a nontraditional approach to building consensus around the activities that would feed into Goals, Objectives and Strategies. Within Public Health and Healthcare, there has been deep conversation to center equity in the discussion and considerations for building long-term strategies that support the communities served. Having organizations working together and seeing successful outcomes based on their investment is central to scalable solutions and targeted action within the communities served. The Partnership used two different strategies to develop the final framework, The Aligning Health Systems, and the Results Based Accountability Framework.

## **Aligning Health Systems Framework**

The Robert Wood Johnson Foundation along with its partners developed a collaborative framework that addressed sectors that traditionally work closely together, however do not usually align directly in their operations, or how they approach complex community issues. Public Health, Health Care and Social Services, within this context, need strong emphasis around coordination beyond singular project based collaborative work, and instead focuses on these sectors to work together in new ways to improve the health and well-being of the communities they all serve. The Partnership used this framework to align on the highest levels around big long-term goals.

### **Monitoring Plan Progress**

This community health improvement plan (CHIP) is a three-year action plan. The CHIP is a living document, that will continue to evolve after the initial release. For example, strategies may need revision or new strategies may be added based on a completed objective. Somerset and Wicomico Counties each have a Local Health Improvement Coalition (LHIC). Members of the two LHICs are jurisdictional-level stakeholders and community partners, who are charged with providing input and guidance on the community health needs assessment and oversight and monitoring of the CHIP.

Once implemented, the LHICs will evaluate the CHIP on an ongoing basis to track the status of the effort or results of the actions taken to implement CHIP strategies. The LHICs will be responsible for tracking and collecting data. The Partnership will make amendments to the CHIP objectives and strategies when applicable and will prepare progress reports on an annual basis.

# Access and Health Equity

# Creating a culture of health for whole communities

Alignment Indicator(s): Adults with health insurance, adults unable to afford to see a doctor, primary provider rates

Objective(s)	Strategies (Program Owner)	Performance Measures		
<ol> <li>By June 2025, increase insurance coverage for populations with disparities in health coverage.</li> <li>Wicomico: Increase coverage for Hispanic residents of Wicomico County to 75% (2020 baseline = 65.3%).</li> <li>Somerset: Maintain coverage rate for Hispanic residents of Somerset County at 90% (2020 baseline = 90%).</li> <li>Sussex: Maintain percentage of adults with health insurance at 90%.</li> </ol>	<ul> <li>Outreach to uninsured and underinsured groups to increase health insurance enrollment (Lower Shore Health Insurance Assistance Program – Worcester County Health Department).</li> <li>Outreach and MCHIP assistance especially for Hispanic residents. (WiCHD)</li> <li>Continue the work that is currently being done in the migrant program and integrating our Community Health Workers into healthcare facilities. (SCHD)</li> <li>Screen patients for health insurance coverage and refer to health insurance assistance programs and navigators (TidalHealth)</li> <li>Refer children without health insurance at School-Based Wellness Centers to Community Health Worker (TidalHealth)</li> </ul>	Percentage of Hispanic residents with health insurance for Wicomico and Somerset Counties  Number of outreach activities conducted to promote health insurance coverage among uninsured and underinsured populations  populations		

G	Goal 1.1: Increase equitable access to healthcare (continued)				
Ob	ejective(s)	Strategies (Program Owner)	Performance Measures		
2.	By June 2025, establish a process to determine the insurance coverage percentage for the Haitian population.  Wicomico: Process created and piloted by June 2025.	Work with LHIC partners to develop and pilot process. (WiCHD)	Documented process     Results of pilot of implemented process		
3.	By December 2023, implement best practices and standardization of social determinants of health screening and closed-loop, bidirectional referrals across multiple sectors and community-based partners.  Service area: Adopt a screening tool and referral platform.	<ul> <li>Conduct an environmental scan of community-based partners to assess who is currently utilizing SDOH screenings (TidalHealth).</li> <li>Increase adoption and use of social care service and resource referral platform among community-based organizations i.e. findhelp. (TidalHealth)</li> </ul>	Documented process and identified tool.     Establish baseline of adopters of identified tool(s) and increase CBOs using the tool for screening and referrals.		
4.	By June 2025, expand the diversity of the community health worker workforce within health systems, public health and adjacent sectors.  Service area: Establish baseline of CHWs in each of the counties.	Determine baseline measure of Community Health Workers (CHWs), including the number of bilingual CHWs. (LHICs)      Increase access to funding to support certification training and salaries for Community Health Worker (CHW) positions at local health care, public health, and community-based organizations serving marginalized or disadvantaged populations by collaborating on grants and alternative payment agreements with Medicaid MCOs (TidalHealth)      Establish a regional association for CHWs to support workforce development (ESAHEC)	<ul> <li>Baseline of CHWs across community-based originations.</li> <li>Number of new CHWs hired overall</li> <li>Number of new bilingual CHWs hired</li> <li>Number of CHWs certified</li> <li>Establishment of regional CHW association</li> </ul>		

Goal 1.2: Provide education and promote awareness of health equity, including
policy recommendations

Ok	ojective(s)	Strategies (Program Owner)	Performance Measures
1.	By June 2024, develop and adopt Health Equity Framework(s) among key partner organizations.	<ul> <li>Participate in health equity learning collaboratives and adopt Institute of Healthcare Improvement's Health Equity framework (TidalHealth)</li> <li>Establish a subcommittee in the LHIC to be tasked with Health Equity (Wicomico LHIC)</li> </ul>	<ul> <li>Outcomes of health equity project aims as identified by TidalHealth</li> <li>Health Equity Sub-Committee established</li> </ul>
2.	By June 2025, local health coalitions present at least one policy recommendation related to health equity.	<ul> <li>Conduct an environmental scan for community organizations to assess health literacy polices and resources in place (Somerset and Wicomico LHICs)</li> <li>Create action plan to address gaps identified in the environmental scan. (Somerset and Wicomico LHICs)</li> </ul>	Documented scan completed     Completed action plan
3.	June 2024, increase engagement of diverse community members in the local health improvement coalitions in Somerset and Wicomico counties.  Wicomico and Somerset: Recruit at least 2 LHIC members annually.	Complete analysis of LHIC membership annually and recruit new members based on gaps identified (SCHD and WiCHD)  Promote LHIC to diverse groups such as Lower Shore Vulnerable Populations Task Force to increase engagement and membership among underrepresented groups. (SCHD and WiCHD)	<ul> <li>Analysis report of LHIC membership</li> <li>Number of new LHIC members overall</li> <li>Number of new LHIC members by sector</li> <li>Number of outreach presentations of the LHIC</li> </ul>

# **Behavioral Health**

## Reducing trauma and improving access

Alignment indicator(s): Frequent mental distress, poor mental health days, self-reported mental health, death rate due to drug use

Objective(s)	Strategies (Program Owner)	Performance Measures
1. By June 2025, reduce the rate of suicide deaths in the service area.  Wicomico: Reduce rate to 9.0 per 100,000 (Baseline: 11.7 in 2020).  Sussex: Reduce rate to 10 per 100,000 (Baseline 11.9 in 2020)	<ul> <li>Increase the number of persons trained in Mental Health First Aid (WiCHD)</li> <li>Implement the Talk Saves Lives Program (WiCHD).</li> <li>Educate the community about 988 suicide and crisis line (WiCHD)</li> <li>Increase access to treatment and prevention services including the Crisis Stabilization Center (TidalHealth)</li> <li>ACT (Lower Shore Clinic)</li> <li>Conduct PHQ 2 and 9 surveys in primary care settings (TidalHealth)</li> <li>Support Sussex County Health Coalition on suicide prevention strategies</li> </ul>	<ul> <li>Persons trained in Mental Health First Aid</li> <li>Percentage of PHQ 2 and 9 screenings (Goal: 90 percent)</li> </ul>

Obj	jective(s)	Strategies (Program Owner)	Performance Measures		
2.	By June 2025, reduce and prevent opioid misuse and overdoses.  Wicomico: Reduce deaths by 40% (Baseline: 39 in 2020).  Somerset: Reduce deaths by 25% (Baseline is 13 in 2020)  Sussex: Reduce Ageadjusted drug and opioidinvolved overdose death rates per 1,000 from 46.6 to 44.6.	<ul> <li>Expand access to Narcan/Naloxone and training in the community (WiCHD)</li> <li>Continue linking individuals to treatment via Community Outreach Addiction Team (COAT) services. (WiCHD)</li> <li>Increase access to treatment and prevention services including the Crisis Stabilization Center (TidalHealth)</li> <li>Provide and promote use of Narcan/Naloxone upon discharge when prescribed opioid medication (TidalHealth).</li> <li>Provide and promote use of Narcan/Naloxone in community (TidalHealth)</li> <li>Support regional Go Purple campaigns</li> </ul>	<ul> <li>Number of Narcan trainings to those with social experience and their family members. (WiCHD, TidalHealth)</li> <li>Percentage of COAT contacts (including nonresidents) successfully linked to treatment.</li> <li>Percentage of COAT clients remaining in recovery for at least six months.</li> </ul>		
3.	By June 2025, strengthen the integrated behavioral health-primary care model among local healthcare providers.  Wicomico:  Academic Detailing Target = 12 visits  Hub and Spoke Target = 15 individuals served through care coordination.  Target: 1,000 referrals to TidalHealth behavioral health therapist annually	<ul> <li>Increase referrals to behavioral health therapist among TidalHealth Medical Partners primary care practices.</li> <li>Increase PHQ 2 and 9 screenings at TidalHealth Medical Partners primary care practices (TidalHealth)</li> <li>Hub and Spoke Program will support community prescribers to expand care for more patients with opioid use disorder. (WiCHD)</li> <li>Academic Detailing visits to healthcare providers for best practices in prescribing</li> </ul>	<ul> <li>Number of referrals to         TidalHealth behavioral         health therapist (Goal: 1,00         referrals annually)</li> <li>Percentage of PHQ 2 and 9         screenings (Goal: 90         percent)</li> <li>Number of individuals         receiving care coordination         through the Hub and Spoke         Program.</li> <li>Number of academic         detailing visits</li> </ul>		

Goal: 90 percent patients screened for PHQ 2/9 (TidalHealth)

Goal 2: Improve behavioral health through prevention, treatment, and recovery
(continued)

Objective(s)
H. By June 2025, decrease the proportion of adults reporting excessive poor mental health days.  Wicomico: reduce the proportion of adults reporting poor mental health for 14 or more days each month to 12%. (Baseline: 15.3%; MD BRFSS)  Sussex: Reduce to 10% (Baseline 11.9% in 2020)

# **Chronic Disease** and Wellness

## Well-being in all aspects of life

## Healthy 2030 Alignment Indicator(s):

# Goal 3.1: Reduce the prevalence and mortality rates of chronic diseases in the Partnership area

Partnership area		
Objective(s)	Strategies (Program Owner)	Performance Measures
<ol> <li>By June 2025, reduce the prevalence of diabetes among adults in the service area.</li> <li>Wicomico: Reduce prevalence to 8.0% (Baseline: 10.9% in 2020).</li> <li>Sussex: Reduce prevalence to 13% (Baseline: 15.7% in 2020)</li> </ol>	<ul> <li>Facilitate at least two Diabetes Prevention Program (DPP) cohorts per fiscal year. (WiCHD).</li> <li>Strengthen referral process between primary and providers and DPP providers. (WiCHD)</li> <li>Increase access to the National Diabetes Prevention Program by providing it in community settings. (WiCHD)</li> <li>Facilitate at least three Diabetes Prevention Program groups per fiscal year. (SCHD)</li> <li>Maintain the current referral process and relationship with Chesapeake Healthcare (CHC). Also try to connect with other providers to receive additional referrals. (WiCHD)</li> <li>Increase referrals from TidalHealth primary care providers – utilize CRISP DPP report to identify potential patients for referrals (TidalHealth)</li> </ul>	<ul> <li>Number of DPP cohorts</li> <li>Number of health care providers referring to the DPP (5)</li> <li>Number of individuals referred to DPP programs to reduce risk factors for type 2 diabetes (25)</li> <li>Number of cohorts launched</li> <li>Number of DPP participants enrolled; number of participants retained by session 4 (30)</li> </ul>

Goal 3.1: Reduce the preva	lence and mortality rates	of chronic diseases in the
Partnership area (continued	)	

Ob	jective(s)	Strategies (Program Owner)	Performance Measures
1.	(continued)	<ul> <li>Engage at least 2 healthcare providers to refer participants to DPP (SCHD)</li> <li>Provide the National DPP lifestyle change program with at least two cohorts to at least 30 new participants</li> </ul>	
2.	By June 2025, reduce the rate of hospital ED visits, admissions and readmissions for diabetes and hypertension among adults.  Based on Maryland CRISP data provided in 2019: 5% reduction in average hospital encounters for hypertension (rate: 470/1000)  5% reduction in average hospital encounters for diabetes (rate: 8/1000)	<ul> <li>Operate a mobile integrated health program (SWIFT) (TidalHealth and Salisbury Fire Department)</li> <li>Provide Remote Patient Monitoring to high-risk patients with chronic conditions such as diabetes, CHF, COPD (TidalHealth)</li> <li>Provide health screening, outreach, and education in the community including diabetes risk assessments and blood pressure checks. (TidalHealth)</li> </ul>	<ul> <li>Number of patients served by SWIFT</li> <li>Pre/Post utilization of SWIFT patients</li> <li>Number of people served by RPM program and pre/post data</li> <li>Number of screenings and outreach activities via mobile clinic</li> </ul>
3.	By June 2025, increase the proportion of adults who get evidence-based preventative health care including screenings.  Wicomico: Increase adults receiving recent routine checkup to 90% (Baseline: 81.2% in 2020).  Somerset: Increase adults receiving recent routine checkup to 85% (Baseline: 76.9%)  Sussex: Increase awareness and uptake of recommended prostate cancer screenings.	<ul> <li>Complete at least 25 colorectal screenings a year. (WiCHD)</li> <li>Complete at least 12 colorectal screenings per year. (SCHD)</li> <li>Launch an awareness and outreach campaign to increase acceptance and uptake of prostate cancer screenings (TidalHealth)</li> </ul>	<ul> <li>Number of colorectal screenings completed</li> <li>Number of outreach events and people reached</li> </ul>

Goal 3.2: Promote and support healthy lifestyles and wellness in the service area
to reduce risk of chronic disease

to reduce risk of chiloffic disease		
Objective(s)	Strategies (Program Owner)	Performance Measures
<ol> <li>By 2025, decrease the proportion of people with overweight or obesity.</li> <li>Wicomico: Reduce prevalence to 8.0% (Baseline: 10.9% in 2020).</li> <li>Somerset: Reduce prevalence to 13% (Baseline: 15.7% in 2020)</li> </ol>	<ul> <li>Promote and expand participation in Chronic Disease Self-Management and Healthy Lifestyle programming. (TidalHealth and MAC)</li> <li>Increase participation in Healthy Lifestyle community challenges (WiCHD).</li> <li>Promote and expand walking initiatives (WiCHD)</li> <li>Promote use of community gardens as a source for healthy, free produce. (WiCHD)</li> <li>Implement a social marketing campaign promoting healthy lifestyles (WiCHD)</li> <li>Collaborate with Sussex County Health Coalition and participate in the Let's Get Healthy Sussex campaign (TidalHealth.</li> </ul>	<ul> <li>Number of participants in healthy lifestyle programing</li> <li>Completion rate in healthy lifestyle programming</li> <li>Participation in walking initiatives</li> <li>Use of community gardens</li> <li>Reach of social marketing campaigns</li> </ul>
<ol> <li>By 2025, increase the proportion of residents achieving the recommended physical activity level (150 minutes per week of moderate activity or vigorous equivalent).</li> <li>Wicomico: Increase proportion of residents with recommended physical activity level to at least 55% (Baseline: 50.5% in 2019).</li> <li>Somerset: Increase proportion of residents with recommended physical activity level to at least 45% (Baseline: 39.2% in 2019)</li> </ol>	<ul> <li>Promote and increase participation in walking initiatives. (WiCHD) (SCHD)</li> <li>Increase and promote physical activity programs through the local YMCAs. (YMCA)</li> <li>Increase and promote physical activity programs through MAC, Inc. for older adults. (MAC, Inc.)</li> <li>Collaborate with Sussex County Health Coalition and participate in the Let's Get Healthy Sussex campaign.</li> </ul>	<ul> <li>Number of participants in the physical activity programs at the YMCA and MAC</li> <li>The number of participants in the walking initiatives</li> </ul>

**SECTION 1** 

# **INTRODUCTION** & PURPOSE

TidalHealth, Somerset County Health Department (SCHD), and Wicomico County Health Department (WiCHD) are pleased to partner and present the 2022 Community Health Needs Assessment (CHNA). For purposes of this report the three leading organizations: TidalHealth, SCHD, and WiCHD will collectively be referred to as "The Partnership".

This CHNA report provides an overview of the process and methods used to identify and prioritize significant health needs for a four-county region served by the above-mentioned organizations. This report serves to meet TidalHealth's

requirement to complete a CHNA as a non-profit hospital. Somerset County utilizes this report for strategic planning purposes, and Wicomico County as an accredited health department by the Public Health Accreditation Board (PHAB).

The purpose of this CHNA is to offer a deeper understanding of the health needs across the region and guide the planning efforts to address needs in actionable ways and with community engagement. Findings from this report will be used to identify and develop efforts to address disparities, improve health outcomes, and focus on social determinants of health to improve the health and quality of life of residents in the community.

#### This report includes a description of:

- The community and methods used to obtain, analyze and synthesize primary and secondary data;
- The significant health needs in the community, taking into account the needs of uninsured, low-income, and marginalized groups;
- The process and criteria used in identifying certain health needs as significant and prioritizing those significant community needs.

#### **ACKNOWLEDGEMENTS**

The development of this CHNA was a collective effort that included hospital and health department employees, community-serving organizations, and community members from within areas of focus that provided input and knowledge of issues and solutions and those who share our commitment to improve health and quality of life.

#### HOSPITAL AND HEALTH DEPARTMENT LEADERSHIP

Kathryn Fiddler, TidalHealth Vice President of Population Health

Christopher Hall, TidalHealth Vice President/Chief Business Officer of Strategy and Business Development

Katherine Rodgers, TidalHealth Director of Community Health Initiatives

Allie O'Leary, TidalHealth Population Health Analyst

#### **SECTION 1 INTRODUCTION & PURPOSE**

Danielle Weber, SCHD Health Officer

Sharon Lynch, SCHD Preventive Health Service & Communication Director

Lori Brewster, WiCHD Health Officer

Lisa Renegar, WiCHD Health Planner

Kelly Ward, WiCHD Special Assistant to the Health Officer & Deputy PIO

Christina Gray, WiCHD Epidemiologist

#### **TIDALHEALTH**

TidalHealth's mission is stated simply: Improve the health of the communities we serve. This concept is straightforward, but accomplishing that mission is a complex task in a rapidly changing healthcare and dynamic social environment. This is our mission despite the complexities of recruiting and retaining qualified healthcare professionals, adopting and implementing new clinical knowledge and techniques, and acquiring sophisticated emerging technologies to provide care and comply with an increasingly complex clinical and regulatory environment. The well-being of each patient is the center of all those activities. We have served our community and become a trusted healthcare resource for the entire region.

In 2020, nearly 5,000 healthcare providers from across the region joined under one name and became Better Together.

TidalHealth was formed when the former Peninsula Regional Medical Center, Nanticoke Memorial Hospital in Seaford, DE, and McCready Memorial Hospital in Crisfield, MD, united to improve the health of the communities we serve. Combined, TidalHealth is the recipient of more than 150 national awards, recognitions, and certifications.

Today, TidalHealth Peninsula Regional, TidalHealth Nanticoke and TidalHealth McCready Pavilion all share a rich history of care.

TidalHealth Peninsula Regional, a 266-bed acute care facility celebrating 125 years of service in 2022, is the largest and most experienced healthcare provider in the region. As the sole tertiary hospital on the Delmarva Peninsula, the hospital provides emergency and trauma care, a broad range of acute specialty and subspecialty services, subacute, outpatient, diagnostic, and community health services. Our community-based services are provided by a network of family medicine and specialty care practices across the Delmarva Peninsula through private office sites, health pavilions in Delaware, and a mobile van service to extend the reach across rural communities. Our physicians, staff and volunteers provide care to over 500,000 patients each year. The Salisbury hospital's primary service area (PSA) is Wicomico County, Worcester County, and Somerset County. This Tri-County Region represents nearly 80% of the patients discharged from TidalHealth Peninsula Regional.

**TidalHealth Nanticoke** is a 99-bed nationally recognized community hospital reaching a 70-year milestone of service in 2022. The hospital provides specialty and subspecialty services, outpatient, diagnostic, and community health services. Each year, TidalHealth Nanticoke cares for more than 5,500 admitted patients, 35,000 people in the emergency department, and provides more than 105,000 outpatient tests and procedures. The Seaford hospital's primary service area (PSA) includes the cities of Seaford, Laurel, Bridgeville and Georgetown in the state of Delaware. These four cities encompass 80% of patients discharged from TidalHealth Nanticoke.

#### **Mission**

To improve the health of the communities we serve

#### Vision

To achieve world-class health and wellness for our families, friends and neighbors

#### **10** SERVICE AREA

TidalHealth Peninsula Regional's service area is Somerset, Wicomico, and Worcester counties in Maryland; also known as the Tri-County Region. TidalHealth Nanticoke's service area is Sussex County, Delaware. TidalHealth, SCHD, and WiCHD collaborated for this CHNA to focus on the combined service area made up of the following four counties: Somerset, Wicomico, and Worcester counties in Maryland and Sussex County in Delaware. Together these counties include 66 zip codes, and census tracts therein. For purposes of this report, we will refer to this combined service area as the Tri-County Region and Sussex County, DE.

FIGURE 1. TRI-COUNTY AND SUSSEX, DE SERVICE AREA

#### SOMERSET HEALTH DEPARTMENT

The Somerset Health Department is led by Health Officer Danielle Weber, MS, RN. Approximately 70 employees serve the public in the following departments: Behavioral Health, Community Health, Emergency Preparedness, Environmental Health, Medical Assistance Transportation, Preventive Health Services and Communication, Tri-County Alliance of the Homeless, Vital Records, and our Wellness and Recovery Center.

#### Mission

To serve the public by preventing illness, promoting wellness, and protecting the health of our community

#### **Vision**

Healthy People in Healthy Communities

#### WICOMICO HEALTH DEPARTMENT

The Wicomico County Health Department is led by Health Officer Lori Brewster. Wicomico Health has over 200 employees and 8 major divisions, including: Administration, Behavioral Health, Case Management, Community Health Services, Dental, Environmental Health, Local Behavioral Health Authority, and Prevention and Health Communications. WiCHD has expanded over the years to meet the changing needs of the community and to continually work towards protecting the health and environment of Wicomico County. The behavioral health programs are fully accredited by CARF International (Commission on Accreditation of Rehabilitation Facilities). This achievement is an indication of the organization's dedication and commitment to continually improve services, encourage feedback, and serve the community to improve the quality of the lives of persons served. Additionally, since 2016, WiCHD has been accredited through the Public Health Accreditation Board (PHAB). PHAB sets standards against which governmental public health departments can continuously improve the quality of their services and performance.

#### **Mission**

To maximize the health and wellness of all members of the community through collaborative efforts

#### **Vision**

Healthy People in Healthy Communities

#### **12** CONSULTANTS

The Partnership commissioned Conduent Healthy Communities Institute (HCI) to support report preparation for its 2022 CHNA. HCI works with clients across the nation to drive community health outcomes by assessing needs, developing focused strategies, identifying appropriate intervention programs, establishing monitoring systems, and implementing performance evaluation processes. The following HCI team members were involved in the development of this report: Ashley Wendt, MPH – Public Health Consultant, Dari Goldman, MPH - Senior Project Specialist, Emily Hummel, MPH - Senior Account Manager, and Margaret Mysz, MPH – Research Associate. To learn more about Conduent HCI, please visit <a href="https://www.conduent.com/claims-and-administration/community-health-solutions/">https://www.conduent.com/claims-and-administration/community-health-solutions/</a>.

# COMMUNITY HEALTH NEEDS ASSESSMENT: At a Glance

#### **Community Input**

Community Survey (n=774)

Key Informants (n=14)

Focus Groups (n=26)

#### Most Important Community Health Issues

- Alcohol and Drug Use (50.1%)
- Mental Health and Mental Disorders (44.6%)
- Access to Affordable Health Care Services (39.3%)
- Weight Status (25.1%)

#### **Secondary Data**

Other Conditions/ Older Adults

Prevention & Safety

Heart
Disease
& Stroke

Oral Health

Wellness & Lifestyle

#### **Prioritized Health Needs**

#### Access and Health Equity

#### **Behavioral Health**

44.6%

of survey respondents identified Menta I Health & Mental Disorders as a priority.

### Chronic Disease and Wellness

Cancer

Heart Disease & Stroke

Nutrition & Healthy Eating

#### **Health Equity**

Health equity focuses on the fair and just distribution of health determinants, outcomes, and resources across communities.

Systemic racism

Poverty

Gender discrimination

Poorer health outcomes for groups such as Black, Indigenous, People of Color, individuals living below the poverty level, and LGBTQ+ communities.

**SECTION 2** 

## **LOOK BACK:**

# EVALUATION OF PROGRESS SINCE PRIOR CHNA

The CHNA process should be viewed as a three-year cycle. An important part of that cycle is revisiting the progress made on priority topics from previous CHNAs. By reviewing the actions taken to address priority areas and evaluating the impact of these actions in the community, an organization can better focus and target its efforts during the next CHNA cycle.

# CHNA Cycle

#### 2 PRIORITY HEALTH NEEDS FROM PRECEDING CHNA

The Partnership built upon efforts from the previous 2019 CHNA to focus on communities and populations who disproportionally experience the prioritized health challenges identified above. Of the activities or programs implemented, the most notable are below. You can see more details in the 2019-2022 Implementation Strategy Plan/CHIP in the Appendix or on <a href="https://www.wicomicohealth.org/wp-content/uploads/2021/11/2019-2022-CHIP-CBP">https://www.wicomicohealth.org/wp-content/uploads/2021/11/2019-2022-CHIP-CBP</a> FY22-Update-10.28.2021.pdf.

#### 2.1.1 BEHAVIORAL HEALTH

- 1. Community Outreach Addictions Team (COAT): This program has been recognized by NACCHO (National Association of County and City Health Officials) as a Promising Practice. COAT hires peer support workers, individuals who have been successfully in the recovery process, to help others struggling with addiction, with the goal of linking individuals to treatment services. The program works closely with TidalHealth Peninsula Regional as well as local law enforcement. This program has proven to be an invaluable resource to the community in providing linkage to treatment and other support services to community members dealing with alcohol and substance issues. During Fiscal Year 2021, COAT served 421 individuals, linking 236 to treatment.
- 2. Wicomico County Opioid Intervention Team and Somerset County Opioid United Team: In accordance with the 2017 Executive Order 01.01.2017.01 issued by Governor Larry Hogan, WiCHD and SCHD each continue to coordinate a local Opioid Intervention Team (OIT) in their respective counties. Both teams include private and public partners and have the goal to identify and address opioid related needs in the community by following the state's three-pronged approach of addressing the opioid epidemic in the areas of prevention, treatment, and enforcement. The teams work collaboratively to address policy, develop education, and raise community awareness in the fight against opioid use and opioid overdoses.
- 3. Program to Encourage Active and Rewarding Lives (PEARLS): TidalHealth offers all patients the opportunity to participate in PEARLS. PEARLS is a one-on-one evidence-based program designed to reduce depression in physically impaired and socially isolated individuals. The program is offered in six to eight sessions over a 19-week period by a certified PEARLS Counselor. It is a participant driven program with psychiatric supervision/clinical oversight and consultation offered through MAC, Inc.
- 4. Salisbury-Wicomico Integrated First-Care Team: This innovative partnership to establish a mobile integrated health and community paramedicine program is proven to improve care coordination and health outcomes, reduce hospitalizations and readmissions as well as increase the use of preventive and primary care services. TidalHealth in partnership with Salisbury Fire Department enrolls patients who have utilized the 9-1-1- system more than five times in six months. The multidisciplinary team meets patients in their home, provides home assessments and connection to primary care and support for social determinants of health such as food, shelter, clothing, work-force connections, and healthcare support.
- 5. Smith Island Primary Care and Telemedicine Access: This initiative supports a multidisciplinary team including a medical assistant, pharmacist, nurse practitioner, and physician who travel to the remote, isolated island community to provide health screenings, primary and secondary preventive services and health education and outreach. The team goes to Smith Island twice monthly during spring, summer, and fall months.

#### 2.1.2 DIABETES

1. Chronic Disease Self-Management (CDSM) Classes: TidalHealth partnered with local non-profit, MAC, Inc. to expand access to evidence-based CDSME class throughout the community.

- 2. TidalHealth Community Wellness Program expansion: The Community Wellness Program has expanded beyond mobile health screenings via the Wagner Wellness Van to also include community health workers (CHWs) integrated as part of a mobile multidisciplinary care coordination team. CHWs screen for social determinants of health and work with the nurse-led team to promote chronic disease self-management.
- 3. Sustainable Change and Lifestyle Enhancement (SCALE): SCHD collaborated with WiCHD to implement a free, evidence-based weight loss, nutrition, and physical activity program in Somerset and Wicomico Counties. This evidence-based weight loss, nutrition, and physical activity program is for women ages 18 to 55 and their children ages 7 to 17. In a group setting, health coaches guide participants through healthy eating and physical activity education and activities to achieve sustained weight loss and healthy lifestyle habits. The program also includes special group exercise, cooking demonstrations, grocery store tours, etc. From Fiscal Year 2020 to 2021, 82 adults enrolled in the program. Due to COVID-19, classes were held virtually.

#### **2.1.3 CANCER**

1. TidalHealth Community Wellness Program and Cancer Institute: The Community Wellness Program of the Population Health Management division of TidalHealth works in coordination with the TidalHealth Richard A. Henson Cancer Institute and local health departments to promote early detection and screening for cancer. Teams provide screening for lung cancer, colon cancer, and breast cancer. Outreach is done through events within the community as well as using electronic medical records detection in providers' offices.

## © COMMUNITY FEEDBACK FROM PRECEDING CHNA & IMPLEMENTATION PLAN

The 2019 Community Health Needs Assessment Report and Implementation Strategies were made available to the public via the TidalHealth website at <a href="https://www.tidalhealth.org/community-outreach-partners/community-health-research-data">https://www.tidalhealth.org/community-outreach-partners/community-health-research-data</a>. The reports are also available at the front desk at TidalHealth Peninsula Regional for patients and visitors who would like a copy.

A final review of the report was completed by the Wicomico Local Health Improvement Coalition and the Healthy Somerset Local Health Improvement Coalition. Wicomico County Health Department has a phone number and email listed on their website to request additional information or provide feedback at <a href="https://www.wicomicohealth.org/planning/reports-and-plans/">https://www.wicomicohealth.org/planning/reports-and-plans/</a>. Somerset County Health Department also made the report available on their site at <a href="https://www.somersethealth.org">www.somersethealth.org</a>. No comments had been received on the preceding CHNA at the time this report was written. The report is widely used by local health improvement coalitions, community-based organizations focused on health initiatives, Salisbury University, University of Maryland Eastern Shore, and others to understand the needs of the community and develop interventions to meet those needs.

The following section explores the demographic profile of the Tri-County Region and Sussex County, DE. The demographics of a community significantly impact its health profile. Different race/ethnicity, age, and socioeconomic groups may have unique needs and require varied approaches to health improvement efforts. All demographic estimates are sourced from Claritas Pop-Facts® (2021 population estimates) and American Community Survey one-year (2019) or five-year (2015-2019) estimates unless otherwise indicated.

#### **50 DEMOGRAPHIC PROFILE**

#### 3.1.1. POPULATION

The Tri-County Region and Sussex County, DE has an estimated population size of 423,437 in 2021. The largest county is Sussex County, with a population of 241,079 in 2021. The smallest county is Somerset County with a population of 25,521 in 2021. Figure 2 shows population size by zip code. The darkest blue regions represent zip codes with the largest population. The most populated zip code is 21804 in Wicomico County and the least populated is 21824 in Somerset County.

FIGURE 2: TRI-COUNTY REGION AND SUSSEX, DE POPULATION SIZE BY ZIP CODE

#### **Population Size**

#### 3.1.2 AGE

The figures below show the population by age group for zip codes within the Tri-County Region and Sussex County, DE. As shown in Figure 3, zip codes within western Sussex County and Wicomico County have a high percentage of the population that is under 18. In contrast, as shown in Figure 4, most of the population over 65 is located in eastern Sussex County and northern Worcester County.

According to the Maryland Department of Planning¹ and the Delaware Population Consortium², the percentage of persons aged 65 and older is projected to increase in both states. Maryland projects that older adults will make up 21% of the state's population by 2040 (from 12% in 2010). Delaware projects that older adults will make up nearly 25% of the state's population by 2040 (from 14% in 2010). As aging brings a higher risk of chronic diseases such as dementia, heart disease and diabetes, this change will impact the health and public health systems that should be considered in long-term planning.

- 1. "Department of Planning Maryland State Data Center." Maryland State Data Center, Department of Planning, Dec. 2020, https://planning.maryland.gov/ MSDC/Pages/s3\_projection.aspx
- 2. https://stateplanning.delaware.gov/demography/documents/dpc/DPC2021v0.pdf

FIGURE 3: PERCENT POPULATION UNDER 18, BY ZIP CODE

Percent Population <18 4.24-7.22% 7.23-13.36% 13.37-18.09% 18.10-21.15% 21.16-25.23%

Claritas 2021

FIGURE 4: PERCENT POPULATION OVER 65, BY ZIP CODE

#### 3.1.3 RACE AND ETHNICITY

Race and ethnicity contribute to the opportunities individuals and communities have in order to be healthy. Figures 5 and 6 show the population by race and by ethnicity of each of the four counties. All four counties are majority Non-Hispanic White with Worcester County having the highest proportion identifying as Non-Hispanic White (82.9%) and Somerset having the lowest proportion identifying as Non-Hispanic White (53.1%). Hispanics or Latinos compose between 3.9% and 9.8% of each county's population; Sussex County has the highest proportions of Hispanic or Latino populations at 9.8%. The proportion of Non-Hispanic Asian individuals in each county ranges from 1.0% in Somerset to 3.3% in Wicomico. The Non-Hispanic Black or African American population composes between 13.1% of the population in Worcester to 42.6% in Somerset. The proportion of the population identifying as two or more races also ranges from 1.9% in Worcester to 2.9% in Wicomico.

FIGURE 5: POPULATION BY RACE

FIGURE 6: POPULATION BY ETHNICITY

#### 3.1.4 LANGUAGE AND IMMIGRATION

Understanding countries of origin and languages spoken at home can help inform the cultural and linguistic context for the health and public health system. About 11.7% of the Tri-County Region and Sussex County, DE population ages five and older speak a language other than English at home, which is lower than Delaware and Maryland state averages of 14.8% and 19.6%, respectively. The most common languages spoken at home for the service area is English (88.3%) and Spanish (6.7%).

Figure 7 below shows the percentage of the population five and older in each county and languages spoken at home. Somerset, MD, has the lowest percentage of the population five and older who speak only English at home (83.9%) and the largest percent of the population who speak an Asian or Pacific Islander language at home (8.8%). Sussex County, DE, has the highest percent of the population that speaks Spanish at home (8.3%) compared to the counties within the Tri-County Region and Sussex County, DE.

#### FIGURE 7. LANGUAGE SPOKEN AT HOME

**SECTION 4** 

# SOCIAL & ECONOMIC DETERMINANTS OF HEALTH

This section explores the economic, environmental, and social determinants of health of the Tri-County Region and Sussex County, DE and its 66 zip codes. Social determinants are the conditions in which people are born, grow, work, live, and age, and the wider set of forces and systems shaping the conditions of daily life. It should be noted that county-level data can sometimes mask what could be going on at the zip code level in many communities. While indicators may be strong at the county level, zip code level analysis can reveal disparities.

#### 49 INCOME

Income has been shown to be strongly associated with morbidity and mortality, influencing health through various clinical, behavioral, social, and environmental factors. Those with greater wealth are more likely to have higher life expectancy and reduced risk of a range of health conditions including heart disease, diabetes, obesity, and stroke. Poor health can also contribute to reduced income by limiting one's ability to work.

Figure 8 shows the Median Household Income of each county compared to both Maryland and Delaware state values. As shown, all counties are below Maryland's median household income of \$90,160. Worcester, MD, has the highest median household income of \$68,939. Somerset, MD, has the lowest median household income of \$48,094.

#### FIGURE 8: MEDIAN HOUSEHOLD INCOME

Figure 9 and Figure 10 below show the Median Household Incomes for each county by race and ethnicity, respectively. As shown, there is variation in median income by race and ethnicity for the Tri-County Region and Sussex County, DE. For all counties, Black or African American households have the lowest median household incomes than other racial groups. In Worcester, MD, Black or African American households make only 57% of the overall county median household income (\$39,778 compared to \$68,939). In general, Non-Hispanic/Latino households have higher median incomes than Hispanic/Latino households.

#### FIGURE 9: MEDIAN HOUSEHOLD INCOME BY RACE

#### FIGURE 10: MEDIAN HOUSEHOLD INCOME BY ETHNICITY

#### **POVERTY**

Federal poverty thresholds are set every year by the U.S. Census Bureau and vary by size of family and ages of family members. People living in poverty are less likely to have access to healthcare, healthy food, stable housing, and opportunities for physical activity. These disparities mean people living in poverty are more likely to experience poorer health outcomes and premature death from preventable diseases.

Figure 11 shows the Percentage of Families Living Below Poverty Level by county while Figure 12 shows the Percentage of Families Living Below Poverty Level by zip code. Overall, Somerset, MD, has the highest percentage of families living below poverty (17%) while Worcester, MD, has the lowest percentage (6.3%). In Figure 12 below, the four zip codes with the highest percentage of families living below poverty are seen in the darkest blue color. These zip codes are 21817, 21866, and 21853 in Somerset, MD, and 21874 in Wicomico, MD.

#### FIGURE 11: FAMILIES LIVING BELOW POVERTY LEVEL BY COUNTY

ACS, 2015-2019

21853 Worcester

21866 21817

FIGURE 12: FAMILIES LIVING BELOW POVERTY BY ZIP CODE

#### **43 EMPLOYMENT**

A community's employment rate is a key indicator of the local economy. An individual's type and level of employment impacts access to healthcare, work environment, and health behaviors and outcomes. Stable employment can help provide benefits and conditions for maintaining good health. In contrast, poor or unstable work and working conditions are linked to poor physical and mental health outcomes.

Unemployment and underemployment can limit access to health insurance coverage and preventive care services. Underemployment is described as involuntary part-time employment, poverty-wage employment, and insecure employment.

Type of employment and working conditions can also have significant impacts on health. Work-related stress, injury, and exposure to harmful chemicals are examples of ways employment can lead to poorer health.

Figure 13 shows the Unemployment Rate, according to the U.S. Bureau of Labor Statistics (2021), for each county within the Tri-County Region and Sussex County, DE from October 2019 to May 2021. Noted in the chart is when COVID-19 stay-athome orders began (around March 2020). Unemployment rates rose after the start of the pandemic and have dropped since, but unemployment will continue to be an issue as the economy recovers.

FIGURE 13. UNEMPLOYMENT RATE (POPULATION 16+)

U.S. Bureau of Labor Statistics

Employment and wage potential can be limited based on an individual's education status, gender identity, race/ethnicity, and sexual orientation. As shown in Figure 14, there is a wage gap between women and men in the Tri-County Region and Sussex County, DE. Wicomico, MD, has the largest wage gap, with women earning 70.9% of their male counterparts. Somerset, MD, has the smallest wage gap, with women earning 87% of their male counterparts. Although the data is not available by race/ethnicity for each county, national trends suggest that this wage gap persists and is most likely worsened by racial or ethnic identity.

FIGURE 14. WAGE GAPS FOR WORKING WOMEN

ACS. 2015-2019

#### **EDUCATION**

Education is an important indicator of health and well-being across the lifespan. Education can lead to improved health by increasing health knowledge, providing better job opportunities and higher income, and improving social and psychological factors linked to health. People with higher levels of education are likely to live longer, experience better health outcomes, and practice health-promoting behaviors.

Figure 15 shows the Percent of the Population 25 and Older who have a Bachelor's Degree for each county compared to both Maryland and Delaware state. Somerset, MD, has the lowest percentage of the population 25 and older with a bachelor's degree (10.6%), while Worcester, MD, has the highest percentage at 19.4%.

#### FIGURE 15. POPULATION 25+ WITH A BACHELOR'S DEGREE

Claritas Pop-Facts, 2021

Another indicator related to education is on-time high school graduation. A high school diploma is a requirement for many employment opportunities and for higher education. Not graduating high school is linked to a variety of negative health impacts, including limited employment prospects, low wages, and poverty.

Figure 16 shows the Percent of the Population 25 and Older who have some High School Education but No Diploma. Somerset, MD, has the highest percentage of the population 25 and older without a high school diploma (13.0%) compared to other counties within the Tri-County Region and Sussex County, DE.

Sussex. DE

FIGURE 16. POPULATION 25+ WITH SOME HIGH SCHOOL EDUCATION, NO DIPLOMA

Claritas Pop-Facts, 2021

Somerset, MD

#### **49 HOUSING**

Safe, stable, and affordable housing provides a critical foundation for health and well-being. Exposure to health hazards and toxins in the home can cause significant damage to an individual or family's health. When families must spend a large part of their income on housing, they may not have enough money to pay for things like healthy food or healthcare. This is linked to increased stress, mental health problems, and an increased risk of disease.

■ Wicomico, MD

As shown in Figure 17, many renters living within Wicomico and Somerset counties spend 30% or more of their household income on rent. In some zip codes, such as 21824, 21838, 21856, 21864, and 21853, this is estimated to be over three-quarters of renters. As indicated by the primary data collected during the CHNA process, housing costs and affordability may have been impacted by COVID-19 in these communities. Therefore, the Percent of Renters Spending 30% or More of their Household Income on Rent may have increased since 2019 for all communities.

FIGURE 17. RENTERS SPENDING 30% OR MORE OF HOUSEHOLD INCOME ON RENT BY ZIP CODE

**SECTION 5** 

# DISPARITIES AND HEALTH EQUITY

Identifying disparities by race/ethnicity, gender, age, and geography helps to inform and focus priorities and strategies. Understanding disparities also helps us better understand root causes that impact health in a community and inform action towards health equity. Health equity focuses on the fair distribution of health determinants, outcomes and resources across communities. National trends have shown that systemic racism, poverty, and gender discrimination have led to poorer health outcomes for groups such as Black, Indigenous, or People of Color, individuals living below the poverty level, and LGBTQ+ communities.

Primary and secondary data revealed significant community health disparities based on race/ethnicity, particularly among the Black and Hispanic communities. The assessment also found zip codes with disparities related to health and social determinants of health. It is important to note that while much of the data is presented to show differences and disparities of data by population groups, differences within each population group can be as great as differences between different groups. For instance, Asian or Asian and Pacific Islander encompasses individuals from over 40 different countries with very different languages, cultures, and history in the United States. Information and themes captured through focus groups, key informant interviews, and a community survey have been shared to provide a more comprehensive and nuanced understanding of each community's experiences. This report includes information drawn from all aspects including both quantitative and qualitative data, analysis of health and social determinants collected through interviews, focus group discussions, and an online community survey. The HCI team used a variety of methodologies to analyze data and provide findings that can inform decision-makers and advocates working toward creating more equity, access, and quality within healthcare.

#### **50 DISPARITIES BY RACE AND ETHNICITY**

Community health disparities were assessed in both the primary and secondary data collection processes. Table 1 below identifies notable secondary data health indicators with a statistically significant disparity for any of the counties within the Tri-County Region and Sussex County, DE. A complete list can be found in Appendix A.

TABLE 1. INDICATORS WITH SIGNIFICANT RACE/ETHNIC DISPARITIES

HEALTH INDICATOR	GROUP(S) NEGATIVELY IMPACTED
People 65+ Living Below Poverty Level	Black/African American, Hispanic/
	Latino, Other Race
Workers who Walk to Work	Black/African American, Hispanic/
	Latino
Families Living Below Poverty Level	Black/African American, Hispanic/
	Latino, Two or More Races, Other Race,
	American Indian/Alaskan Native
Teen Birth Rate: 15-19	Black/African American
Children Living Below Poverty	Hispanic/Latino, Other Race, Two or
	More Races

The indicators listed in Table 1 above show a statistically significant difference for race or ethnic groups according to the Index of Disparity analysis. Black or African American and Hispanic/Latino populations were identified as the most negatively impacted groups. Both groups show significant disparities in four of the five listed indicators. These disparities will be considered during implementation planning to improve overall health and wellbeing in the Tri-County Region and Sussex County, DE.

Focus groups and key informant interviews identified the following groups as those struggling more with social determinants of health and potentially experiencing worse health outcomes: families living on a low income, Black or African American populations, Hispanic/Latino populations, Haitian population, and immigrant populations. Additionally, older adults and children were identified as groups challenged with accessing healthcare services and providers. Specifically, a lack of pediatric and specialty care providers was frequently mentioned. Transportation was consistently raised as a major barrier to accessing services for these populations, especially in rural regions.

#### DINDEX OF DISPARITY (IOD)

The Index of Disparity (IoD)<sup>3</sup> identified large disparities based on how far each subgroup (by race/ethnicity or gender) is from the overall county value. For this analysis, indicators with a high disparity were identified and, when available, IoD values were tracked over time to show if progress has been made to address those disparities. These findings are shown alongside relevant secondary data throughout this report. For more information about IoD methodology, see the Index of Disparity section in Appendix A.

3. Pearcy, Jeffrey, and Kenneth Keppel. *A Summary Measure of Health Disparity*. Public Health Reports, June 2002.

#### **5** GEOGRAPHIC DISPARITIES

Geographic disparities were identified using the Health Equity Index and Food Insecurity Index. These indices have been developed by Conduent Healthy Communities Institute to easily identify areas of high socioeconomic need or food insecurity. Conduent's Health Equity Index estimates areas of highest socioeconomic need correlated with poor health outcomes. Conduent's Food Insecurity Index estimates areas of low food accessibility correlated with social and economic hardship. For both indices, counties, zip codes, and census tracts with populations

over 300 are assigned index values ranging from zero to 100, where higher values are estimated to highest need, critical to targeting prevention and outreach activities.

#### **5.3.1 HEALTH EQUITY INDEX**

Conduent's Health Equity Index (HEI) estimates areas of highest socioeconomic need correlated with poor health outcomes. In the HEI, zip codes are ranked based on their index value to identify the relative levels of need, as illustrated by the map in Figure 18. According to the 2021 index, the following zip codes had the highest level of socioeconomic need (as indicated by the darkest shades of blue): 21853 (Somerset, MD) and 21817 (Somerset, MD). Table 2 provides the index values for each top need zip code. See Appendix A for more detailed methodology for the calculation of Health Equity Index values.

FIGURE 18: HEALTH EQUITY INDEX

TABLE 2. HEALTH EQUITY INDEX VALUES BY ZIP CODE

ZIP CODE	RANK	HEI VALUE	COUNTY
21853	5	90.2	Somerset, MD
21817	5	88.6	Somerset, MD
19933	4	76.0	Sussex, DE
21851	4	73.1	Worcester, MD
19973	4	69.5	Sussex, DE

#### 5.3.2 FOOD INSECURITY INDEX

Conduent's Food Insecurity Index (FII) estimates areas of low food accessibility correlated with social and economic hardship. In this index, zip codes are ranked based on their index value to identify the relative levels of need, as illustrated by the map in Figure 19. According to the 2020 FII, the following zip codes have the highest level of food insecurity (as indicated by the darkest shades of green): 21817 (Somerset, MD), 21851 (Worcester, MD), and 21853 (Somerset, MD). Table 3 provides the index values for high needs zip codes. See Appendix A for a more detailed FII methodology.

FIGURE 19. FOOD INSECURITY INDEX

TABLE 3. FOOD INSECURITY INDEX VALUES BY ZIP CODE

ZIP CODE	RANK	FII VALUE	COUNTY
21817	5	89.1	Somerset, MD
21851	5	86.5	Worcester, MD
21851	5	86.4	Somerset, MD
21874	4	72.0	Wicomico, MD
21804	4	69.4	Wicomico, MD

#### **50** FUTURE CONSIDERATIONS

While identifying barriers and disparities are critical components in assessing the needs of a community, it is also important to understand the social determinants of health and other upstream factors that influence a community's health as well. The challenges and barriers faced by a community must be balanced by identifying practical, community-driven solutions. Together, these factors come together to inform and focus strategies to positively impact a community's health. The following outlines opportunities for on-going work as well as potential for future impact.

The Partnership and a coalition of community-based stakeholders was awarded \$1.2 million through the Maryland Community Health Resources Commission Pathways to Health Equity grant to support the Rural Equity and Access to Community Health (REACH) project. The project is a two-year pilot with the potential for another five years of funding to become a sustainable Health Equity Resource Community as defined by the Maryland Health Equity Resource Act approved during the 2021 state legislative session. This new funding ensures resources for local communities to address health disparities, improve health outcomes, expand access to primary care and prevention services, and help reduce healthcare costs. The REACH Project will specifically address disparities in diabetes and hypertension experienced by the Black and Haitian population on the Lower Eastern Shore. Key interventions will occur at the individual, community and system levels and include expansion of mobile integrated health, connections with primary care, expansion of culturally and linguistically appropriate evidence-based diabetes programming and deployment of community health workers.

# METHODOLOGY AND KEY FINDINGS

#### **61 OVERVIEW**

The Partnership combined primary and secondary data to inform its Community Health Needs Assessment (CHNA). The CHNA provides an understanding of the health status, quality of life, and risk factors of a community through findings from secondary data analysis and qualitative data collection. The themes and strengths provide insights about what topics and issues community members feel are important, how they perceive their quality of life, and what assets they believe can be used to improve health. Findings from both primary and secondary data helped to inform the top community health needs. Each type of data was analyzed using a defined methodology. Primary data was obtained through a community survey, focus groups, and key informant interviews. Secondary data are health indicator data that have been collected by other sources, such as national and state level government entities, and made available for analysis.

#### SECONDARY DATA FINDINGS

Counties

US Counties

State Value

US Value

HP2020

Trend

TABLE 4: SECONDARY DATA SCORING RESULTS (WEIGHTED)

Health and Quality of Life Topics	Score
Other Conditions	1.90
Prevention & Safety	1.84
Heart Disease & Stroke	1.78
Oral Health	1.71
Wellness & Lifestyle	1.70
Alcohol & Drug Use	1.63

Health Care Access & Quality	1.51
Community	1.51
Adolescent Health	1.49
Environmental Health	1.48
Diabetes	1.47
Mental Health & Mental Disorders	1.43

Secondary data used for this assessment were collected and analyzed with the Conduent Healthy Communities Institute (HCI) Community Dashboard — a web-based community health platform developed by Conduent Community Health Solutions. The Community Dashboard brings data, local resources, and a wealth of information to one accessible, user-friendly location. It includes over 250 community indicators covering more than 25 topics in the areas of health, determinants of health, and quality of life. The data are primarily derived from state and national public secondary data sources. The value for each of these indicators is compared to other communities, nationally or locally set targets, and to previous time periods.

HCl's Data Scoring Tool was used to systematically summarize multiple comparisons across the Community Dashboard and rank indicators based on highest need. This was done separately for each county within the Tri-County Region and Sussex County, DE. For each indicator, the county value was compared to a distribution of either Maryland or Delaware counties, US counties, state and national values, Healthy People 2030, and significant trends. Each indicator was then given a score based on the available comparisons. These scores range from 0 to 3, where 0 indicates the best outcome and 3 the worst. Availability of each type of comparison varies by indicator and is dependent upon the data source, comparability with data collected from other communities, and changes in methodology over time. These indicators were grouped into topic areas for a higher-level ranking of community health needs.

A weighted analysis of the results was performed to determine the top health needs for the entire Tri-County Region and Sussex County, DE service area. The weighted analysis was conducted using the individual county results and the total population of each county as compared to the combined population of the service area.

Table 4 shows the health and quality of life weighted topic scoring results. Topics that score close to or above a 1.50 are considered high need. Health topic areas with fewer than three indicators were considered a data gap. Data gaps were

specifically assessed as a part of the key informant interviews to ensure that, where the secondary data fell short, primary data could provide a more accurate picture of that particular health topic area.

The analysis of national, state, and local indicators that contributed to the CHNA can be reviewed in full in Appendix A.

#### **B PRIMARY DATA COLLECTION & ANALYSIS**

To ensure the perspectives of community members were considered, input was collected from all four counties in the Tri-County Region and Sussex County, DE. Primary data used in this assessment consisted of an online community survey, focus groups, and key informant interviews. The findings from this data expanded upon information gathered from the secondary data analysis to inform this Community Health Needs Assessment.

As the assessment was conducted during the COVID-19 pandemic, primary data collection methods were managed in a way to maintain social distancing and protect the safety of participants by eliminating in-person data collection.

To help inform an assessment of community assets, community members were asked to list and describe resources available in the community. Although not reflective of every resource available in the community, the list can help The Partnership to expand and support existing programs and resources. This resource list is available in Appendix C.

#### **6.3.1 COMMUNITY SURVEY**

Community input was collected via an online community survey available in English and Spanish, as well as paper copies available in Arabic, Creole, Korean, and Portuguese, from August 2021 through November 2021. The survey consisted of 45 questions related to top health needs in the community, individuals' perception of their overall health, individuals' access to healthcare services, as well as social and economic determinants of health. The survey was shared via health departments' websites, social media, email distribution, and other local community partners. Paper copies were also distributed at several community outreach events, local libraries, and directly to patients at TidalHealth via Community Health Workers or Care Coordination Specialists. A total of 774 responses were collected.

#### **Demographics of Community Survey Respondents**

As seen in Figure 20, a majority of survey respondents reported being from Wicomico County, even though it does not have the largest population of the Tri-County Region and Sussex County, DE. This is something to consider in future assessments.

#### FIGURE 20: RESPONDENTS COUNTY OF RESIDENCE

As shown in Figure 21, White or Caucasian community members comprised the largest percentage of survey respondents at 81.4%, followed by Black/African American community members at 12.3%.

#### FIGURE 21: RESPONDENTS RACE

Only 1.4% of survey respondents identified as Hispanic/Latino, while the majority, 92.4% identified as Non-Hispanic/Latino (Figure 22).

#### FIGURE 22: RESPONDENTS ETHNICITY

Figure 23 shows the age breakdown of survey respondents. The 35-44 and 45-54 age groups comprised the largest portions of survey respondents, at 19.4% and 24.0% respectively.

#### FIGURE 23: RESPONDENTS AGE

The majority of survey respondents identified as female at 82.5%. An additional 15.8% identified as male, and the remaining 1.7% as other (transgender, non-conforming or prefer not to answer), as shown in Figure 24.

FIGURE 24: RESPONDENTS GENDER

#### 6.3.2 COMMUNITY SURVEY ANALYSIS RESULTS

In the survey, participants were asked about important health issues in the community, and which were the most important quality of life issues to address in the Tri-County Region and Sussex County, DE. The top responses for these questions are shown in Figures 25 and 26 below. Additionally, questions were included to get feedback about the impact of COVID-19 on the community, which is included in the "COVID-19 Impact Snapshot" section of this report.

As shown in Figure 25, the "Most Important Community Health Issues" were Alcohol and Drug Use (50.1% of respondents), Mental Health and Mental Disorders (44.6%), Access to Affordable Healthcare Services (39.3%), and Weight Status (25.1%).

FIGURE 25. MOST IMPORTANT COMMUNITY HEALTH ISSUES

As shown in Figure 26 below, Crime and Crime Prevention was ranked by survey respondents as the most urgent quality of life issue needing to be addressed (35.5% of survey respondents), followed by Homelessness and Unstable Housing (34.9%), Economy and Job Availability (23.0%), Nutrition and Health Eating (21.0%) and Inequity in Housing, Jobs, Health, etc. for underserved populations (19.7%).

FIGURE 26: MOST IMPORTANT QUALITY OF LIFE ISSUES TO ADDRESS

#### 6.3.3 QUALITATIVE DATA (FOCUS GROUPS & KEY INFORMANT INTERVIEWS)

The Partnership conducted key informant interviews and focus groups to gain deeper insights about perceptions, attitudes, experiences, or beliefs held by community members about their health and the health of their community. It is important to note that the information collected in an individual focus group or interview is not necessarily representative of other groups.

#### **Focus Groups**

The project team developed a focus group guide made up of a series of questions and prompts about the health and well-being of residents in the Tri-County Region and Sussex County, DE. The guide can be found in Appendix B. All participants volunteered. Advertisement was done via social media, press releases and posters with QR codes. \$10 local gift cards were offered as an incentive. Participants could sign up through an online registration form or by phone. Community members were asked to speak to barriers and assets to their health and access to healthcare. Four virtual focus groups were hosted in the following counties: Somerset, Wicomico, Worcester, MD, and Sussex, DE, during October and November 2021. A total of 26 participants took part in the four focus groups, which each lasted approximately 30 - 45 minutes. Facilitators implemented techniques to ensure that everyone was able to participate in the discussions.

#### **Key Informant Interviews**

HCI consultants conducted key informant interviews to collect community input. Interviewees who were asked to participate were recognized as having expertise in public health, special knowledge of community health needs, and/or represented the broad interest of the community served by the hospitals and health departments, and/or could speak to the needs of medically underserved or vulnerable populations.

A total of 14 key informant interviews were conducted during August 2021-October 2021. You can see the key informant organizations represented below in Table 5. These organizations are also current or potential community partners for the hospitals and health departments leading this assessment. Each interview included an interviewer and notetaker and lasted approximately 30 – 60 minutes. During the interviews, questions were asked to learn about the interviewee's background and organization, biggest health needs and barriers of concern in the community, as well as the impact of health issues on vulnerable populations. A list of the questions asked during the interviews can be found in Appendix B.

TABLE 5. KEY INFORMANT ORGANIZATIONS & POPULATION SERVED

KEY INFORMANT ORGANIZATION	POPULATION SERVED
Chesapeake Healthcare	Tri-County Region
Deer's Head Hospital Center	Tri-County Region
HOPE, Inc.	Tri-County Region
MAC, Inc	Tri-County Region
Rebirth, Inc.	Wicomico County and surrounding region
Recovery Resource Center	Wicomico County
Salisbury University	Wicomico County
Somerset County Department of Social Services	Somerset County
Somerset County Health Department	Somerset County
Somerset County Schools	Somerset County
Sussex County Coalition	Sussex, DE
University of Maryland Eastern Shore (UMES)	Tri-County Region and Sussex, DE
Wicomico County Council	Wicomico County
Wicomico County Health Department	Wicomico County

#### 6.3.4 QUALITATIVE DATA ANALYSIS RESULTS

Transcripts from the focus groups and key informant interviews were uploaded to the web-based qualitative data analysis tool, Dedoose<sup>4</sup>. Transcript text was coded using a pre-designed codebook, organized by themes, and analyzed for significant observations. The frequency with which a health topic was discussed was used to assess the relative importance of that health and/or social need to determine the most pressing health needs of the community. The findings from the qualitative analysis were combined with the findings from other data sources and incorporated into the Data Synthesis, Top Health Needs, and COVID-19 sections of this report.

4. Dedoose Version 8.0.35, web application for managing, analyzing and presenting qualitative and mixed method research data (2018). Los Angeles, CA: Socio-Cultural Research Consultants, LLC www.dedoose.com

#### **Themes Across Qualitative Data**

Figure 27 below summarizes the main themes and topics that trended across all or almost all focus group conversations and key informant interviews.

#### FIGURE 27: WORD CLOUD THEMES FROM QUALITATIVE DATA

#### 6.3.5 DATA CONSIDERATIONS

A key part of any data collection and analysis process is recognizing potential limitations within the data considered. All forms of data have their own strengths and limitations. Each data source for this CHNA process was evaluated based on these strengths and limitations during data synthesis and should be kept in mind when reviewing this report. For both quantitative and qualitative data, immense efforts were made to include as wide a range of secondary data indicators, community survey respondents, focus group participants, and key informant experts as possible.

While data collection efforts aimed to include a wide range of secondary data indicators and community member voices, some limitations of the data should be considered when reviewing the findings presented in this report. Although the topics by which data are organized cover a wide range of health and health-related areas, within each topic there is a varying scope and depth of secondary data indicators and primary data findings.

#### SECTION 6 METHODOLOGY AND KEY FINDINGS

Secondary data were limited to availability of data, with some health topic areas having a robust set of indicators while others were more limited. The Index of Disparity, used to analyze disparities for the secondary data, is also limited by data availability from data sources. Some secondary data sources do not include subpopulation data and others only display values for a select number of racial/ethnic groups.

For the primary data, the breadth of findings is dependent upon who was selected to be a key informant or who self-selected to participate in the community focus groups. Additionally, the community survey was a convenience sample, which means results may be vulnerable to selection bias and make the findings less generalizable. Findings from the survey were shown to have a majority of respondents who identified as White, Non-Hispanic, and/or Female. This is a limitation to consider in future assessments, specifically in targeting the qualitative data collection to better include a true representation of the Tri-County Region and Sussex County, DE.

SECTION 7

# DATA SYNTHESIS AND PRIORITIZATION

#### **10** DATA SYNTHESIS

Primary and secondary data were collected, analyzed, and synthesized to identify the significant community health needs in the Tri-County Region and Sussex County, DE. The top health needs identified from data sources were analyzed for areas of overlap.

#### FIGURE 28: DATA SYNTHESIS VENN DIAGRAM

SECONDARY DATA • Heart Disease & Stroke • Oral Health • Prevention & Safety • Diabetes Alcohol & Other/Chronic Drug Use Conditions Access to Health Older Adults Care Services • Mental Health & Mental Disorders • Nutrition & Healthy Cancer Eating/Physical Activity/Weight • Crime & Crime Status Prevention • Homelessness & **Unstable Housing** • Covid-19 Impact

FOCUS GROUPS AND KEY INFORMANT INTERVIEWS

COMMUNITY

**SURVEY** 

Primary data from the community survey, focus groups, and key informant interviews as well as secondary data findings identified 12 areas of greater need. Figure 29 shows the final 12 significant health needs, listed in alphabetical order, that were included for prioritization based on the synthesis of all forms of data collected for CHNA.

#### FIGURE 29. DATA SYNTHESIS RESULTS

#### **PRIORITIZATION**

To better target activities to address the most pressing health needs in the community, The Partnership convened a group of hospital and health department leaders and colleagues to participate in a presentation of data on significant health needs facilitated by HCI. Following the presentation and question session, participants were given access to an online link to complete a scoring exercise to rank the significant health needs based on a set of criteria. The presentation and prioritization session were conducted virtually to maintain social distancing and safety guidelines related to the COVID-19 pandemic.

The participants reviewed the scoring results of the significant community needs and determined prioritized health needs based on the same set of criteria used in the scoring exercise.

#### 7.2.1 PARTICIPANTS

The following hospital and health department leaders took part in the prioritization session:

- Allie O'Leary, Data Analyst, TidalHealth
- Chris Hall, Vice President/Chief Business Officer, TidalHealth
- Christina Gray, Epidemiologist, Wicomico County Health Department
- Danielle Weber, Health Officer, Somerset County Health Department
- Henry Nyce, Manager of Strategic Planning, TidalHealth
- · James Trumble, VP Clinical Integration, TidalHealth
- Kathryn Fiddler, Vice President Population Health, TidalHealth
- Katherine Rodgers, Director of Community Health Initiatives, TidalHealth
- Kelly Ward, Special Assistant to the Health Officer & Deputy PIO, Wicomico County Health Department
- · Lisa Renegar, Health Planner, Wicomico County Health Department
- Logan Becker, Planning Analyst, TidalHealth
- Lori Brewster, Health Officer, Wicomico County Health Department
- Sharon Lynch, Preventive Services and Communications Director, Somerset County Health Department

#### 7.2.2 PROCESS

On January 24, 2022, the above-mentioned joined together for the prioritization meeting hosted by HCI. During this meeting, the group reviewed and discussed the results of HCI's primary and secondary data analyses leading to the preliminary significant health needs discussed in detail in the data synthesis portion of this report. From there, participants were given three days to access an online link to score each of the significant health needs by how well they met the following criteria:

- 1. Magnitude of the Issue
  - How many people in the community are or will be impacted?
  - How does the identified need impact health and quality of life?
  - · Has the need changed over time?
- 2. Ability to Impact
  - Can actionable and measurable goals be defined to address the health need? Are those goals achievable in a reasonable time frame?
  - Does the hospital or health system have the expertise or resources to address the identified health need?
  - Can the need be addressed in collaboration with community partners? Are organizations already addressing the health issue?

The group also agreed that root causes, disparities, and social determinants of health would be considered for all health topics resulting from prioritization.

Participants scored each health area against each criterion on a scale from 1-3 with 1 meaning it did not meet the given criterion, 2 meaning it met the criterion, and 3 meaning it strongly met the criterion. In addition to considering the data presented by HCI in the presentation and on the health topic note sheet, participants were encouraged to use their own judgment and knowledge of the community in considering how well a health topic met the criteria.

#### SECTION 7 DATA SYNTHESIS AND PRIORITIZATION

Completion of the online exercise resulted in a numerical score for each health need that correlated with how well that particular need met the criteria for prioritization. HCI downloaded the online results, calculated the scores, and then ranked the significant health needs according to their topic scores, with the highest scoring health need receiving the highest priority ranking.

#### 7.2.3 SIGNIFICANT HEALTH NEEDS PRIORITIZATION

The aggregate ranking can be seen in the list below. The Partnership reviewed the scoring results of the significant community needs and determined prioritized health needs based on the same set of criteria used in the scoring exercise.

- 1. Diabetes (2.8)
- 2. Mental Health & Mental Disorders (2.7)
- 3. Alcohol & Drug Use (2.6)
- 4. Nutrition & Health Eating / Physical Activity / Weight Status (2.6)
- 5. Access to Healthcare Services (2.5)
- 6. Cancer (2.5)
- 7. Other/Chronic Conditions & Older Adults (2.4)
- 8. Heart Disease & Stroke (2.4)
- 9. Homelessness & Unstable Housing (2.0)
- 10. Prevention & Safety (1.8)
- 11. Oral Health (1.7)
- 12. Crime & Crime Prevention (1.6)

The group decided to combine Access to Healthcare Services with some of the underlying disparities and social determinants of health into the broader priority area of Access and Health Equity. Similarly, and as was done in the past CHNA cycle, they decided on combining the health areas of Mental Health & Mental Disorders with Alcohol & Drug Use into the broader category of Behavioral Health. Finally, the group combined Chronic Disease topics of Cancer, Diabetes, Heart Disease & Stroke with Nutrition & Healthy Eating/Physical Activity/Weight Status, as well as Other/Chronic Conditions & Older Adults into a comprehensive topic area of Chronic Disease and Wellness. The results of the prioritization session were presented to the Wicomico LHIC where they reviewed and approved the priority areas at their February 4, 2022, meeting. The three priority health areas that will be considered for subsequent implementation planning are:

PRIORITIZED HEALTH NEEDS
Access and Health Equity
Behavioral Health
Chronic Disease and Wellness

#### SECTION 7 DATA SYNTHESIS AND PRIORITIZATION

A deeper dive into the primary data and secondary data indicators for each of these three priority topic areas is provided later in this report. This information highlights how each issue became a high priority health need for The Partnership. Most of these health topic areas are consistent with the priority areas that emerged from the previous CHNA process. TidalHealth, SCHD, and WiCHD plan to build upon these efforts and continue to address these health needs in their upcoming Implementation Strategies and Community Health Improvement Plans.

# PRIORITIZED SIGNIFICANT **HEALTH NEEDS**

The following section provides detailed descriptions of the three prioritized health needs. This also includes health issues, the population groups with greater needs, and factors that contribute to those needs.

#### PRIORITIZED HEALTH TOPIC #1: **ACCESS AND HEALTH EQUITY**

### **Access and Health Equity**

Secondary

Data Score:

(Access to

Health Care)

- · Adults with Health Insurance
- · Adults Unable to Afford to See a Doctor
- · Dentist Rate
- · Primary Provider Rate

#### **Key Themes from Community Input**

providers

- most pressing health issue (39.3%) · Lack of provider availability/specialty
- · Barriers include: transportation, language, education, cost, knowledge of healthcare system
- 20% of survey respondents disagree or strongly disagree that individuals in my community can access healthcare services regardless of race, gender, sexual orientation, immigration status, etc.

#### **SECONDARY DATA**

The secondary data analysis for Healthcare Access and Quality resulted in a topic score of 1.51 on a scale of 0 to 3, indicating need slightly above average. Some notable indicators that fall within this topic area are seen in the charts below. All counties within the Tri-County Region and Sussex County, DE are below their state average for Primary Care Provider Rates, Non-Physician Provider Rates, and Adults with Health Insurance (Figures 30, 31, and 32). Somerset, MD, is also

within the worst quartile for all Maryland counties for primary care provider rates and Wicomico, MD, has seen a significant decrease in primary care provider rates between 2011 and 2018. All counties have seen a significant increase in health insurance rates since 2010. All counties except Wicomico, MD, are below their state averages for non-physician provider rates in 2020 (Figure 31). A full list of indicators that fall within this topic can be found in the Secondary Data Methodology in Appendix A.

#### FIGURE 30: PRIMARY CARE PROVIDER RATE (COUNTY HEALTH RANKINGS, 2018)

County Health Rankings, 2018

#### FIGURE 31: NON-PHYSICIAN PROVIDER RATE (COUNTY HEALTH RANKINGS, 2020)

County Health Rankings, 2020

### FIGURE 32: ADULTS WITH HEALTH INSURANCE: 18-64 (SMALL AREA HEALTH INSURANCE ESTIMATES, 2019)

Small Area Health Insurance Estimates, 2019

Access to Care can be affected by many factors, including poverty rates. As shown in Table 1 above in the Disparities section of this report, families identifying as Black or African American, Hispanic/Latino, Two or More Races, Other Race, and American Indian/Alaskan Native have the highest poverty rates. These disparities not only affect quality of health but can also affect access to quality healthcare services.

#### **PRIMARY DATA**

#### **ACCESS TO CARE**

Access to Care was a top health need identified from the community survey, focus groups, and key informant interviews. The general cost of care, populations that are uninsured or underinsured, and the impact of unemployment were mentioned as underlying causes. Recent health facility closings and delays due to COVID-19 were also mentioned as barriers to accessing care. The need for improved/increased cultural competency, as well as offering services in languages spoken in some of the minority populations of the community, were subjects that surfaced in the primary data as well. Additionally, transportation was listed as a major barrier to accessing services, as well as a general lack of providers, especially in the more rural areas. Many participants spoke about the lack of specialists making access for those in need of specialist health services very difficult.

GG

Getting to the doctor is a challenge for many. And there is a shortage of healthcare providers. Specifically, a major shortage of specialty and/or pediatric providers.

-Key informant

#### **HEALTH EQUITY**

Inequities related to accessing healthcare or social services were mentioned throughout the focus groups and key informant interviews. Participants specifically spoke about families living on low incomes, people from racial or ethnic minority groups, immigrant populations, and older adults being more at risk for negative health outcomes due to lack of equitable access. Health literacy, cultural or language barriers, and lack of knowledge or ability to navigate the healthcare system were all brought up as topics of concern affecting those who are at increased risk for poor health.

Socioeconomics plays a major role in the level of health for individuals. The poorer communities simply do not have equitable access or resources to seek appropriate care when needed.

-Key informant

The community survey respondents also listed inequities in housing, jobs, and health for populations that have historically been underserved as top contributors impacting quality of life in the community.

#### **PRIORITIZED HEALTH TOPIC #2: BEHAVIORAL HEALTH**

#### **Behavioral** Health

1.63 (Alcohol & Drug Use)

Secondary Data Score:

(Mental Health & 1.43 (Mental Disorders)

#### **Key Themes from Community Input**

- · Alcohol and Drug Use was the top ranked health need from the community survey
- · 44.6% of survey respondents ranked Mental Health & Mental Disorders as the most pressing health issue
- Top reasons for not seeking mental health services or alcohol/substance use treatment services included: wait is too long, cost - too expensive/can't pay, office/service/program has limited access or is closed due to COVID-19
- Stress, anxiety, co-occurring substance abuse, behavioral health problems all are contributing factors to mental health issues
- · Need for more mental health services, providers, and resources

#### Warning **Indicators**

- · Frequent Mental Distress
- Poor Mental Health Days
- Self-Reported Mental Health: Good or Better
- · Age-Adjusted Death Rate due to Drug Use
- · Alcohol Impaired Driving Deaths
- Death Rate due to Drug Poisoning

#### **SECONDARY DATA**

The secondary data analysis for Mental Health & Mental Disorders and Alcohol & Drug Use resulted in topic scores of 1.43 and 1.63, respectively. These topic areas were combined into one priority, Behavioral Health, given the relationship between mental health and substance use disorders.

#### MENTAL HEALTH AND MENTAL DISORDERS

Secondary data scoring presented Mental Health & Mental Disorders as slightly below average, with a topic score of 1.43. Wicomico, MD, and Somerset, MD, had higher individual scores for this topic area (1.73 and 1.61, respectively), which could indicate a greater need for mental health services or interventions in these counties.

It is important to note that Mental Health can be affected by a variety of socioeconomic factors including income, social support, socioeconomic status, gender identity, disability status, and stress caused by structural racism and other systemic barriers. Conduent's Mental Health Index (MHI) is a measure of socioeconomic and health factors correlated with self-reported poor mental health. Based on the MHI, in 2021, zip codes are ranked based on their index value to identify the relative levels of need, as illustrated by the map in Figure 33. The following zip codes are estimated to have the highest need (as indicated by the darkest shades of purple): 21817 (Somerset, MD), 21853 (Somerset, MD), 21851 (Worcester, MD), and 21801 (Wicomico, MD). Table 6 provides the index values for high needs zip codes. See Appendix A for more detailed MHI methodology.

FIGURE 33: MENTAL HEALTH INDEX BY ZIP CODE

TABLE 6. FOOD INSECURITY INDEX VALUES BY ZIP CODE

ZIP CODE	RANK	MHI VALUE	COUNTY
21817	5	95.3	Somerset, MD
21853	5	95.8	Somerset, MD
21851	5	93.6	Worcester, MD
21801	5	93.2	Wicomico, MD

#### **ALCOHOL & DRUG USE**

Secondary data scoring presented Alcohol & Drug Use as above average, with a topic score of 1.63. There are concerning data around age-adjusted drug and opioid-involved overdose deaths, alcohol-impaired driving deaths, and death rate due to drug poisonings. Both Worcester, MD, and Sussex, DE, have higher Age-Adjusted Drug and Opioid-Involved Overdose Death rates than their respective state values (Figure 34). All counties also have higher Age-Adjusted Drug and Opioid-Involved Overdose Death Rates than the U.S. value of 22.8 deaths/100,000 population. Additionally, both Worcester, MD, and Sussex, DE, have higher Alcohol-Impaired Driving Deaths than their respective state values (Figure 35). Worcester, MD, has also seen a non-significant increase in Alcohol-Impaired Driving Deaths between 2008-2012 and 2015-2019 and is among the worst quartile of all MD and U.S. counties. Lastly, as shown in Figure 36, all counties within the Tri-County Region and Sussex County, DE saw a significant increase for the Death Rate Due to Drug Poisoning between 2004-2010 and 2017-2019.

FIGURE 34: AGE-ADJUSTED DRUG AND OPIOID-INVOLVED OVERDOSE DEATH RATES (CENTERS FOR DISEASE CONTROL AND PREVENTION, 2017-2019)

Centers for Disease Control and Prevention, 2017-2019

FIGURE 35: ALCOHOL-IMPAIRED DRIVING DEATHS (COUNTY HEALTH RANKINGS, 2015-2019)

County Health Rankings, 2015-2019

FIGURE 36: DEATH RATE DUE TO DRUG POISONING (COUNTY HEALTH RANKINGS, 2004-2019)

County Health Rankings, 2004-2019

#### PRIMARY DATA

#### MENTAL HEALTH AND MENTAL DISORDERS

Mental Health and Mental Disorders was a top health need from the community survey, focus groups, and key informant interviews. In the community survey it was ranked as the second most pressing health need in the community.

Mental health resources, and the availability of mental health providers were frequently cited as disproportionate to community need. Focus group and key informant participants mentioned stigma associated with mental health or mental disorders being a limitation for people in need to seek help or treatment. Overall cost, lack of mental health providers and resources, and navigation and/or knowledge about available services were all mentioned as barriers also.

Participants emphasized the impact of anxiety and stress that some community members were experiencing due to COVID-19. Social isolation was a topic that was discussed during these conversations, specifically mentioning the impact on youth and older adults. Separation from school routines and social networks are greatly impacting mental health for these groups.

Mental health is a real struggle before/during/after the pandemic. There are more people in need of mental health resources now than we've ever seen before.

-Key informant

#### ALCOHOL AND DRUG USE

Alcohol and Drug Use was the top ranked health need from the community survey. Focus group participants mentioned alcoholism and drug addictions frequently coincide with or are a result of mental health issues. Key informants pointed out that low-income and impoverished neighborhoods typically deal with more stressors while drugs are simultaneously more accessible in those areas. Participants mentioned the opioid epidemic still affecting their community, specifically the issue of opioid overdoses. Additionally, they spoke about unintentional overdoses due to lacing certain drugs with fentanyl.

There is a need for more outreach, education, and prevention efforts in schools and among youth. Need more protective factors in place as youth are getting older.

-Key informant

#### PRIORITIZED HEALTH TOPIC #3: CHRONIC DISEASE AND WELLNESS

**1.47** (Diabetes)

1.78 (Heart Disease & Stroke)

1.90 (Other Conditions)

**Chronic Disease** and Wellness

Secondary Data Score:

1.58 (Older Adults) 1.55 (Physical Activity)

#### **Key Themes from Community Input**

- · Weight status ranked by survey respondents as the 4th most pressing health issue
- 12.6% of survey respondents strongly agree that we have good parks and recreational facilities
- · Lack of nutrition education and lack of access to healthy foods, grocery stores, farmers markets cited as leading factors
- 28.4% of survey respondents disagree/strongly disagree that affordable healthy food options are easy to purchase at nearby grocery stores or farmer's markets
- Prevalent Cancers include: Breast Cancer, Colon Cancer, Colorectal Cancer, Lung Cancer, Prostate Cancer

#### Warning **Indicators**

- · Adults with Diabetes
- · Diabetes: Medicare Population
- Age-Adjusted ER Rate due to Diabetes
- · Age-Adjusted Death Rate due to Diabetes
- · Atrial Fibrillation: Medicare Population
- · Hyperlipidemia: Medicare Population
- · Hypertension: Medicare Population
- Adults who Experienced a Stroke
- · Stroke: Medicare Population
- · High Blood Pressure Prevalence
- · Chronic Kidney Disease: Medicare Population
- Hypertension: Medicare Population
- · Adults with Arthritis
- · Adults with Kidney Disease
- · Hyperlipidemia: Medicare Population
- · People 65+ Living Below Poverty
- Adults with a Healthy Weight
- · Workers who Walk to Work
- Adults who are Obese
- · Households with No Car and Low Access to a Grocery Store

#### **SECONDARY DATA**

The Chronic Disease and Wellness topic area encompasses five different topic areas: Diabetes, Cancer, Heart Disease & Stroke, Nutrition & Healthy Eating/ Physical Activity/Weight Status, and Other Conditions/Older Adults. The decision to combine these topic areas was based on how access to healthy foods, nutrition resources, and exercise opportunities can affect one's chronic disease status. This is of particular concern for older adults within the Tri-County Region and Sussex, DE.

Figure 37 shows the Percent of Adults with Diabetes by Zip Code. The darkest blue color indicates a higher percentage of adults with diabetes within that zip code. Compared to the Food Insecurity Index map (Figure 19), there is some overlap between zip codes with higher Food Insecurity Index values and diabetes rates. This overlap can be easily seen in 21817 (Somerset, MD) and 21851 (Wicomico, MD) along with some zip codes within western Sussex, DE. These general trends can also be seen for Adults Who Experienced a Stroke and Poor Physical Health Days (Figure 38 and Figure 39, respectively). The Percent of Adults with Cancer is higher for zip codes in western Sussex (Figure 40), which does not overlap with general trends seen in either the Food Insecurity Index or Health Equity Index. This could indicate different factors at play that affect cancer incidence, such as the higher population of older adults that reside in the most affected zip codes.

FIGURE 37: PERCENT OF ADULTS WITH DIABETES, BY ZIP CODE

FIGURE 38: ADULTS WHO EXPERIENCED A STROKE, BY ZIP CODE

FIGURE 39: POOR PHYSICAL HEALTH DAYS: 14+ DAYS

FIGURE 40: ADULTS WITH CANCER, BY ZIP CODE

People 65+ Living Below Poverty Level was identified as having a high disparity through the Index of Disparity (IoD) analysis. Of note, the IoD values for race/ethnicity were much higher than gender for this indicator. This could mean that differences seen by race/ethnicity is a greater contributor to disparities than gender for people 65+ living below poverty level. Figure 41 below shows the IoD value for race/ethnicity for each county for this indicator. As shown, Worcester, MD, saw a decrease in IoD values over time while Wicomico, MD, and Sussex, DE, remained stable over the same time period. These changes could indicate that there has not been much progress in addressing racial or ethnic disparities among older adults in poverty over these time periods. Older adults identifying as Black/African American, Hispanic/Latino, or Other Race have the highest poverty rates compared to other groups. Addressing disparities amongst older adults living in poverty could improve the overall health of the community, as disparate poverty levels can contribute to lack of healthcare access and higher rates of chronic disease, impacting cost of care for all.

### FIGURE 41: INDEX OF DISPARITY BY RACE/ETHNICITY FOR PEOPLE 65+ LIVING BELOW POVERTY LEVEL (AMERICAN COMMUNITY SURVEY, 2015-2019)

#### PRIMARY DATA

Chronic diseases were all mentioned as common health issues in the focus groups and key informant interviews. Some participants referred to the three health issues of Diabetes, Cancer, and Heart Disease as "the trifecta" citing them as the most common health issues affecting their community. Additionally, Nutrition & Healthy Eating, specifically Access to Healthy Foods, was mentioned in almost every key informant interview. Similarly, Physical Activity and Weight Status were cited frequently when discussing overall health and wellness, and commonly co-

#### SECTION 8 PRIORITIZED SIGNIFICANT HEALTH NEEDS

occurring with chronic conditions like Diabetes and Hypertension. Community survey respondents also ranked Nutrition & Healthy Eating as a top quality of life issue. Focus groups cited lower-income or impoverished areas having less access to healthy foods and being less likely to lead healthy lifestyles. Also mentioned was economic status, worsened by COVID-19, causing added stress and financial hardship which tend to exacerbate unhealthy habits.

People want a quick fix, not a lifestyle change. Stress plays so much into our ability to be healthy.

-Key informant

Another theme from primary data was older adults being more negatively impacted by topics previously mentioned such as: Access to Care, Social Isolation, Ability to Navigate the Healthcare System, and COVID-19. Additionally, this group is seen as more at risk and having worse health outcomes when it comes to issues like Mental Health, Hypertension, and certain Cancers. Older adults' ability to manage chronic disease via frequent doctor visits and/or medication management was made more challenging by the impacts of COVID-19.

GG

During COVID, the elderly population's challenge with lack of transportation, services out their area, providers speaking above their head. . . all worsened.

-Focus Group Participant

# NON-PRIORITIZED SIGNIFICANT HEALTH NEEDS

The following significant health needs, presented in alphabetical order, emerged from a review of the primary and secondary data. However, The Partnership will not focus directly on these topics in their Implementation Strategy/Community Health Improvement Plans. Several of the non-prioritized needs are related to the three primary priority areas, and implementation of activities under those priorities will have an indirect impact on many of these needs.

Key themes from community input are included where relevant for each non-prioritized health need along with the secondary data score and warning indicators.

### **3** NON-PRIORITIZED HEALTH NEED #1: HOMELESSNESS & UNSTABLE HOUSING

# Homelessness & Unstable Housing

### **Key Themes from Community Input**

- Ranked by respondents as the 2nd most pressing quality of life issue
- 48.8% of respondents disagreed or strongly disagreed that there are affordable places to live
- **8.5%** of respondents reported their current housing situation does not meet their needs

### PREVENTION & SAFETY

# Prevention & Safety

Secondary
Data Score:

1.84

### Warning Indicators

- Severe Housing Problems
- Pedestrian Injuries
- Death Rate due to Drug Poisoning
- Age-Adjusted Death Rate due to Unintentional Injuries

#### **3 NON-PRIORITIZED HEALTH NEED #3: ORAL HEALTH**

Oral Health \_\_\_\_\_

Secondary Data Score: 1

1.71

### Warning Indicators

- Adults who Visited a Dentist
- Adults with No Tooth Extractions
- Oral Cavity and Pharynx Cancer Incidence
- Adults 65+ with Total Tooth Loss
- Age-Adjusted ER Visit Rate due to Dental Problems

### **NON-PRIORITIZED HEALTH NEED #4:**CRIME & CRIME PREVENTION

# **Crime & Crime Prevention**

### **Key Themes from Community Input**

- Ranked by survey respondents as the top most pressing quality of life issue
- Subjects in this category included: robberies, shootings, and other violent crimes

**SECTION 10** 

## OTHER FINDINGS

Critical components in assessing the needs of a community are identifying barriers to and disparities in healthcare. Additionally, the identification of these will help inform and focus strategies for addressing prioritized health needs. We previously covered disparities in the Disparities and Health Equity section of this report. The following identifies barriers as they pertain to the Tri-County Region and Sussex County, DE.

#### **BARRIERS TO CARE**

Community health barriers were identified as part of the primary data collection. Community survey respondents, focus group participants, and key informants were asked to identify any barriers to healthcare observed or experienced in the community.

#### 10.1.1 TRANSPORTATION

Transportation was identified through this assessment as a major barrier to accessing health and social services in the Tri-County Region and Sussex County, DE. The geographic region is particularly rural which exacerbates the issues of access to healthcare providers and services, especially for low-income populations and older adults who already experience barriers to access. Focus group and key informant participants stressed how important an issue transportation is across the region. They specifically spoke about the lack of public transit options available. Additionally, 47.8% of community survey respondents disagreed or strongly disagreed that transportation is easily accessible if they needed it.

#### 10.1.2 COST, HEALTH LITERACY, CULTURAL/LANGUAGE BARRIERS

In general, accessing affordable healthcare was a common problem that was discussed due to several identified barriers. For community survey respondents that did not receive the care they needed, 30.6% selected cost as a barrier to seeking the care they needed, while 59.9% selected cost as a barrier to seeking dental or oral health services. Focus group participants and key informants were concerned that low-income community members do not have access to affordable healthcare providers or medications for certain disease management. Key informants added that even when health insurance or services may be available, health literacy issues and cultural/language barriers make seeking or continuing to seek care difficult, especially for older adults and immigrant populations.

# COVID-19 IMPACT SNAPSHOT

#### **10** INTRODUCTION

At the time that The Partnership began its collaborative CHA/CHNA process, they were in the midst of dealing with the novel coronavirus (COVID-19) pandemic.

The process for conducting the assessment remained fundamentally the same. However, there were some adjustments made during the primary data collection to ensure the health and safety of those participating.

#### **PANDEMIC OVERVIEW**

On March 13, 2020, a U.S. national emergency was declared over the novel coronavirus outbreak first reported in the Wuhan Province of China in December 2019. Officially named COVID-19 by the World Health Organization (WHO) in February, WHO declared COVID-19 a pandemic on March 11, 2020. Later that month, stay-at-home orders were placed by the Maryland and Delaware Governors and unemployment rates soared as companies were impacted and began mass layoffs.

Vaccinations were available to select groups of individuals starting in December 2020 and became more widely available to all adults in early 2021. Despite availability of vaccinations, new cases, hospitalizations, and deaths continue to occur throughout Maryland, Delaware, the U.S., and worldwide. Upon completion of this report in April 2022, the pandemic was still very much a health crisis across the United States and in most countries.

#### **Community Insights**

The CHNA project team researched additional sources of secondary data and gathered primary data to provide a snapshot of the impact of COVID-19 on the Tri-County Region and Sussex, DE. Findings are reported below.

# © COVID-19 CASES AND DEATHS IN THE TRI-COUNTY REGION OF MARYLAND AND SUSSEX COUNTY, DELAWARE

For current cases and deaths due to COVID-19 visit the Maryland Department of Health https://coronavirus.maryland.gov.

#### **W** UNEMPLOYMENT RATES

As expected, unemployment rates rose in April 2020 for all counties when stay-at-home orders were first in place. Illustrated in Figure 42 below, as counties began slowly reopening some businesses in May 2020, the unemployment rate gradually began to go down. As of mid-2021, unemployment rates have stabilized for the Tri-County Region and Sussex County, DE. When unemployment rates rise, there is a potential impact on health insurance coverage and healthcare access if jobs are lost include employer-sponsored healthcare.

FIGURE 42: UNEMPLOYMENT RATE (POPULATION 16+)

U.S. Bureau of Labor Statistics

#### **6** COMMUNITY FEEDBACK

The community survey, focus groups, and key informant interviews were used to capture insights and perspectives of the health needs of the Tri-County Region and Sussex County, DE. Included in these primary data collection tools were questions specific to COVID-19. Survey respondents were specifically asked about the biggest challenges their households were currently facing due to COVID-19. This question had the following answers from respondents:

- 55.5% Reported not knowing when the pandemic will end
- 42.0% Reported feeling nervous or anxious
- 27.6% Reported feeling alone/isolated
- 20.5% Reported challenges for my children attending school

Additionally, the information highlighted below summarizes insights from the focus groups and key informant interviews regarding the impact of COVID-19 on their community.

TABLE 7. COVID-19 PRIMARY DATA INSIGHTS

FOCUS GROUP INSIGHTS	KEY INFORMANT INSIGHTS
Parents concerned and stressed with children attending school, possibly getting sick, or schools closing; lack of chilcare services available or open	Local health departments and health services organizations experiencing burden with staffing shortages and in- turn negatively affects community need
Low-income families struggling to keep their homes and/or losing employment	Financial impact on local community has been significant
Patients whoe need routine healthcare or lab work are unable to get it; general access to care being worsened by closures or delays	Problems with testing coordination and availability; schools/students heavily affected
Misinformation; vaccination hesitancy/ confusion; conflicting information around vaccinations from healthcare professionals, especially for immigrant populations and older adults	Technology gap in immigrant communities specifically; lack of clear communication; hesitancy to trust/get vaccination

#### **®** SIGNIFICANT HEALTH NEEDS AND COVID-19 IMPACT

Each of the three prioritized health needs appeared to worsen throughout the duration of the COVID-19 pandemic according to information gathered through primary data as discussed in the Prioritized Health Needs section of this report.

#### 11.6.1 COVID-19 IMPACT SNAPSHOT DATA SOURCES

As local, state, and national data are updated and become available, these data can continue to help inform approaches to meeting existing and developing needs related to the pandemic. Recommended data sources for the Tri-County Region in MD and Sussex County, DE, are included here:

#### **National Data Sources**

Data from the following national websites are updated regularly and may provide additional information into the impact of COVID-19:

- United States National Response to COVID-19 <a href="https://www.usa.gov/coronavirus">https://www.usa.gov/coronavirus</a>
- Centers for Disease Control and Prevention: <a href="https://www.cdc.gov/">https://www.cdc.gov/</a>
- U.S. Department of Health and Human Services: <a href="https://www.hhs.gov/">https://www.hhs.gov/</a>
- Centers for Medicare and Medicaid: https://www.cms.gov/
- U.S. Department of Labor: <a href="https://www.dol.gov/coronavirus">https://www.dol.gov/coronavirus</a>
- Johns Hopkins Coronavirus Resource Center: https://coronavirus.jhu.edu/us-map
- National Association of County and City Health Officials: <a href="https://www.naccho.org/">https://www.naccho.org/</a>
- Feeding America (The Impact of the Coronavirus on Food Insecurity): https://www.feedingamerica.org/

#### **Maryland and Delaware State Data Sources**

Data from the following websites are updated regularly and may provide additional information into the impact of COVID-19:

- Maryland Department of Health: https://health.maryland.gov
- Somerset County Health Department: <a href="https://somersethealth.org/">https://somersethealth.org/</a>
- Wicomico County Health Department: <a href="https://www.wicomicohealth.org/">https://www.wicomicohealth.org/</a>

**SECTION 12** 

### CONCLUSION

This collaborative Community Health Needs Assessment (CHNA) provided a comprehensive picture of health in the Tri-County Region and Sussex County, DE. This report helps meet IRS requirements of TidalHealth as a non-profit health system and is part of the essential services of local public health departments based on standards by the Public Health Accreditation Board.

This assessment was completed through a collaborative effort that integrated the CHNA process of the two TidalHealth hospitals and the two local health departments in Somerset County and Wicomico County. This group partnered with Conduent Healthy Communities Institute to conduct this 2022 CHNA.

This process was used to determine the 12 significant health needs in the Tri-County Region and Sussex, DE. The prioritization process identified three top health needs: Access and Health Equity, Behavioral Health (including Mental Health and Alcohol & Drug Use), and Chronic Disease and Wellness (including Diabetes, Cancer, Heart Disease and Stroke, Nutrition & Healthy Eating/Physical Activity/Weight Status, and Other Conditions/Older Adults).

The findings in this report will be used to guide the development of the TidalHealth hospitals' Implementation Strategy Plans as well as the health departments' Community Health Improvement Plans (CHIP), which will outline strategies to address identified priorities and improve the health of the community.

#### SECTION 13

## APPENDICES SUMMARY

# SECONDARY DATA METHODOLOGY AND DATA SCORING TABLES, SOCIONEEDS INDEX® SUITE METHODOLOGIES

A detailed overview of the Conduent HCI Data Scoring methodology and indicator scoring results from the secondary data analysis. This section also includes the Index of Disparity methodology and the methodologies for the Health Equity Index, Food Insecurity Index, and Mental Health Index.

#### PRIMARY DATA ASSESSMENT TOOLS (COMMUNITY INPUT)

Quantitative and qualitative community feedback data collection tools that were vital in capturing community feedback during this collaborative CHNA:

- · Community Survey
- Focus Group Guide
- Key Informant Interview Questions

### © COMMUNITY RESOURCES/POTENTIAL COMMUNITY PARTNERS

This document highlights existing resources that organizations are currently using and available widely in the community. Additionally, this lists potential community partners who were identified in the qualitative data collection process for this CHNA.

#### **D** 2019-2022 IMPLEMENTATION STRATEGY PLAN/CHIP

This document is the strategic plan shared by TidalHealth and Somerset & Wicomico County Health Departments as their actionable plan following their previous CHNA.

#### APPENDIX A

# SECONDARY DATA METHODOLOGY

#### **SECONDARY DATA SOURCES**

The main source for the secondary data, or data that has been previously collected, is the TidalHealth Community Health Research and Data platform, a publicly available data platform that is maintained by the partnership and Conduent Healthy Communities Institute.

The following is a list of both local and national sources for which data is maintained for the Tri-County Region and Sussex County, DE on the community health research and data platform.

- American Community Survey
- Annie E. Casey Foundation
- CDC PLACES
- Centers for Disease Control and Prevention
- Centers for Medicare & Medicaid Services
- County Health Rankings
- Feeding America
- Healthy Communities Institute
- Maryland Behavioral Risk Factor Surveillance System
- Maryland Department of Health
- Maryland Department of the Environment
- Maryland Governor's Office for Children
- Maryland Governor's Office of Crime Control & Prevention
- · Maryland State Board of Elections
- Maryland State Department of Education
- Maryland Youth Risk Behavior Survey/Youth Tobacco Survey
- National Cancer Institute
- National Center for Education Statistics
- National Environmental Public Health Tracking Network
- U.S. Bureau of Labor Statistics
- U.S. Census County Business Patterns
- U.S. Census Bureau Small Area Health Insurance Estimates
- U.S. Department of Agriculture Food Environment Atlas
- United For ALICE
- · Delaware Department of Health and Social Services, Division of Public Health
- Delaware Office of the State Election Commissioner
- Delaware School Survey
- Delaware Youth Risk Behavior Survey
- Behavioral Risk Factor Surveillance System

#### **SECONDARY DATA SCORING**

#### SECONDARY DATA SCORING DETAILED METHODOLOGY

Data Scoring is done in three stages:

For each indicator, each county within the Tri-County Region and Sussex County, DE is assigned a score based on its comparison to other communities, whether health targets have been met, and the trend of the indicator value over time. These comparison scores range from 0-3, where 0 indicates the best outcome and 3 the worst. Availability of each type of comparison varies by indicator and is dependent upon the data source, comparability with data collected for other communities, and changes in methodology over time.

Indicators are categorized into topic areas and each topic area receives a score. Indicators may be categorized in more than one topic area. Topic scores are determined by the comparisons of all indicators within the topic.

#### Comparison to a Distribution of County Values: Within State and Nation

For ease of interpretation and analysis, indicator data on the Community Dashboard is visually represented as a green-yellow-red gauge showing how the community is faring against a distribution of counties in the state or the United States. A distribution is created by taking all county values within the state or nation, ordering them from low to high, and dividing them into three groups (green, yellow, red) based on their order. Indicators with the poorest comparisons ("in the red") scored high, whereas indicators with good comparisons ("in the green") scored low.

#### Comparison to Values: State, National, and Targets

The county is compared to the state value, the national value, and target values. Targets values include the nation-wide Healthy People 2030 (HP2030) goals. Healthy People 2030 goals are national objectives for improving the health of the nation set by the Department of Health and Human Services' (DHHS) Healthy People Initiative. For all value comparisons, the scoring depends on whether the county value is better or worse than the comparison value, as well as how close the county value is to the target value.

#### **Trend Over Time**

The Mann-Kendall statistical test for trend was used to assess whether the county value is increasing over time or decreasing over time, and whether the trend is statistically significant. The trend comparison uses the four most recent comparable values for the county, and statistical significance is determined at the 90% confidence level. For each indicator with values available for four time periods, scoring was determined by direction of the trend and statistical significance.

#### **Missing Values**

Indicator scores are calculated using the comparison scores, availability of which depends on the data source. If the comparison type is possible for an adequate proportion of indicators on the community dashboard, it will be included in the indicator score. After exclusion of comparison types with inadequate availability, all missing comparisons are substituted with a neutral score for the purposes of calculating the indicator's weighted average. When information is unknown due to lack of comparable data, the neutral value assumes that the missing comparison score is neither good nor bad.

#### **Indicator Scoring**

Indicator scores are calculated as a weighted average of all included comparison scores. If none of the included comparison types are possible for an indicator, no score is calculated and the indicator is excluded from the data scoring results.

#### **Topic Scoring**

Indicator scores are averaged by topic area to calculate topic scores. Each indicator may be included in up to three topic areas if appropriate. Resulting scores range from 0-3, where a higher score indicates a greater level of need as evidenced by the data. A topic score is only calculated if it includes at least three indicators.

#### INDEX OF DISPARITY

The Index of Disparity (IoD) identified large disparities based on how far each subgroup (by race/ethnicity or gender) is from the overall county value. This analysis provides a percent value, based on the absolute difference from the overall value for each breakout category in a subgroup, which is a summary of how different each subgroup is from the overall value. For example, Figure 1A shows an example of Age-Adjusted Death Rate due to Suicide by Gender. Most often, gender (the subgroup) has two breakout categories: male and female. First, the IoD sums

the absolute difference between the male value and the overall county value and the difference between the female value and the overall value, divided by the overall county value to get a percent. In this case, the IoD is 50.2% for gender. This would be completed for race/ethnicity, which typically has more breakout categories available. Finally, those IoD values for gender and race/ethnicity can be compared to see where disparities may exist, and which groups are driving those disparities. When available, the IoD value can be used to show if progress has been made in addressing disparities over time.

FIGURE 1A. EXAMPLE OF IOD CALCULATION: AGE-ADJUSTED DEATH RATE DUE TO SUICIDE, BY GENDER

For this analysis, indicators with a high disparity were identified. This means that the IoD values for either race or gender for the indicator were in the top twenty-five percent of all index values for all available indicators. IoD values were tracked over time, when available, for indicators within the top health needs identified with the Data Scoring Tool. These findings are shown alongside relevant secondary data throughout this report.

#### **HEALTH EQUITY INDEX**

Every community can be described by various social and economic factors that can contribute to disparities in health outcomes. Conduent HCl's Health Equity Index (formerly SocioNeeds Index) considers validated indicators related to income, employment, education, and household environment to identify areas at highest risk for experiencing health inequities.

#### How is the index value calculated?

The national index value (from 0 to 100) is calculated for each zip code, census tract, and county in the U.S. Communities with the highest index values are estimated to have the highest socioeconomic needs correlated with preventable hospitalizations and premature death.

#### What do the ranks and colors mean?

Ranks and colors help to identify the relative level of need within a community or service area. The national index value for each location is compared to all other similar locations within the community area to assign a relative rank (from 1 to 5) locally. These ranks are used to color the map and chart for the Health Equity Index, with darker coloring associated with higher relative need.

#### **FOOD INSECURITY INDEX**

Every community can be described by various health, social, and economic factors that can contribute to disparities in outcomes and opportunities to thrive. Conduent HCl's Food Insecurity Index considers validated indicators related to income, household environment, and wellbeing to identify areas at highest risk for experiencing food insecurity.

#### How is the index value calculated?

The national index value (from 0 to 100) is calculated for each zip code, census tract, and county in the U.S. Communities with the highest index values are estimated to have the highest food insecurity, which is correlated with household and community measures of food-related financial stress such as Medicaid and SNAP enrollment.

#### What do the ranks and colors mean?

Ranks and colors help to identify the relative level of need within a community or service area. The national index value for each location is compared to all other similar locations within the community area to assign a relative rank (from 1 to 5) locally. These ranks are used to color the map and chart for the Food Insecurity Index, with darker coloring associated with higher relative need.

#### **MENTAL HEALTH INDEX**

Every community can be described by various health, social, and economic factors that can contribute to disparities in mental health outcomes. Conduent HCl's Mental Health Index considers validated indicators related to access to care, physical health status, transportation, employment, and household environment to identify areas at highest risk for experiencing poor mental health.

#### How is the index value calculated?

The national index value (from 0 to 100) is calculated for each zip code, census tract, and county in the U.S. Communities with the highest index values are estimated to have the highest socioeconomic and health needs correlated with self-reported poor mental health.

#### What do the ranks and colors mean?

Ranks and colors help to identify the relative level of need within a community or service area. The national index value for each location is compared to all other similar locations within the community area to assign a relative rank (from 1 to 5) locally. These ranks are used to color the map and chart for the Mental Health Index, with darker coloring associated with higher relative need.

#### APPENDIX B

# PRIMARY DATA ASSESSMENT TOOLS (COMMUNITY INPUT)

### **KEY INFORMANT INTERVIEW QUESTIONS**

- 1. To begin, could you please tell us a little about the organization you work for and the geographic location it serves?
- 2. COVID-19 has significantly impacted everyone's lives. Through that lens, what have you seen as the biggest challenges in [Somerset, Wicomico, Worcester, Sussex] County during the pandemic?
- 3. Now, we would appreciate your perspective on the current health needs or issues faced by people living in [Somerset, Wicomico, Worcester, Sussex] County. In your opinion, what are the top health issues affecting residents of your community?
- 4. What do you think are the leading factors that contribute to these health issues?
- 5. Which groups (or populations) in your community seem to struggle the most with the health issues that you've identified?
  - a. Are there specific challenges that impact <u>low-income</u>, <u>under-served/uninsured</u>, <u>racial or ethnic groups</u>, <u>age or gender groups</u> in the community?
  - b. How does it impact their lives?
- 6. What geographic parts of the county/community have greater health or social need?
  - a. Which neighborhoods in your community need additional support services or outreach?
- 7. What do you think needs to be done to better address these health needs you've identified?
- 8. What barriers or challenges might prevent someone in the community from accessing health care or social services?
- 9. Could you tell us about some of the strengths and resources in your community that address these issues, such as groups, partnerships/initiatives, services, or programs?
  - a. What services or programs could potentially have an impact on the needs that you've identified, if not yet in place?
- 10. Is there anything additional that should be considered for assessing the needs of the community?

#### **COMMUNITY SURVEY TOOLS**

TidalHealth and Somerset & Wicomico Health Depts. Community Health Survey 2021

Welcome to this collaborative effort for the TidalHealth and Somerset & Wicomico Health Departments community health survey. The information collected in this survey will allow community organizations across the counties of Somerset, Wicomico, and Worcester, MD and Sussex, DE to better understand the health needs in your community. The knowledge gained will be used to implement programs that will benefit everyone in the community. We can better understand community needs by gathering the voices of community members like you to tell us about the issues that you feel are most important.

REMINDER: You must be 18 years old or older to complete this survey. We estimate that it will take 10 minutes to complete. Survey results will be available and shared broadly in the community within the next year. The responses that you provide will remain anonymous and not attributed to you personally in any way. Your participation in this survey is completely voluntary. If you have any questions, please contact Kat Rodgers by email at katherine.rodgers@tidalhealth.org. Thank you very much for your input and your time!

TidalHealth and Somerset & Wicomico Health Depts. Community Health Survey 2021

### **Demographic Information**

Please answer a few questions about yourself so that we can see how different types of people feel about local health issues.

2. Are you of Hispanic or Latino origin or des	scent? Select one.
Hispanic/Latino/Latinx	
Non-Hispanic/Latino/Latinx	
Prefer not to answer	
Which of the following best describes you	? Select one.
American Indian or Alaskan Native	Native Hawaiian or other Pacific Islander
Asian or Asian American	White or Caucasian
Black or African American	Two or more races
Haitian	Prefer not to answer

4. What is your age? Select one.					
Under 18 18-20 2	21-24 25-34 35-44 45-5	54 55-64 65-74			
75-84 85 or older	Prefer not to answer				
5. To which gender identity do you Female Male Transgender Female Other identification (optional): If you	u most identify? Select one.  Transgender M  Gender Non-co  Prefer not to an  u feel comfortable doing so, please indicate wha	onforming			
6. What is the highest level of education of the Did not attend school  Less than 9th Grade  Some High School, No Diploma	High School Graduate, Diploma or the equivalent (GED)  Associate Degree  Bachelor's Degree	e.  Master's Degree  Professional Degree  Doctorate Degree			
7. How much total combined money did all members of your household earn in the previous year? Select one.					
Less than \$15,000	\$75,000 to \$99,999	\$250,000 to \$499,999			
\$15,000 to \$24,999	\$100,000 to \$124,999	\$500,000 or more			
\$25,000 to \$34,999	\$125,000 to \$149,999	Prefer not to answer			
\$35,000 to \$49,999	\$150,000 to \$199,999				
\$50,000 to \$74,999	\$200,000 to \$249,999				
8. What language do you mainly speak at home? Select one.					
Arabic	French	Vietnamese			
Creole	Korean				
English	Spanish				
Some other language (please spec	cify)				

9. Do you identify with any of the following	owing statements? Select all that ap	ply.
I have a disability		
I am active duty Military		
I am retired Military		
I am a Veteran		
I am an immigrant or refugee		
Prefer not to answer		
I do not identify with any of these		
10. Including yourself, how many peo	pple currently live in your household	?
<u> </u>	3	More than 4
<u>2</u>	<u>4</u>	
TidalHealth and Somerset & Wid	comico Health Depts. Communi	ty Health Survey 2021
ommunity Health		
this survey, "community" refers to ervices.	the major areas where you live, s	hop, play, work, and get
* 11. How would you rate your comm	unity as a healthy place to live? Sel	ect one.
Very Unhealthy	Somewhat Healthy	Very Healthy
Unhealthy	Healthy	

* 12. In the following list, what do you think are the thre (Those problems that have the greatest impact on over	ee most important "health problems" in your community? rall community health.) Select up to 3.
(Those problems that have the greatest impact on over Access to Affordable Health Care Services (doctors available nearby, wait times, services available nearby, takes insurance)  Adolescent Health Alcohol and Drug Use Auto Immune Diseases (multiple sclerosis, Crohn's disease, etc.)  Cancer Children's Health Chronic Pain Diabetes Family planning services (birth control) Heart Disease and Stroke	rall community health.) Select up to 3.  Mental Health and Mental Disorders (anxiety, depression, suicide)  Nutrition and Healthy Eating  Older Adults (hearing/vision loss, arthritis, etc.)  Oral Health and Access to Dentistry Services (dentists available nearby)  Physical Activity  Quality of Health Care Services Available  Respiratory/Lung Diseases (asthma, COPD, etc.)  Sexually transmitted diseases/infections (STDs/STIs)  Tobacco Use (including e-cigarettes, chewing tobacco, etc.)  Weight Status (Individuals who are Overweight or Obese)  Women's Health (ex: mammogram, pap exam)
Maternal and Infant Health  Other (please specify)  * 13. In your opinion, which of the following would you to 2	most like to see addressed in your community? Select
up to 3.  Access to higher education (2-year or 4-year degrees)  Air and water quality  Bike lanes  Crime and Crime Prevention (robberies, shootings, other violent crimes)  Disability accessible sidewalks and other structures  Discrimination or inequity based on race/ethnicity, gender, age, sex.  Domestic Violence and Abuse (intimate partner, family, or child abuse)  Economy and job availability  Education and schools (Pre-K to 12th grade)  Emergency Preparedness  Other (please specify)	Inequity in jobs, health, housing, etc. for underserved populations  Food insecurity or hunger  Homelessness and unstable housing  Injury Prevention (traffic safety, drownings, bicycling and pedestrian accidents)  Nutrition and Healthy Eating (restaurants, stores, or markets)  Parks and walking paths  Senior services (over 65)  Social isolation/feeling lonely  Support for families with children (childcare, parenting support)  Transportation
Oniei (piease specify)	

14. Below are some statements about health care services in your community. Please rate how much you agree or disagree with each statement. Select an option for your response in each row below.

	Strongly Agree	Agree	Feel Neutral	Disagree	Strongly Disagree
I am connected to a primary care doctor or health clinic that I am happy with.	0		0	0	
I can access the health care services that I need within a reasonable time frame and distance from my home or work.	0	$\circ$		0	
I know where to find the health care resources or information I need when I need them.	0	0	0	0	0
There are good quality health care services in my community.	$\bigcirc$	$\bigcirc$	$\circ$	$\circ$	
There are affordable health care services in my community.	0		0	0	
Individuals in my community can access healthcare services regardless of race, gender, sexual orientation, immigration status, etc.	0		0	0	0
* 15. How would you	u rate vour own pe	rsonal health in	the past 12 months	s? Select one.	
Very Unhealthy	, ,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,		Healthy		
Unhealthy			Very Healthy		
Somewhat Health	ny				
16. Do you currently have a health insurance plan/health coverage? Select one.  Yes  No  I don't know

# Community Health Improvement Plan

for Somerset County Health Department and Wicomico County Health Department

Fiscal Year 2022 Plan Update

#### 2019 – 2022 Implementation Strategy Plan

for TidalHealth Peninsula Regional and

#### **Community Health Improvement Plan**

for Somerset County Health Department and Wicomico County Health Department

#### Fiscal Year 2022 Plan Update

The 2019 – 2022 plan has been updated for Fiscal Year 2022 (July 1, 2021 – June 30, 2022).

- Several program activities and evaluation measures have been updated.
- A summary of FY20 and FY21 progress is provided in Appendices A and B.
- The document reflects the name change of Peninsula Regional Medical Center (PRMC) to TidalHealth Peninsula Regional. In January 2020, PRMC was re-branded to reflect the merge with McCready Health in Crisfield and Nanticoke Memorial in Seaford.
- The internal team staff members identified for TidalHealth Peninsula Regional, Somerset County Health Department, and Wicomico County Health Department has been updated to reflect staff changes.

#### Introduction

TidalHealth Peninsula Regional, in partnership with Somerset County Health Department (SCHD), and Wicomico County Health Department (WiCHD) is pleased to share their Implementation Strategy Plan, which follows the development of the 2019 Community Health Needs Assessment (CHNA). In accordance with requirements in the Affordable Care Act and IRS 990 Schedule H requirements, this plan was approved by the TidalHealth Peninsula Regional Board of Directors on November 7, 2019. This document also serves as the Community Health Improvement Plan for the health departments and was approved by the Somerset Local Health Improvement Coalition (LHIC) on November 12, 2019, and approved by the Wicomico LHIC on December 6, 2019.

After a thorough review of the health status in our community through the Community Health Needs Assessment (CHNA), we identified areas that we could address using our resources, expertise, and community partners.

The following are the prioritized health needs that will be addressed:

- Behavioral Health (Mental Health and Mental Disorders as well as Substance Abuse)
- Diabetes
- Cancer (Focus Areas: Breast, Colorectal, Cervical, Lung, Skin)

Each priority area selected, will also address access to care when possible and appropriate.

This Implementation Strategy summarizes the plans for TidalHealth Peninsula Regional, SCHD, and WiCHD to develop and/or collaborate on community benefit programs that address the prioritized health needs identified in the 2019 CHNA.

TidalHealth Peninsula Regional provides additional support for community benefit activities in the community that lay outside the scope of the programs and activities outlined in this Implementation Strategy. However, those additional activities will not be explored in detail in this document.

Additionally, this document includes the significant health needs that the partnership will not be addressing and why.

#### TidalHealth Peninsula Regional, SCHD, and WiCHD

TidalHealth Peninsula Regional is the 8th largest hospital in Maryland with 288 acute care beds, and the region's largest, most advanced tertiary care facility, which has been meeting the healthcare needs of

Delmarva Peninsula residents since 1897. Its 3,300 physicians, staff, and volunteers provide safe, compassionate, and affordable care designed to exceed the expectations of the nearly 500,000 patients who rely on the Medical Center team each year for inpatient, outpatient, diagnostic, sub-acute and emergency/trauma services. It is the region's oldest healthcare institution with the most experienced team of healthcare professionals. It also infuses over \$500 million annually into its regional economy, and is the recipient of over 125 national awards, recognitions, and certifications in the past half-decade for the care it offers patients and the outcomes they experience.

Somerset County Health Department's (SCHD) mission is "Dedicated to serving the Public by preventing illness, promoting wellness and protecting the health of our community." The Health Department continues to evolve with the changes in the healthcare system and is currently in the planning stage of the Public Health Accreditation process.

Wicomico County Health Department's (WiCHD) mission is "To maximize the health and wellness of all members of the community through collaborative efforts." The public health department, accredited by the Public Health Accreditation Board on March 8, 2016, has expanded over the years to meet changing needs of the community and continually works toward protecting the health and environment of the people of Wicomico County.

TidalHealth Peninsula Regional, SCHD, and WiCHD service areas are jointly defined by Somerset, Wicomico, and Worcester counties in the state of Maryland. These three counties are referred to as the Tri-County Service Area. Additionally, the service area includes the 43 zip codes and associated census places and census tracts within those three counties.

#### **Community Health Needs Assessment**

In December 2018, TidalHealth Peninsula Regional, SCHD, and WiCHD published their 2019 Community Health Needs Assessment (CHNA). The CHNA Report provides an overview of significant health needs in the Tri-County Service Area. This CHNA report was developed to provide an overview of the health needs in the Tri-County Service Area, including Somerset, Wicomico, and Worcester counties in Maryland. TidalHealth Peninsula Regional, SCHD, and WiCHD partnered with Conduent Healthy Communities Institute (HCI) to conduct the CHNA. The goal of this report is to offer a meaningful understanding of the greatest health needs across the Tri-County Service Area, as well as to guide planning efforts to address those needs. Special attention has been given to identify health disparities, needs of vulnerable populations, unmet health needs or gaps in services, and input from the community.

The CHNA findings are drawn from an analysis of an extensive set of secondary data (over 100 indicators from national and state data sources) and in-depth primary data from community health leaders and organizations that serve the community at large, as well as non-health professionals and community members. The main source for the secondary data, or data that has been previously collected, is the TidalHealth Creating Healthy Communities platform, a publicly available data platform that is embedded on the main TidalHealth Peninsula Regional website. That platform can be found here: <a href="https://www.tidalhealth.org/community-outreach-partners/community-health-research-data/creating-healthy-communities">https://www.tidalhealth.org/community-outreach-partners/community-health-research-data/creating-healthy-communities</a>.

#### **Priorities**

On October 24, 2018, TidalHealth Peninsula Regional, SCHD and WiCHD came together to prioritize the significant health needs in a session facilitated by Conduent HCI consultants. Using a prioritization matrix, participants voted on the most critical needs while considering the following criteria:

- Importance of problem to the community
- Alignment with Maryland SHIP 2017 objectives
- Opportunity for partnership
- Addresses disparities of subgroups
- Existing resources/programs to address the problem

The following three topics were selected as the top priorities:

- Behavioral Health (Mental Health and Mental Disorders as well as Substance Abuse)
- Diabetes
- Cancer (Focus Areas: Breast, Colorectal, Cervical, Skin)

Each priority area selected, will also address access to care when possible and appropriate.

No one organization can address all the health needs identified in its community. TidalHealth Peninsula Regional, SCHD, and WiCHD are committed to serving the community by adhering to their mission, and using their skills, expertise, and resources to provide a range of community

benefit programs. This Implementation Strategy does not include specific plans to address other significant health needs including: Older Adults & Aging, and Oral Health.

These needs were not selected because they did not meet the prioritization criteria as strongly as the selected topics. TidalHealth Peninsula Regional, SCHD, and WiCHD have other programs in these areas, but they are not the focus of this report.

#### **Implementation Strategy Design Process**

In April 2018, TidalHealth Peninsula Regional contracted with Conduent HCI to facilitate the Implementation Strategy process. TidalHealth Peninsula Regional, SCHD, and WiCHD assembled an internal team and created an inventory of existing programs in the chosen priority areas. Conduent HCI reviewed the inventory for those with an evidence base and those most applicable for community benefit. Conduent HCI also conducted research into additional evidence-based programs for consideration by the internal team. As a result, TidalHealth Peninsula Regional, SCHD, and WiCHD are committed to a portfolio of new and existing programs to create positive change for the prioritized health needs of their community.

#### TidalHealth Peninsula Regional, SCHD, and WiCHD Internal Team

Stakeholder	Organization/Title

#### **Priority Areas**

#### **Behavioral Health**

**Goal 1:** Address behavioral issues in the Tri-County Service Area by reducing the instances of opioid-related deaths.

#### **Strategies:**

- Collaboratively address the opioid crisis in the Tri-County Service Area with an emphasis on prevention, treatment, resources, and enforcement.
- Provide peer support for people who have overdosed or sought help for opioid addiction issues.

**Goal 2:** Address behavioral health issues in the Tri-County Service Area by prioritizing programs and services for seniors suffering with minor to major depression.

#### **Strategies:**

 Address depression in adults 50 years or older through skill building, problem solving, and socialization activities.

#### **Objectives and Anticipated Impact for Goal 1:**

- Work collaboratively to address policy, develop education, and raise community awareness in the fight against opioid use and continue to reduce instances of heroin overdose each year.
  - Evaluation Measures for Somerset County Opioid United Team
    - # of individuals exposed to opioid related messaging through an advertising "campaign." Target - 7,000
    - # of individuals attending community events held in schools. Target 600
    - # of individuals attending educational/training events held in the community. Target - 1500
    - # of additional officer hours dedicated to opioid related calls and initiative. Target - 480
    - % of overdose cases shared by Law Enforcement with the Health Department. Target - 100%
    - # of individuals referred to Peer Recovery Support Specialists (PRSS) from Law Enforcement. Target – 30
    - # of resource cards given to Law Enforcement Officers to disseminate to overdose patients, families, friends, and the community. 2000
    - # of individuals referred to PRSS from Emergency Department. Target 20
    - # of individuals referred to PRSS from Law Enforcement. Target 30.

- # of individuals referred to treatment by PRSS. Target -25.
- # of Individuals referred to treatment by PRSS who were admitted to treatment.
   Target 15

#### Evaluation Measures for Wicomico County Opioid Intervention Team

- # of OIT meetings held. Target- 25
- # of community events where Opioid Coordinator was present and providing education to the community. Target- 10
- # of Local Overdose Fatality Review Team (LOFRT) meetings attended-Target-10
- # of individuals who attend CE (continuing education) trainings planned by OIT Coordinator- Target- 100
- # of individuals exposed to messaging via tv, radio, or social media Target- 60,000
- # of times the OIT Educational Trailer is deployed in FY21 Target-10
- # of Medication Disposal Bags provided to community members. Target-150
- #of individuals provided education via OIT trailer- Target- 500
- # of first responders who attended dinner and received education-Target-75
- Utilizing the Community Outreach Addictions Team (C.O.A.T.), contact and provide linkage to treatment and other support services to community members dealing with substance abuse issues.

#### Evaluation Measures

- # of contact attempts
- # of opioid users contacted
- # linked to treatment
- % of those who receive treatment and remain in recovery for 6 months and beyond
- # supported through navigation services (increase access to insurance, primary care physicians, and social service benefits)Reduce avoidable or preventable Emergency Department (ED) Utilization

#### Evaluation Measures for SWIFT

- # of patients served
- Pre/Post analysis of hospital utilization for recipients of SWIFT

#### **Objectives and Anticipated Impact for Goal 2:**

- Reduce the instances of depression in older adults through outreach and access to an
  evidence-based intervention program. Increase percent of program participants with a
  significant reduction of depression above the 2018 baseline of 50%
  - Evaluation Measures
    - # of community members enrolled
    - % of enrollees with reduction in level of depression maintained over 12 months

 % of enrollees achieving remission of depression symptoms for at least 6 months

\_

- Increase Access to Care for Smith Island.
  - Evaluation Measures for Smith Island:
    - # patients served
    - # Medication refills
    - # of telehealth visits
    - # Office visits
    - # labs
    - # community BP
    - Pre/Post analysis of ED utilization for residents of Smith Island.

#### **Recommended Policy Change:**

- Align and integrate prevention and treatment efforts among public and private agencies.
- Design communications that help people understand detection, management, and decreased stigma of mental illness and their associated risk factors.

#### **TidalHealth Peninsula Regional Resource Contributions:**

- TidalHealth Peninsula Regional staff
- Data Collection
- Vehicles/Transportation
- Phone Service
- Staff training and materials as needed

#### **Alignment Opportunities:**

- TidalHealth Peninsula Regional as part of a regional partnership with Atlantic General Hospital in Worcester County, Worcester County Health Department, and SCHD and WiCHD are collaborating with the Maryland Health Service Cost Review Commission to develop a regional approach to behavioral health. The planning for the crisis stabilization center began in fiscal 2021. A 23-hour center will be located in Salisbury and an additional site will be located in Berlin with limited hours.
- The health departments and hospitals are also collaborating on a "Hub and Spoke" grant focusing on primary care offices that assist patients in initiating medication assisted treatment. This grant award continues through September 2024. WiCHD Strategic Plan 2017-2022, Priority #1: Improve community health and wellness by focusing on priority areas identified in collaboration with the Local Health Improvement Coalition: chronic disease and behavioral health. Increasing access to care will be addressed in the priority areas.

#### **Programs to Address Behavioral Health**

1. Community Outreach Addictions Team (C.O.A.T.)

TidalHealth Peninsula Regional and WiCHD will build off the successful efforts that were included for this program in their 2016 Implementation Strategy Plan

#### **Activities:**

- Train peer support specialists
- Provide phone and in-person support for people who have overdosed or who struggle with opioid addiction, as well as other substance abuse issues
- Provide connections to resources including treatment options
- Provide peer outreach to high risk areas of the community
- Maintain ongoing communications about metrics between TidalHealth Peninsula Regional and C.O.A.T. team
- Evaluate expansion to Somerset County
- Collaborate with TidalHealth Peninsula Regional to meet with any patient, 24/7, who
  has overdosed; C.O.A.T. will address barriers to treatment, such as insurance,
  transportation, etc.

#### **Program Owner:**

Wicomico County Health Department

#### **Program Collaborators:**

- TidalHealth Peninsula Regional
- Somerset County Health Department
- Hudson Health Services, Inc.
- Lower Shore Clinic, Inc.
- Wicomico County Sheriff's Department
- Tri-County community Primary Care Physicians
- Law Enforcement
- EMS
- Office of the State's Attorney General
- Numerous other community providers assist with resources and access to program services

#### 2. Wicomico County Opioid Intervention Team and Somerset County Opioid United Team

#### Activities:

- Bring awareness, education, and resources to the community to work toward reducing the stigma associated with addiction and substance use disorders.
- Provide OIT partners and stakeholders with continuing education opportunities, which include Harm Reduction focused trainings, with the ability to obtain continuing education credits.
- Target awareness activities and campaigns for the community, which will include a community event.

- Participation in drug awareness coalitions and other community meetings that seek to address the opioid epidemic.
- Provide education to the general community via the OIT educational trailer. This is a
  mock teenage bedroom set up to show possible red flags for unhealthy behavior and/or
  substance use.
- Coordinate and host first responder dinner to help address compassion fatigue among the first responder population.
- Work with community partners to coordinate the Go Purple Substance Misuse Awareness Campaign

#### **Program Owners:**

- Wicomico County Health Department
- Somerset County Health Department

#### **Program Collaborators:**

- TidalHealth Peninsula Regional

#### 3. Program to Encourage Active and Rewarding Lives (PEARLS)

#### **Activities:**

- Raise awareness of this free program through targeted outreach to clinicians caring for older adults, as well as senior centers and other local organizations serving older community members
- Provide engaging and impactful curriculum in an easy-to-learn approach through flexible one-on-one visits at locations convenient for the community member being served

#### **Program Owner:**

• TidalHealth Peninsula Regional

#### **Program Collaborators:**

- MAC, Inc.
- 4. SWIFT

#### **Activities:**

- SWIFT—a mobile integrated health team makes home-based visits to individuals utilizing 911 at least five times over a six-month period for non-life-threatening medical reasons. The team provides physical, mental, and safety assessments, and screens for social determinants of health. Based on their assessment, patients are referred for appropriate care interventions such as primary care providers, medical specialists, inhome providers, financial and social resources, as well as other community resources as necessary.
- Update for FY2022 The SWIFT program is expanding to a wider radius in Wicomico County outside of Salisbury. Additionally, an expanded model for SWIFT launched August 2021 in which a TidalHealth nurse practitioner and fire department paramedic respond in real time to low acuity 911 calls.
- TidalHealth is partnering with Salisbury University to distribute Narcan and provide Narcan training through the Community Wellness and SWIFT programs.

#### **Program Owner:**

• TidalHealth Peninsula Regional Program

#### **Collaborators:**

- City of Salisbury
- Wicomico County Health Department

# 5. Smith Island Primary Care and Telemedicine Access Activities:

 TidalHealth provides primary care in person and via telemedicine to residents of Smith Island. A nurse practitioner and/or physician, pharmacist and other health care providers and educators travel to the island by boat throughout the year. A medical assistant is a resident of the island and provides health outreach and education as well as coordinates in person and telemedicine visits with the providers.

#### **Diabetes**

**Goal:** Improve health of people with diabetes or pre-diabetes in the Tri-County Service Area.

#### **Strategies:**

- Offer Evidence-Based Chronic Disease Self-Management Classes (CDSM) throughout the Tri-County Service Area.
- Expand access to diabetes screening, education, and resources throughout the TriCounty Service Area through the TidalHealth mobile Community Wellness program.
- Provide a free evidenced-based weight loss, nutrition, and physical activity program for women and children in Wicomico and Somerset counties.

#### **Objectives and Anticipated Impact:**

- By December 2020, increase the number of 6-week educational classes with identified diabetes patients and their supporting caregivers from 26 to 52 per year.
  - Evaluation Measures:
    - # of 6-week classes
    - # of people reached
    - Class completion rate
    - % knowledge change
- By partnering with other community stakeholders, the Community Wellness Program
  will increase access to diabetes screening, education, and connection to community
  resources. This program, which includes the Wagner Wellness Van outreach, provides
  health outreach events that are both large-scale and small-scale, and can be aimed
  toward the general public or a targeted population or geographic area.
  - Evaluation Measures:
    - # of screenings provided
    - Number of A1C's checked
    - # of community members referred for diabetes education
    - # of community members referred to their PCP
- Starting in September 2019 and ending in December 2021 SCALE's expected outcomes include: 80% of adult participants will report weight loss of at least 5% of their total body weight from baseline; demonstrated behavior change and improved health status
  - Evaluation Measures:
    - % of adults with weight loss of at least 5% of their baseline body weight
    - % knowledge change
    - % reporting improved health status
    - # of adults enrolled in SCALE program
    - # of adults diagnosed as overweight or obese
    - # of adults diagnosed as overweight or obese with improved BMI or weight loss
    - # of adults with an increase in healthy lifestyle choices.

#### **Recommended Policy Changes:**

- Increase access to fresh fruits and vegetables through community-based initiatives.
- Increase active time in early childcare care sites and schools including physical education.

#### **TidalHealth Peninsula Regional System Resource Contributions:**

- Staff
- Data
- Marketing materials
- Training materials
- Mobile van

- Phone service
- Staff training and materials as needed

#### **Alignment Opportunities:**

 WiCHD Strategic Plan 2017-2022, Priority #1: Improve community health and wellness by focusing on priority areas identified in collaboration with the Local Health Improvement Coalition: chronic disease and behavioral health.

#### **Programs to Address Diabetes**

#### 1. Chronic Disease Self-Management (CDSM) Classes

TidalHealth Peninsula Regional will build off the successful efforts that were included for this program in its 2016 Implementation Strategy Plan

#### **Activities:**

- Target and identify patients who have diabetes and their caregivers through self-referral or provider referral
- Train Community Peer Trainers and TidalHealth Peninsula Regional Community Health Workers to conduct classes
- Offer classes in English, Spanish and American Sign Language
- Explore the possibility to offer classes in Haitian-Creole, Korean and Mandarin languages, based on availability of peer trainers in these languages
- Offer 6-week classes at least weekly
- Educate participants on diabetes self-management and have them set and track personal goals weekly and share goals with their providers
- Partner with MAC, Inc. to collect data on pre and post A1C values
- Connect with the statewide Health Information Exchange to make referrals between providers office and Mac, Inc for all CDSM classes

#### **Program Owners:**

• MAC, Inc.

#### **Program Collaborators:**

- TidalHealth Peninsula Regional
- 2. TidalHealth Community Wellness Program expansion

TidalHealth Peninsula Regional and WiCHD will build off the successful efforts that were included for this program in its 2016 Implementation Strategy Plan

#### **Activities:**

- Outreach to communities utilizing a Nurse Practitioner (NP) to provide primary care services.
- Provide screenings for diabetes (other screenings provided as well).

- Identify need for and make referrals to community resources for health education programs.
- Ensure those people identified as diabetic or pre-diabetic are referred for primary care follow up.
- Track rate of successful PCP follow up for all referrals.
- Identify barriers to accessing PCP follow up and work towards future solutions.
- Connect individuals with additional social and economic needs to a community health worker to address SDOH and self-management education.

#### **Program Owners:**

• TidalHealth Peninsula Regional

#### **Program Collaborators:**

- Wicomico, Somerset and Worcester County Health Departments
- HOPE
- HALO
- Salisbury Urban Ministries
- St. James AME
- St. Peter's Lutheran
- Resource and Recovery Center
- Atlantic Club
- Marion Pharmacy
- MAC, Inc
- National Kidney Foundation
- Wicomico County Schools
- Maryland Food Bank
- Various other community and faith-based organizations
- 3. Sustainable Change and Lifestyle Enhancement (SCALE)

#### **Activities:**

- Target outreach to overweight women of child bearing age (up to age 55) and overweight children ages 7-17
- Offer education and activities to encourage healthier eating and physical activity
- Provide support through cooking demonstrations, grocery store tours, walks and better access to fresh, healthy food

#### **Program Owners:**

- Wicomico County Health Department
- Somerset County Health Department

#### **Program Collaborators:**

- TidalHealth Peninsula Regional
- YMCA

- University of Maryland Eastern Shore
- Wicomico County Detention Center
- HOPE
- Community Health Providers

#### **Cancer**

**Goal:** Improve cancer prevention, and early detection and intervention/treatment of cancer to provide the best possible outcomes in the Tri-County Area for colorectal, breast, cervical, lung and skin cancer in the Tri-County Area.

#### **Strategies:**

- Partner with WiCHD and SCHD to expand cancer screening
- Utilize cancer rate data to identify neighborhoods with high cancer incidence rates for targeted education and screening activities
- Collaborate with local school district(s) and colleges/universities to integrate skin cancer prevention education within student health curricula

#### **Objectives and Anticipated Impact:**

- Working in partnership with the WiCHD and SCHD offer additional cancer prevention programs and screening options for underserved community members, and connect those that need it to treatment
- Increase knowledge of at-risk activities for cancer, importance of healthy behaviors in prevention of cancer and importance of screening activities
  - Evaluation Measures:
    - # of individuals reached with cancer screening
    - # of individuals reached with prevention education
    - # of screenings conducted
    - % follow up post positive screening
    - # of patients connected to treatment
    - # events participated in

#### **Recommended Policy Changes:**

- Design culturally competent communications that help people understand the importance of screening for early detection
- Engage communities with health disparities to modify risky behaviors and to access resources for prevention

#### **TidalHealth Peninsula Regional System Resource Contributions:**

Providers for screening

#### **Programs in Support of the Strategies**

#### 1. TidalHealth Community Wellness Program and Cancer Institute

#### **Activities**

- Increase knowledge in terms of cancer prevention and healthy lifestyle (American Cancer Society handout, etc.)
- Skin cancer screening
- Education
- Referral for cancer screenings

#### **Program Owner:**

• TidalHealth Peninsula Regional

#### **Program Collaborators:**

- Wicomico County Health Department
- Somerset County Health Department

#### **Alignment Opportunities**

 WiCHD Strategic Plan 2017-2022, Priority #1: Improve community health and wellness by focusing on priority areas identified in collaboration with the Local Health Improvement Coalition: chronic disease and behavioral health

#### **APPENDIX A**

#### **FY 2020 Progress in Addressing Priority Areas**

#### **BEHAVIORAL HEALTH PRIORITY AREA**

**Goal:** Address behavioral issues in the Tri-County Service Area by reducing the instances of opioid related deaths **Goal:** Address behavioral issues in the Tri-County Service Area by targeting seniors suffering with minor to major depression **Strategies:** 

- Collaboratively address the opioid crisis in the Tri-County Service Area with an emphasis on prevention, treatment, resources, and enforcement
- Provide peer support for people who have overdosed or sought help for opioid addiction issues
- Address depression in adults 50 years or older through skill building, problem solving, and socialization activities

Program Owner	Program	Activities	Objectives • Evaluation Measures	FY 2020 Evaluation Data

#### **CANCER PRIORITY AREA**

**Goal:** Improve cancer prevention, and early detection and intervention/treatment of cancer to provide the best possible outcomes in the Tri-County Area for colorectal, breast, cervical, lung and skin cancer in the Tri-County Area.

#### **Strategies:**

- Partner with WiCHD and SCHD to expand cancer screening
- Utilize cancer rate data to identify neighborhoods with high cancer incidence rates for targeted education and screening activities
- Collaborate with local school district(s) and colleges/universities to integrate skin cancer prevention education within student health curricula

Program Owner	Program	Activities	Objectives • Evaluation Measures	FY 2020 Evaluation Data
Tidal Health	Wagner Wellness Van Expansion	Clinical breast exams Skin cancer screening Education Referral for cancer screenings	Working in partnership with the WiCHD and SCHD offer additional cancer prevention programs and screening options for low income community members, and connect those that need it to treatment  Increase knowledge of at-risk activities for cancer, importance of healthy behaviors in prevention of cancer and importance of screening activities  • # of screenings conducted  • % follow up post positive screening  • # of patients connected to treatment  • % knowledge increase of cancer prevention	Two cancer screening events in the tri-county area.  1) Westover event to reach Haitian/Creole population. Partnered with Somerset Health Department by having the BCCP booth next to TidalHealth. There were trust issues at first with not wanting to do the breast exam on the van, but we worked through that and were able to connect them that day with BCCP.  2) Salisbury – Primarily Hispanic population. We had hoped to do an oral cancer screening event on the van, but have not been able to do this because of COVID. We are focusing/prioritizing communities/populations in Somerset County with our cancer screening efforts because of the disproportionately high prevalence of cancer. We have resumed lung cancer screenings at the hospital and would like to outreach to the community about this service. We typically have skin cancer screening events four times a year, but these have been on hold because of COVID. As we start to get the van back out into the communities, we are hoping to resume these screenings.

#### **APPENDIX B**

#### **FY 2021 Progress in Addressing Priority Areas**

#### **BEHAVIORAL HEALTH PRIORITY AREA**

**Goal:** Address behavioral issues in the Tri-County Service Area by reducing the instances of opioid related deaths **Goal:** Address behavioral issues in the Tri-County Service Area by targeting seniors suffering with minor to major depression **Strategies:**

Both counties held classes virtually due to COVID-19.  Somerset County Classes:  14 Adults enrolled 57% reported at least 5% weight loss from baseline 100% demonstrated knowledge change 85% reported improved health status 10 individuals diagnosed as overweight or obese; 2 had improved BMI after class 9 individuals had increase in healthy lifestyle choices  Wicomico County Classes: 8 Adults enrolled 95% reported at least 5% weight loss from baseline 100% demonstrated knowledge change 50% reported improved health status 7 individuals diagnosed as overweight or obese; 7 had improved BMI after class

#### **CANCER PRIORITY AREA**

**Goal:** Improve cancer prevention, and early detection and intervention/treatment of cancer to provide the best possible outcomes in the Tri-County Area for colorectal, breast, cervical, lung and skin cancer in the Tri-County Area.

#### Strategies:

- Partner with WiCHD and SCHD to expand cancer screening
- Utilize cancer rate data to identify neighborhoods with high cancer incidence rates for targeted education and screening activities
- Collaborate with local school district(s) and colleges/universities to integrate skin cancer prevention education within student health curricula

System

**SERVICE** 

# Financial Assistance / Uncompensated Care

# **POLICY**

In accordance with state and federal guidelines, TidalHealth will provide emergency and medically necessary free and/or reduced-cost care to patients who lack health care coverage or whose health care coverage does not pay the full cost of their medical bill. A patient's payment shall not exceed the amount generally billed (AGB). All hospital regulated services (which includes emergency and medically necessary care) at TidalHealth Peninsula Regional will be charged consistently as established by the Health Services Cost Review Commission (HSCRC) which equates to the amounts generally billed (AGB) method. All patients seen by a TidalHealth Provider or in an unregulated area at TidalHealth Peninsula Regional or all services at TidalHealth Nanticoke Hospital will be charged the fee schedule plus the standard mark-up which is the AGB for TidalHealth. Self-pay patients, for all services not regulated by the HSCRC, will receive a discount to reduce charges to the amount TidalHealth would be reimbursed by Medicare which is the prospective method. For self-pay patients, the amount billed will not exceed the Medicare fee schedule for all unregulated services.

TidalHealth may use outsource vendors to provide patient collection and/or pre-collection services. Vendors act in accordance with TidalHealth policies and wherever policy notates employee, financial services department, or other such wording - vendor and/or vendor employees are included without such notation.

#### Definitions:

- a. Elective Care: Care that can be postponed without harm to the patient or that is not medically necessary. An appropriate clinical or physician representative will be contacted for consultation in determining the patient status.
- b. **Medical Necessity:** Any procedure reasonably determined to prevent, diagnose, correct, cure, alleviate, or prevent the worsening of conditions that endanger life, cause suffering or pain,

resulting in illness or infirmity, threatening to cause or aggravate a handicap, or cause physical deformity or malfunction, if there is no other equally effective, more conservative or less costly course of treatment available.

- c. Immediate Family: Anyone for whom the patient claims a personal exemption in a federal or State tax return. A spouse, regardless of whether the patient and spouse expect to file a joint federal or State tax return, biological children, adopted children, or step-children. If the patient is a child, the household size is anyone for whom the patient's parents or guardians claim a personal exemption in a federal of State tax return. Biological parents, adopted parents, or stepparents or guardians, biological siblings, adopted siblings, or stepsiblings.
- d. Liquid Assets: Cash, checking/savings account balances, certificates of deposit, stocks, bonds, money market funds, rental properties etc. The availability of liquid assets plus annual income may be considered in relation to the current poverty guidelines published in the Federal Register.
- e. **Medical Debt:** Out of pocket expenses, including copayments, coinsurance and deductibles, for medical costs for medical costs billed by TidalHealth.
- f. **Extraordinary Collection Actions (ECA)**: Any legal action and/or reporting the debt to a consumer reporting agency.

TidalHealth will provide free medically necessary care to patients with family income at or below 200% of the federal poverty level. Patients qualifying for financial assistance based on income at or below 200% of the federal poverty level have no cost for their care and therefore pay less than AGB.

TidalHealth will provide reduced-cost medically necessary care to low-income patients with family income between 200% and 300% of the Federal poverty level.

TidalHealth will provide reduced-cost medically necessary care to low-income patients with family income between 301% and 500% of the Federal poverty level who have a medical hardship as defined by Maryland Law. Medical hardship is medical debt, incurred by a family over a 12-month period that exceeds 25% of the family income.

Other healthcare fees and professional fees that are not provided by TidalHealth are not included in this policy. Pre-planned service may only be considered for financial assistance when the service is medically necessary. As an example, cosmetic surgery is excluded. Inpatient, outpatient, emergency services, and services rendered by TidalHealth are eligible.

TidalHealth's financial assistance is provided only to bills related to services provided at TidalHealth or at a TidalHealth site including services provided by physicians employed by TidalHealth. To determine if your physician's services are covered by the TidalHealth financial assistance program, please see the roster of providers that deliver emergency and other medically necessary care, indicating which providers are covered under the policy and which are not. The list of providers is updated quarterly and available on the TidalHealth website. If you prefer, you may contact any financial counselor or patient accounting representative by calling (410) 912-4974, or in person at TidalHealth Peninsula Regional or TidalHealth Nanticoke.

# **PROCEDURE**

If a patient is unable to pay due to financial resources, all efforts will be made to help the patient obtain assistance through appropriate agencies. In the event that the patient has applied for and kept all necessary appointments and third party assistance is not available, TidalHealth will provide care at reduced or zero cost. When no third party assistance is available to cover the total bill and the patient indicates that they have insufficient funds, Financial Assistance (FA) will be offered. The Uniform Financial Assistance application, Financial Assistance Policy, Patient Collection Practice Policy, and plain language summary, can be obtained by one of the following ways:

- a. Available free of charge and upon request by calling (410) 543-7436 or (877) 729-7762.
- b. Are located in the registration areas.
- c. Downloaded from the TidalHealth website: <a href="https://www.tidalhealth.org/patientforms">https://www.tidalhealth.org/patientforms</a> <a href="https://www.tidalhealth.org/patientfolls">https://www.tidalhealth.org/patientfolls</a>
- d. The plain language summary is inserted in the Admission packet and with all patient statements.
- e. Annual notification in the local newspaper.
- f. The application is available in English, Spanish, and Creole. No other language constitutes a group that is 5% or more, or more than 1,000 residents (whichever is less) of the population in our primary service area (Worcester, Wicomico and Somerset Counties) for Maryland based on U.S. Census data. For Delaware, the hospital population considered was 5%.
- g. For patients who have difficulty in filling out an application, the information can be taken orally by calling (410) 912-6957 or in person at the Financial Counselor's Office located in the Frank
   B. Hanna Outpatient Center.

Signs will be posted in various locations throughout TidalHealth to inform patients where to call or apply for Financial Assistance.

TidalHealth Peninsula Regional - Emergency Department, Frank B. Hanna Outpatient Center, Cardiac Rehab, Wound Care, L&D Waiting Area, Hospital Cancer Center, and Same Day Surgery Waiting Area.

TidalHealth McCready Pavilion - Lab and Radiology Waiting Area, Emergency Department, Clinic, and Physical Therapy.

TidalHealth Nanticoke - Outpatient Registration, Emergency Department, Mears Building, Wound Care and Cardiac Rehab Entrance, and Cancer Center.

The patient's income will be compared to current Federal Poverty Guidelines (on file with the Collection Coordinator). The Collection Coordinator representative will consult with the patient as needed to make assessment of eligibility.

a. If the application is received within 240 days of the first post-discharge billing statement, and the account is with a collection agency, the agency will be notified to suspend all Extraordinary Collection Actions (ECA) until the application and all appeal rights have been processed.

- b. If the application is incomplete, all ECA efforts will remain on hold for a reasonable amount of time and assistance will be provided to the patient in order to get the application completed. If there is not a phone contact to call, a written notice that describes the additional information and/or documentation required will be mailed which includes a phone contact to call for assistance.
- c. Preliminary eligibility will be made within 2 business days based upon receipt of sufficient information to determine probable eligibility. A letter will be mailed to patients notifying them of their eligibility status. Following preliminary approval, patients must submit a completed application and any supporting documentation requested (if not done previously). TidalHealth Patient Financial Services determines final approval for Financial Assistance. Upon final approval, a financial assistance discount will be applied to the patient's responsibility.
- d. Patients who are beneficiaries/recipients of certain means-tested social services programs are deemed to have presumptive eligibility at 100% and are FA eligible without the completion of an application or submission of supporting documentation. It is the responsibility of the patient to notify TidalHealth that they are in a means-tested program. This information may also be obtained from an outsourced vendor or other means available to TidalHealth. Programs included are patients that:
  - Live in a household with children enrolled in the free and reduced-cost meal program.
  - Receive benefits through the federal Supplemental Nutrition Assistance Program.
  - Receive benefits through the State's Energy Assistance Program.
  - Receive benefits through the federal Special Supplemental Food Program for Women, Infants, and Children.
  - Receive benefits from any other social service program as determined by the Department and the Commission.
  - Enroll in the Healthcare Connection Program (HCC) through the Medical Society of Delaware.
- e. A patient that has qualified for Maryland Medical Assistance is deemed to automatically qualify for Financial Assistance (FA) at 100%. The amount due from a patient on these accounts may be written off to FA with verification of Medicaid eligibility. Standard documentation requirements are waived.
- f. TidalHealth may automatically approve Financial Assistance for accounts ready to be sent to a collection agency that are identified as Poverty based on the propensity to pay score.
- g. If the application is ineligible, normal dunning processes will resume, which includes notifying the agency if applicable to proceed with ECA efforts. A copy of TidalHealth's Collections Policy may be obtained by calling (410) 543-7436 or (877) 729-7762 and is available on the website listed above.
- h. The patient may request reconsideration by submitting a letter to the Senior Executive Director of Revenue Cycle at 100 East Carroll Street, Salisbury, Maryland 21801-5493 indicating the reason for the request.
- i. Only income and family size will be considered in approving applications for FA unless one of the following three scenarios occurs:

- The amount requested is greater than \$50,000
- The tax return shows a significant amount of interest income, or the patient states they have been living off of their savings accounts
- · Documentation indicates significant wealth
- j. If one of the above three scenarios are applicable, liquid assets may be considered including:
  - · Checking and savings accounts
  - Stocks and bonds
  - CD's
  - Money market or any other financial accounts for the past three months
  - · Last year's tax return
  - · A credit report may also be reviewed

The following assets are excluded:

- The first \$10,000 of monetary assets
- Up to \$150,000 in a primary residence
- Certain retirement benefits such as a 401-K where the IRS has granted preferential
  tax treatment as a retirement account including but not limited to deferredcompensation plans qualified under the Internal Revenue Code, or nonqualified
  deferred-compensation plans where the patient potentially could be required to pay
  taxes and/or penalties by cashing in the benefit.
- One motor vehicle used for the transportation needs of the patient or any family member of the patient.
- Any resources excluded in determining financial eligibility under the Medical Assistance program under the Social Security Act.
- Prepaid higher education funds in a Maryland or Delaware 529 Program account.

If the balance due is sufficient to warrant it and the assets are suitable, a lien may be placed on the assets for the amount of the bill. Collection efforts will consist of placement of the lien which will result in payment to TidalHealth upon sale or transfer of the asset. Refer to the TidalHealth Collection policy on filing liens.

- k. If TidalHealth has reason to believe the information is unreliable or incorrect, or obtained under duress, or through the use of coercive practices, FA may be denied.
- I. We do not request or provide waivers, written or oral, expressing patient does not wish to apply for assistance.
- m. In accordance with state and federal guidelines, staff training records regarding this policy are maintained by the TidalHealth Training Coordinator.

#### Collection Coordinator

a. If eligible, and under \$2,500, the account will be written off to FA when the "Request for Financial Assistance" form is finalized. A copy is retained in the patient's electronic file. If eligible, and the balance is \$2,500 or above, the Collection Coordinator will obtain the

- appropriate adjustment signature(s).
- b. TidalHealth will review only those accounts where the patient or guarantor inquire about FA, based on mailing in an application, or in the normal working of the account there is indication that the patient may be eligible. Any patient/customer service representative, financial counselor, or collection representative may begin the application process.
- c. Once a request has been approved, service eight months before the approval and twelve months after the approval may be included in the adjustment. All encounters included with the application must reference the original encounter number where the electronic image of the application is stored. Service dates outside this twenty month window may be included if approved by a Supervisor, Manager, or Director. Any amount exceeding \$5 that has already been collected from the patient or guarantor for approved dates of service shall be refunded to the patient if the determination is made within two years of the date of care.
- d. TidalHealth will communicate with the patient using the method preferred by the patient including electronic communications, telephone or mail.

# PLAIN LANGUAGE SUMMARY

# **Financial Assistance Policy**

It is the intention of TidalHealth to make available to all patients the highest quality of medical care possible within the resources available. If a patient is unable to pay due to financial resources, all efforts will be made to help the patient obtain assistance through appropriate agencies, or, if no help is available, to render care at a reduced or zero cost for emergency and medically necessary care.

Patients requiring elective services may, through consultation with their physician, have their procedure postponed until such time as the patient is able to make full payment or meet the established deposit. Elective procedure patients who, according to their diagnosis and/or their physician, cannot have their procedure postponed will be helped with obtaining assistance from agencies. If no assistance is available, and the patient requests, the account will be reviewed for possible financial assistance.

TidalHealth physician charges are not included in the hospital bill and are billed separately, with the exception of self-pay balances. Self-pay balances for TidalHealth services will appear on the same statement. Physician charges outside of TidalHealth are not included in the hospital bill and will be billed separately. Physician charges outside of TidalHealth are not covered by TidalHealth's financial assistance policy. A list of providers that deliver emergency and other medically necessary care at TidalHealth is provided on the website at <a href="https://www.tidalhealth.org/find-a-doctor">www.tidalhealth.org/find-a-doctor</a>.

In the event that the patient has applied for and kept all necessary appointments and third party assistance is not available, the patient may be eligible for financial assistance.

# **Eligibility Determination Process**

- 1. Interview patient and/or family.
- 2. Obtain annual gross income.
- 3. Determine eligibility (preliminary eligibility within 2 business days).

- 4. Screen for possible referral to external charitable programs.
- 5. If the patient and/or family refuse to disclose financial resources or cooperate, the patient will be subject to standard collection efforts. No Extraordinary Collection Actions (ECA) will be taken for at least 120 days from the first post-discharge billing statement.
- 6. All applications received within 240 days of the first post-discharge billing statement will be reviewed. ECA actions will be suspended until the application has been processed.
- 7. The determination of eligibility (approval or denial) shall be made in a timely manner.

# **How to Apply**

- Applications can be taken orally by calling (410) 912-6957 between 8:00 a.m. and 5:00 p.m.,
   Monday through Friday
- In person at TidalHealth Peninsula Regional, 100 East Carroll Street, Salisbury, Maryland at the Financial Counselor's office (located in the Frank B. Hanna Outpatient Center lobby) between 8:00 a.m. and 4:00 p.m., Monday through Friday or the Registration Office of TidalHealth Nanticoke, 801 Middleford Road, Seaford, Delaware, between 8:00 a.m. and 4:00 p.m. Monday through Friday.
- Mailing a request for an application to TidalHealth Peninsula Regional, PO Box 2498, Salisbury, MD 21802-2498
- On the internet at: <a href="https://www.tidalhealth.org/patientforms">https://www.tidalhealth.org/patientbills</a>
- Applications are available in English, Spanish, and Creole.

# Qualifications

TidalHealth compares the patient's income to the Federal Poverty Guidelines. In order to process your application we require the following information:

- An independent third party to verify your household income (one of the following)
  - a. Recent pay stub showing current and year-to-date earnings
  - b. Most recent tax return showing your Adjusted Gross Income or W-2 form
  - c. Written documentation of Social Security benefits, SSI disability, VA benefits, etc.
  - d. If no income, a letter from an independent source such as a clergy or neighbor verifying no income
- Completed application

This information, and any information obtained from external sources, is used to determine your eligibility for financial assistance. The more information provided, the easier it is for us to determine your financial need. TidalHealth may request a credit report to support a patient's application for assistance.

#### **Need Assistance?**

If, at any time, you have questions about obtaining financial assistance, your medical bill, your rights and obligations with regard to the bill, or applying for the Medical Assistance Program, please contact the TidalHealth Financial Services Department at (877) 729-7762. You can obtain a copy of the TidalHealth Financial Assistance Policy at <a href="https://www.tidalhealth.org/financialassistance">www.tidalhealth.org/financialassistance</a>.

# **Medical Assistance Program**

To find out if you are eligible for Maryland Medical Assistance or other public assistance, please apply at your local Department of Social Services (DSS) office, or you may visit mmcp.dhmh.maryland.gov for information about the various Medicaid programs available. You may apply online for Maryland Medicaid at marylandhealthconnection.gov. If you are applying for assistance for a child, or are pregnant, you may apply for the Maryland Children's Health Program (MCHP). If you are only applying for assistance with paying your Medicare premiums, co-payments, or deductibles, you may apply at your local Department of Social Services (DSS) for the Qualified Medicare Beneficiary (QMB) or Specified Low-Income Medicare Beneficiary (SLMB) Program. QMB/SLMB applications may be filed by mail or in person. For more information, if you are a Maryland resident, you may call the Department of Health and Mental Hygiene's Recipient Relations Hotline at 1 (800) 492-5231 or (410) 767-5800.

Delaware residents may obtain information online at **dhss.delaware.gov** or apply online at **assist.dhss.delaware.gov**. If you are a Delaware resident, call (302) 571-4900. Virginia residents may obtain information at **dmas.Virginia.gov**. To receive an application, call your local DSS office or the Area Agency on Aging, (AAA).

# **Patients' Rights and Obligations**

#### Rights:

- Prompt notification of their preliminary eligibility determination for financial assistance.
- Guidance from TidalHealth on how to apply for financial assistance and other programs which may help them with the payment of their medical bill.
- Receipt of financial assistance for all services not payable by another program that meet the gualifications of TidalHealth's Financial Assistance Policy.
- TidalHealth will provide emergency and medically necessary free and/or reduced-cost care to
  patients who lack health care coverage or whose health care coverage does not pay the full
  cost of their medical bill.

#### Obligations:

- Submit complete and accurate information on the Uniform Financial Assistance Application in use in the state of Maryland.
- Attach supporting documentation and return the form to TidalHealth Peninsula Regional in a timely manner.
- · Make payment in full or establish a payment plan for services not gualified under TidalHealth's

Financial Assistance Policy.

# Como hacer la solicitud

- Llame al (410) 912-6957 o (877) 729-7762 entre las 8:00 a.m. y las 4:00 p.m., de lunes a viernes
- Acuda en persona a la oficina del consejero financiero (Localizado en el vestibulo Frank B. Hanna del Centro de attencion de Pacientes Externos) entre las 8:00 a.m. y las 4:00 p.m., de lunes a viernes
- A traves de Internet, visite <u>www.tidalhealth.org</u>. Haga clic en Patients & Visitors (Pacientes y vistantes), luego en Patient Financial Services (Servicios financieros para pacientes) y despues en Billing Information (Informacion de facturacion)
