1. Primary Care Coalition
2. The Brancati Center for the Advancement of Community Care
3. Community Referral and Care Coordination Partner – to be identified
Collaborators for the clinical referral network include many CTOs and local physician groups. DPP or DSMT provider partners will include several community organizations, CTOs and medical practices.
Program Summary:
The Nexus Montgomery Diabetes Project will focus on twelve ZIP Codes in Montgomery County that represent nearly 500,000 residents and a significant portion of the Nexus Montgomery hospitals' diabetes-related admissions. Given the racial and ethnic demographics of these areas, targeting these ZIP Codes creates provides an opportunity to close long-standing disparities. *The Nexus Montgomery Diabetes Project will be implemented through collaboration with a wide range of community partners serving as DPP or DSMT providers and referral or outreach partners. DPP or DSMT provider partners will receive intensive support for start-up of new programs or expansion, including stipends to offset initial, un-reimbursable costs, contingent on ongoing process improvement participation. The Diabetes Project shall have three other key implementation partners: a public outreach partner attuned to the input of the diverse audience, a centralized referral and case management partner, and the Brancati Center for its technical assistance and expertise in DPP programming.*
