**Staff Recommendation**

**October 19, 2016**

## **Introduction**

On September 6, 2016, MedStar Harbor Hospital (the Hospital), a member of MedStar Health (the System), submitted a partial rate application to the Commission requesting new rates for Psychiatric Acute (PSY) and Psychiatric Day & Night Care (PDC) services. The Hospital requires the new rate because the 26 acute inpatient psychiatric bed program is being transitioned from MedStar Union Memorial Hospital (MUMH). The Hospital requests that the PSY and PDC rates be set at MedStar Union Memorial rates of \$878.48 per day for PSY services and 479.79 per visit for PDC services and be effective November 1, 2016.

## **Staff Evaluation**

Since MedStar Health will be transitioning its 26 acute inpatient psychiatric bed program from MUMH to the Hospital, staff consulted with the Maryland Health Care Commission (MHCC) to determine if all regulatory requirements have been satisfied. MHCC confirmed that the change in bed capacity at MedStar Harbor Hospital and MedStar Union Memorial and the introduction of acute psychiatric services at MedStar Harbor Hospital do not require MHCC review and approval.

Based on Staff's review, MUMH's rate for PSY services, \$874.00 per patient day, is below the statewide median of \$1,102.19 per patient day. MUMH's rate for PDC services, \$477.34 per visit, is above the statewide median of \$457.52 per visit.

## **Recommendation**

After reviewing the Hospital's application, the staff recommends as follows:

1. That a PSY rate of \$874.00 per patient day be approved effective November 1, 2016;
2. That a PDC rate of \$457.52 per visit be approved effective November 1, 2016;
3. That the PSY and PDC rates not be rate realigned until a full year's cost experience data have been reported to the Commission; and
4. That no change be made to the Hospital's Global Budget Revenue.

**Draft Recommendation**

**October 19, 2015**

**This is a draft recommendation. Any comments shall be submitted by COB on October 31, 2016 to Steve Ports at [steve.ports@maryland.gov](mailto:steve.ports@maryland.gov).**

## **I. Introduction**

On September 19, 2016, Johns Hopkins Health System (“JHHS,” or the “System”) filed an application for an Alternative Method of Rate Determination pursuant to COMAR 10.37.10.06 on behalf of Johns Hopkins Hospital, Johns Hopkins Bayview Medical Center, Suburban Hospital, and Howard County General Hospital (“the Hospitals”). The System seeks renewal for the continued participation of Priority Partners, Inc. in the Medicaid Health Choice Program. Priority Partners, Inc. is the entity that assumes the risk under the contract. The Commission most recently approved this contract under proceeding 2308A for the period from January 1, 2016 through December 31, 2016. The Hospitals are requesting to renew this contract for a one-year period beginning January 1, 2017.

## **II. Background**

Under the Medicaid Health Choice Program, Priority Partners, a provider-sponsored Managed Care Organization (“MCO”) sponsored by the Hospitals, is responsible for providing a comprehensive range of health care benefits to Medical Assistance enrollees. Priority Partners was created in 1996 as a joint venture between Johns Hopkins Health Care (JHHC) and the Maryland Community Health System (MCHS) to operate an MCO under the Health Choice Program. Johns Hopkins Health Care operates as the administrative arm of Priority Partners and receives a percentage of premiums to provide services such as claim adjudication and utilization management. MCHS oversees a network of Federally Qualified Health Clinics and provides member expertise in the provision of primary care services and assistance in the development of provider networks.

The application requests approval for the Hospitals to continue to provide inpatient and

outpatient hospital services, as well as certain non-hospital services, while the MCO receives a State-determined capitation payment. Priority Partners pays the Hospitals HSCRC-approved rates for hospital services used by its enrollees. The Hospitals supplied information on their most recent experience as well as their preliminary projected revenues and expenditures for the upcoming year based on the initially revised Medicaid capitation rates.

Priority Partners is a major participant in the Medicaid Health Choice program, providing managed care services to 2405% of the State's MCO population, up from 23.6% in CY 2015.

### **III. Staff Review**

This contract has been operating under the HSCRC's initial approval in proceeding 2308A. Staff reviewed the operating performance under the contract as well as the terms of the capitation pricing agreement. Staff reviewed available final financial information and projections for CYs 2015, 2016, and 2017. The statements provided by Priority Partners to staff represent both a "stand-alone" and "consolidated" view of Priority's operations. The consolidated picture reflects certain administrative revenues and expenses of Johns Hopkins Health Care. When other provider-based MCOs are evaluated for financial stability, their administrative costs relative to their MCO business are included as well; however, they are all included under the one entity of the MCO.

With the exception of CY 2015 in which all provider-based MCOs experienced unfavorable performance, the consolidated financial performance of Priority Partners has been favorable. Priority Partners is projecting to favorable performance in CY 2016 and marginal performance in CY 2017.

#### **IV. Recommendation**

With the exception of CY 2015, Priority Partners has continued to achieve favorable consolidated financial performance in recent years. Based on past and projected performance, staff believes that the proposed renewal arrangement for Priority Partners is acceptable under Commission.

#### **Therefore:**

- 1) Staff recommends approval of this alternative rate application for a one-year period beginning January 1, 2017.**
- 2) Since sustained losses over an extended period of time may be construed as a loss contract necessitating termination of this arrangement, staff will continue to monitor financial performance in CY 2016, and the MCOs expected financial status in to CY 2017. Therefore, staff recommends that Priority Partners report to Commission staff (on or before the September 2017 meeting of the Commission) on the actual CY 2016 experience, and preliminary CY 2017 financial performance (adjusted for seasonality) of the MCO, as well as projections for CY 2018.**
- 3) Consistent with its policy paper outlining a structure for review and evaluation of applications for alternative methods of rate determination, the staff recommends that this approval be contingent upon the continued adherence to the standard Memorandum of Understanding with the Hospitals for the approved contract. This document formalizes the understanding between the Commission and the Hospitals, and includes provisions for such things as payments of HSCRC-approved rates,**

**treatment of losses that may be attributed to the managed care contract, quarterly and annual reporting, the confidentiality of data submitted, penalties for noncompliance, project termination and/or alteration, on-going monitoring, and other issues specific to the proposed contract. The MOU also stipulates that operating losses under managed care contracts may not be used to justify future requests for rate increases.**

\* PROCEEDING: 2354A**

---

**Staff Recommendation**

**October 19, 2016**

## **I. INTRODUCTION**

The University of Maryland Medical Center (the Hospital) filed a renewal application with the HSCRC on September 28, 2016 for an alternative method of rate determination, pursuant to COMAR 10.37.10.06. The Hospital requests approval from the HSCRC to continue to participate in a global rate arrangement for solid organ and blood and bone marrow transplant services with OptumHealth Care Solutions, Inc. for a one-year period, effective November 1, 2016.

## **II. OVERVIEW OF APPLICATION**

The contract will continue to be held and administered by University Physicians, Inc. (UPI), which is a subsidiary of the University of Maryland Medical System. UPI will manage all financial transactions related to the global price contract including payments to the Hospital and bear all risk relating to regulated services associated with the contract.

## **III. FEE DEVELOPMENT**

The hospital component of the global rates was developed by calculating mean historical charges for patients receiving the procedures for which global rates are to be paid. The remainder of the global rate is comprised of physician service costs. Additional per diem payments were calculated for cases that exceed a specific length of stay outlier threshold.

## **IV. IDENTIFICATION AND ASSESSMENT OF RISK**

The Hospital will continue to submit bills to UPI for all contracted and covered services. UPI is responsible for billing the payer, collecting payments, disbursing payments to the Hospital at its full HSCRC approved rates, and reimbursing the physicians. The Hospital contends that the arrangement between UPI and the Hospital holds the Hospital harmless from any shortfalls in payment from the global price contract. UPI maintains that it has been active in similar types of fixed fee contracts for several years, and that UPI is adequately capitalized to bear risk of potential losses.

## **V. STAFF EVALUATION**

The staff found that the actual experience under this arrangement for the prior year has

been favorable.

## **VI. STAFF RECOMMENDATION**

Staff recommends that the Commission approve the Hospital's application to continue to participate in an alternative method of rate determination for solid organ and blood and bone marrow transplant services for a one year period beginning November 1, 2016.

Consistent with its policy paper regarding applications for alternative methods of rate determination, the staff recommends that this approval be contingent upon the execution of the standard Memorandum of Understanding ("MOU") with the Hospital for the approved contract. This document would formalize the understanding between the Commission and the Hospital, and would include provisions for such things as payments of HSCRC-approved rates, treatment of losses that may be attributed to the contract, quarterly and annual reporting, confidentiality of data submitted, penalties for noncompliance, project termination and/or alteration, on-going monitoring, and other issues specific to the proposed contract. The MOU will also stipulate that operating losses under the contract cannot be used to justify future requests for rate increases.

**Staff Recommendation**

**October 19, 2016**

## **I. INTRODUCTION**

The University of Maryland Medical Center (“Hospital”) filed an application with the HSCRC on September 28, 2016 requesting approval to continue its participation in a global rate arrangement with BlueCross and BlueShield Association Blue Distinction Centers for blood and bone marrow transplant services for a period of one year beginning December 1, 2016.

## **II. OVERVIEW OF APPLICATION**

The contract will continue to be held and administered by University Physicians, Inc. (UPI), which is a subsidiary of the University of Maryland Medical System. UPI will continue to manage all financial transactions related to the global price contract including payments to the Hospital and bear all risk relating to services associated with the contract.

## **III. FEE DEVELOPMENT**

The hospital portion of the global rates was developed by calculating historical charges for patients receiving the procedures for which global rates are to be paid. The remainder of the global rate is comprised of physician service costs. Additional per diem payments were calculated for cases that exceed a specific length of stay outlier threshold.

## **IV. IDENTIFICATION AND ASSESSMENT OF RISK**

The Hospital will continue to submit bills to UPI for all contracted and covered services. UPI is responsible for billing the payer, collecting payments, disbursing payments to the Hospital at its full HSCRC approved rates, and reimbursing the physicians. The Hospital contends that the arrangement between UPI and the Hospital holds the Hospital harmless from any shortfalls in payment from the global price contract.

## **V. STAFF EVALUATION**

The staff found that the experience under this arrangement for the prior year has been favorable.

## **VI. STAFF RECOMMENDATION**

The staff recommends that the Commission approve the Hospital’s application for an alternative method of rate determination for blood and bone marrow transplant services, for a

one year period commencing December 1, 2016. The Hospital will need to file a renewal application for review to be considered for continued participation.

Consistent with its policy paper regarding applications for alternative methods of rate determination, the staff recommends that this approval be contingent upon the execution of the standard Memorandum of Understanding ("MOU") with the Hospital for the approved contract. This document would formalize the understanding between the Commission and the Hospital, and would include provisions for such things as payments of HSCRC-approved rates, treatment of losses that may be attributed to the contract, quarterly and annual reporting, confidentiality of data submitted, penalties for noncompliance, project termination and/or alteration, on-going monitoring, and other issues specific to the proposed contract. The MOU will also stipulate that operating losses under the contract cannot be used to justify future requests for rate increases.

**Recommendation**

**October 19, 2016**

**This is a draft recommendation. Any comments shall be submitted by COB on October 31, 2016 to Steve Ports at [steve.ports@maryland.gov](mailto:steve.ports@maryland.gov).**

## **I. Introduction**

On August 31, 2016, Saint Agnes Health System, Western Maryland Health System, Holy Cross Health, and Meritus Health (“the Hospitals”) filed an application for an Alternative Method of Rate Determination pursuant to COMAR 10.37.10.06. The Hospitals seek renewal for the continued participation of Maryland Physicians Care (“MPC”) in the Medicaid Health Choice Program. MPC is the entity that assumes the risk under this contract. The Commission most recently approved this contract under proceeding 22307A for the period January 1, 2016 through December 31, 2016. The Hospitals are requesting to renew this contract for one year beginning January 1, 2017.

## **II. Background**

Under the Medicaid Health Choice Program, MPC, a Managed Care Organization (“MCO”) sponsored by the Hospitals, is responsible for providing a comprehensive range of health care benefits to Medical Assistance enrollees. The application requests approval for the Hospitals to provide inpatient and outpatient hospital services as well as certain non-hospital services, while the MCO receives a State-determined capitation payment. MPC pays the Hospitals HSCRC-approved rates for hospital services used by its enrollees. MPC is a major participant in the Medicaid Health Choice program, and provides services to 18.8% of the total number of MCO enrollees in Maryland, which represents approximately the same market share as CY 2015.

The Hospitals supplied information on their most recent experience as well as their preliminary projected revenues and expenditures for the upcoming year based on the revised Medicaid capitation rates.

### **III. Staff Review**

This contract has been operating under previous HSCRC approval (Proceeding 2307A). Staff reviewed the operating performance under the contract as well as the terms of the capitation pricing agreement. Staff reviewed available final financial information and projections for CYs 2015, 2016, and 2017. In recent years, the financial performance of MPC overall has been marginally favorable with unfavorable performance in CY 2015 (as with all of the provider-based MCOs), and favorable projections for CYs 2016 and 2017.

### **IV. Recommendation**

With the exception of CY 2015, MPC has generally maintained favorable performance in recent years. However, all of the provider-based MCOs incurred losses in CY 2015. Based on past and projected performance, staff believes that the proposed renewal arrangement for MPC is acceptable under Commission.

**Therefore:**

- (1) Staff recommends approval of this alternative rate application for a one-year period beginning January 1, 2017.**
- (2) Since sustained losses over an extended period of time may be construed as a loss contract necessitating termination of this arrangement, staff will continue to monitor financial performance for CY 2016 and the MCO's expected financial status into CY 2017. Staff recommends that Maryland Physicians Care report to Commission staff (on or before the September 2017 meeting of the Commission) on the actual CY 2016 experience, preliminary CY 2017 financial performance (adjusted for seasonality) of the MCO, as well as projections for CY 2018.**

**(3) Consistent with its policy paper outlining a structure for review and evaluation of applications for alternative methods of rate determination, the staff recommends that this approval be contingent upon the continued adherence to the standard Memorandum of Understanding with the Hospitals for the approved contract. This document formalizes the understanding between the Commission and the Hospitals, and includes provisions for such things as payments of HSCRC-approved rates, treatment of losses that may be attributed to the managed care contract, quarterly and annual reporting, the confidentiality of data submitted, penalties for noncompliance, project termination and/or alteration, on-going monitoring, and other issues specific to the proposed contract. The MOU also stipulates that operating losses under managed care contracts may not be used to justify future requests for rate increases.**

**Draft Recommendation**

**October 19, 2016**

**This is a draft recommendation. Any comments shall be submitted by COB on October 31, 2016 to Steve Ports at [steve.ports@maryland.gov](mailto:steve.ports@maryland.gov).**

## **I. Introduction**

On October 10, 2016, MedStar Health filed an application for an Alternative Method of Rate Determination pursuant to COMAR 10.37.10.06 on behalf of the MedStar Hospitals (“the Hospitals”). MedStar Health seeks renewal for the continued participation of MedStar Family Choice (“MFC”) in the Medicaid Health Choice Program. MedStar Family Choice is the MedStar entity that assumes the risk under this contract. The Commission most recently approved this contract under proceeding 2310A for the period from January 1, 2016 through December 31, 2016. The Hospitals are requesting to renew this contract for one year beginning January 1, 2017.

## **II. Background**

Under the Medicaid Health Choice Program, MedStar Family Choice, a Managed Care Organization (“MCO”) sponsored by the Hospitals, is responsible for providing a comprehensive range of health care benefits to Medical Assistance enrollees. The application requests approval for the Hospitals to provide inpatient and outpatient hospital services, as well as certain non-hospital services, while MFC receives a State-determined capitation payment. MFC pays the Hospitals HSCRC-approved rates for hospital services used by its enrollees. MFC provides services to 7.1% of the total number of MCO enrollees in Maryland, which represents a slight increase in its market share compared to CY 2015.

The Hospitals supplied information on their most recent experience as well as their preliminary projected revenues and expenditures for the upcoming year based on the Medicaid capitation rates.

### **III. Staff Review**

This contract has been operating under previous HSCRC approval (proceeding 2310A). Staff reviewed the operating performance under the contract as well as the terms of the capitation pricing agreement. Staff reviewed available final financial information and projections for CYs 2015, 2016, and 2017. Over this three year period, all actuals and projections are unfavorable. All provider based MCOs experienced unfavorable performance in CY 2015. While this time last year, MFC projected favorable performance for CY 2016, current projections are marginal to unfavorable.

### **IV. Recommendation**

Based on this three year analysis, HSCRC has concerns about whether this arrangement could be deemed a loss contract from an MCO ARM perspective.

**Therefore:**

- (1) Staff recommends approval of this alternative rate application for a one-year period beginning January 1, 2017, however, staff is placing MFC on a watch list as described in item (2) below.**
- (2) Since sustained losses, such as those currently being experienced by MFC, may be construed as a loss contract necessitating termination of this arrangement, staff is recommending the following actions:**
  - a. On the earlier of July 1, 2017 or if/when Medicaid applies a mid-year adjustment, MFC shall report to HSCRC staff on the impact that any such adjustment is expected to have on CY 2017 financial performance.**
  - b. HSCRC staff shall be cognizant of the MCO's financial performance and**

**the potential for a loss contract in considering any requested adjustments to rates or global budgets of the associated hospitals during FYs 2017 and 2018.**

- c. In addition to the report provided in (2)(a), MFC shall report to Commission staff (on or before the September 2017 meeting of the Commission) on the actual CY 2016 experience and preliminary CY 2017 financial performance (adjusted for seasonality) of the MCO, as well as projections for CY 2018.**

**(3) Consistent with its policy paper outlining a structure for review and evaluation of applications for alternative methods of rate determination, the staff recommends that this approval be contingent upon the continued adherence to the standard Memorandum of Understanding with the Hospitals for the approved contract. This document formalizes the understanding between the Commission and the Hospitals, and includes provisions for such things as payments of HSCRC-approved rates, treatment of losses that may be attributed to the managed care contract, quarterly and annual reporting, the confidentiality of data submitted, penalties for noncompliance, project termination and/or alteration, on-going monitoring, and other issues specific to the proposed contract. The MOU also stipulates that operating losses under managed care contracts may not be used to justify future requests for rate increases.**

**Draft**

**Recommendation**

**October 19, 2016**

**This is a draft recommendation. Any comments shall be submitted by COB on October 31, 2016 to Steve Ports at [steve.ports@maryland.gov](mailto:steve.ports@maryland.gov).**

## **I. Introduction**

On October 10, 2016, University of Maryland Health Partners, Inc. (UMHP), a Medicaid Managed Care Organization (“MCO”), on behalf of The University of Maryland Medical System Corporation (“the Hospitals”), filed an application for an Alternative Method of Rate Determination (“ARM”) pursuant to COMAR 10.37.10.06. UMHP and the Hospitals seek approval for the MCO to continue to participate in the Medicaid Health Choice Program. UMHP is the entity that assumes the risk under this contract. The Commission most recently approved this contract under proceeding 2314A for the period from January 1, 2016 through December 31, 2016. The former MCO known as Riverside was purchased by University of Maryland Medical System Corporation in August 2015. The new MCO, UMHP, and Hospitals are requesting to implement this new contract for one year beginning January 1, 2017.

## **II. Background**

Under the Medicaid Health Choice Program, UMHP, a MCO owned by the Hospitals, is responsible for providing a comprehensive range of health care benefits to Medical Assistance enrollees. The application requests approval for the Hospitals to provide inpatient and outpatient hospital services as well as certain non-hospital services, while the MCO receives a State-determined capitation payment. UMHP pays the Hospitals HSCRC-approved rates for hospital services used by its enrollees. UMCP is a relatively small MCO providing services to 3.1% of the total number of MCO enrollees in the HealthChoice Program, which represents approximately the same market share as CY 2015.

UMHP supplied information on its most recent financial experience as well as its preliminary projected revenues and expenditures for the upcoming year based on the revised

Medicaid capitation rates.

### **III. Staff Review**

This contract has been operating under previous HSCRC approval (proceeding 2314A). Staff reviewed the operating financial performance under the contract. Staff reviewed available final financial information and projections for CYs 2015, 2016, and 2017. In its third year of operation, Riverside/UMHP reported unfavorable financial performance for CY 2015 after favorable performance in CY 2014. Projections for CYs 2016 and 2017 are unfavorable.

### **IV. Recommendation**

Since Riverside/UMHP is a new MCO, one would expect ramp up during its first few years. However, based on existing expectations, UMHP will have unfavorable performance for three years in a row.

**Therefore:**

- (1) Staff recommends approval of this alternative rate application for a one-year period beginning January 1, 2017 however, staff is placing UMHP on a watch list as described in item (2) below.**
- (2) Since sustained losses, such as those currently being experienced by UMHP, may be construed as a loss contract necessitating termination of this arrangement, staff is recommending the following actions:**
  - a. On the earlier of July 1, 2017 or if /when Medicaid applies a mid-year adjustment, UMHP shall report to HSCRC staff on the impact that any such adjustment is expected to have on CY 2017 financial performance.**
  - b. HSCRC staff shall be cognizant of the MCO's financial performance and**

the potential for a loss contract in considering any requested adjustments to rates or global budgets of the associated hospitals during FYs 2017 and 2018.

- c. In addition to the report provided in (2)(a), UMHP shall report to Commission staff (on or before the September 2017 meeting of the Commission) on the actual CY 2016 experience, preliminary CY 2017 financial performance (adjusted for seasonality) of the MCO, as well as projections for CY 2018.

- (3) Consistent with its policy paper outlining a structure for review and evaluation of applications for alternative methods of rate determination, the staff recommends that this approval be contingent upon the continued adherence to the standard Memorandum of Understanding with the Hospitals for the approved contract. This document formalizes the understanding between the Commission and the Hospitals, and includes provisions for such things as payments of HSCRC-approved rates, treatment of losses that may be attributed to the managed care contract, quarterly and annual reporting, the confidentiality of data submitted, penalties for noncompliance, project termination and/or alteration, on-going monitoring, and other issues specific to the proposed contract. The MOU also stipulates that operating losses under managed care contracts may not be used to justify future requests for rate increases.

**Final Recommendation for the Baltimore Population  
Health Workforce Collaborative Award under the  
Population Health Workforce Support for  
Disadvantaged Areas Program (PWSDA)**

Appendix I. BPHWC Proposal Summary.....6

## OVERVIEW

The Maryland Department of Health and Mental Hygiene (Department or DHMH) and the Maryland Health Services Cost Review Commission (HSCRC or Commission) are recommending that the revised Baltimore Population Health Workforce Collaborative (BPHWC) proposal for a competitive Population Health Workforce Support for Disadvantaged Areas Program (PWSDA) grant be funded, beginning in fiscal year (FY) 2017. This recommendation follows the Commission's decision in December 2015, which authorized up to \$10 million in hospital rates for hospitals that commit to train and hire workers from geographic areas of high economic disparities and unemployment. These workers will fill new care coordination, population health, health information exchange, health information technology, consumer engagement, and related positions. The ultimate goals of the program are to create community-based jobs that pay reasonable wages, contribute to improving population health in Maryland, and further the goals of the All-Payer Model.

The PWSDA program will continue through June 30, 2018, on a hospital-specific basis, assuming the hospital's ongoing compliance with the grant requirements. The grants could be renewed as of July 1, 2018, for an additional period, should the Commission find that the program is effective.

## BACKGROUND

The Commission received three proposals for award funding. Commission staff established an independent committee to review the grant proposals and make recommendations to the Commission for funding. The PWSDA Implementation Award Review Committee (Review Committee) included representatives from the Department, the Commission, and other subject matter experts, including individuals with expertise in such areas as population health, health disparities, workforce development and adult learning, health education, healthcare career advancement, and workplace and employee wellbeing.

Following a comprehensive initial review, two of the three applicants were invited to provide clarifying information related to their proposals. The full proposals of the two applicants that were considered for approval (Garrett Regional Memorial Hospital and Baltimore Population Health Work Force Collaborative) may be found on the Commission's website at <http://www.hscrc.maryland.gov/rfp-pwsda.cfm>. The Garrett Regional Memorial Hospital proposal was approved by the Commission on September 14, 2016.

Following additional consideration, the Review Committee is pleased to present a recommendation to the Commission to fund the revised BPHWC. The Review Committee is strongly encouraged that this proposal will leverage the unique position that hospitals hold as economic pillars of their communities and create strong partnerships with community-based providers to respond to ongoing socioeconomic and health disparities in Baltimore. After deliberations by the Review Committee and Commission staff, we recommend that the Commission approve a first round of rate support to the BPHWC for a total of \$6,875,666 across FYs 2017 through 2019.

## **COMPETITIVE POPULATION HEALTH WORKFORCE SUPPORT FOR DISADVANTAGED AREAS PROGRAM REQUEST FOR PROPOSALS**

In order to improve population health and address disparities in the community, the Department, in collaboration with the HSCRC, released a request for proposals (RFP) for funding to implement the PWSDA on May 1, 2016. HSCRC received three applications by the extended due date of June 30, 2016.

The RFP invited proposals to support job opportunities for individuals who reside in neighborhoods with a high area deprivation index (ADI), and thus enable low-income urban, suburban, and rural communities to improve their socioeconomic status while working to improve population health. The overall objective is to address the social determinants of health and assist hospitals in bolstering population health and meeting the goals of the All-Payer Model.

The RFP limits the award total to \$10 million in hospital rates over a three-year period, with the condition that hospitals provide matching funds of at least 50 percent of the amount included in their rates. The applicants were required to explain how they will use these rate increases to support the training and hiring of individuals consistent with the program.

Funding will be allocated through HSCRC-approved rate increases for hospitals that train and/or hire individuals from deprived areas, with the expectation of reducing potentially avoidable utilization for Medicare and promoting population health in Maryland. Awardees will be required to report on the status of their ongoing implementation activities within six months of the initial award and annually thereafter.

### **THE REVIEW COMMITTEE AND EVALUATION CRITERIA**

The review committee gave preference to those models that included the following characteristics/features:

- Specific target population that could be trained and recruited to bolster population health and help reduce hospital utilization
- Strong collaboration with community organizations that will facilitate recruitment of potential trainees who live in disadvantaged communities
- Efficient training to provide to selected individuals who will be employed in health-related positions, (e.g., community healthcare workers, peer recovery specialists, case managers, patient care workers, transport facilitators, etc.)
- Defined settings where trained workers can deliver the intended services to patients and other community members and contribute to promoting the health of the Maryland population
- Consistency with the goals of the All-Payer Model
- Focus on patient-centered care
- Valid implementation plan

- Reasonable budget

The review committee established evaluation and weighting criteria in each of the following categories:

1. Needs assessment (the disadvantaged community and the target workforce ) -10 points
2. Work plan (partnership(s) with community organization(s), type of training, qualifications of the trainees, implementation, and employment retention) - 30 points
3. Evaluation (tracking and reporting; strategy to evaluate process and outcomes) -10 points
4. Sustainability, impact, and replicability by others -15 points
5. Resources (community resources, trainers, and organizations) -10 points
6. Support requested (budget and its justification) – 25 points

The review committee gave preference to those proposals that included the following characteristics/features:

- The likelihood that the proposed programs would be successful in reducing avoidable utilization and improving population health
- The operational readiness and sustainable staffing detail of the proposal
- The overall feasibility of the proposal to be successful

## **RECOMMENDATIONS**

### **Recommended Awardee**

The BPHWC initially proposed a plan requesting a cumulative amount of \$9.8 million through rates (\$14.8 in total) to provide essential skills training to 578 individuals, provide technical skills training to 238 individuals, and sustainably employ 120 full-time and 15 part-time individuals from disadvantaged areas. The Review Committee and staff asked BPHWC to revise its request to include incremental costs (not cumulative costs) based on reasonable ratios of individuals trained and employed, as well as sustainably employing a greater number of individuals from disadvantaged areas.

After meeting with partners and other stakeholders, BPHWC submitted a revised budget and requested that funding be provided in two phases. This recommendation represents the first phase of the requested rate funding. Any request for the second phase of funding would need to be submitted to staff for review. The revised proposal for the first phase would provide essential skills training to 444 individuals, provide technical skills training to 263 individuals, and sustainably employ 208 individuals by the third year of the project.

Staff recommends the following for Commission approval of the BPHWC proposal:

FY 2017 PWSDA Implementation Awards

- Award \$6,675,666, to be phased in over three years based on proposed expenses (approximately \$1.97 million in FY 2017, an additional \$4.23 million in FY 2018, and an additional \$470,047 in FY 2019).
- Require the participating hospitals to contribute 50 percent of the amount provided in rates (approximately \$3,337,833).
- With the resurgence of violence in Baltimore City, add \$300,000 to the Sinai Hospital portion of the proposal to expand the Safe Streets Program by one additional “pod.” Sinai Hospital shall contribute \$100,000 of the \$300,000. Individuals hired to support this program shall be from disadvantaged areas as defined in the RFP.
- Authorize Commission staff to review and approve a second phase of funding provided that BPHWC:
  - Meets the letter and spirit of the RFP
  - The total amount provided in rates to all hospitals (including the amount approved for Garrett Regional Hospital) does not exceed \$10 million when fully phased in by FY 2019

Table 1 below lists the recommended award amounts from rates and the hospitals affected. A summary of the recommended proposal may be found in the Appendix.

<b>Total</b>		<b>\$6,875,666</b>	

## REPORTING AND EVALUATION

The December 2015 approved Commission recommendations required that:

- Hospitals receiving funding under this program shall report to the Commission by May 1, 2017, and each year thereafter on:
  - The number of workers employed under the program
  - How many of those workers have been retained
  - The types of jobs that have been established under the program
  - How many patients or potential patients have been assisted through these positions
  - An estimate of the impact that these positions have had in reducing potentially avoidable utilization or in meeting other objectives of the All-Payer Model
- Awardees report periodically to the Commission on their program, including an annual report beginning on May 1, 2017
- The Commission evaluate the effectiveness of the program prior to July 1, 2018, to determine if the program should be continued in general, or for individual hospitals
- The Commission utilize external resources in collecting and evaluating proposals, reporting on the results of implementing the program, and assisting in evaluating its effectiveness

Following Commission approval of the awards, staff will provide each awardee with a template for monitoring and reporting on the performance of the programs in meeting the goals of the All-Payer Model and consistency with the application proposal. The Commission reserves the right to terminate or rescind an award at any time for material lack of performance or for not meeting the letter or intent of an application. Pursuant to the Commission mandate, staff will review the program before June 30, 2018, on each hospital's compliance with program requirements and to determine whether the program overall is meeting the Commission's goals. Staff will propose recommendations to the Commission based on their findings.

## APPENDIX I. BPHWC PROPOSAL SUMMARY

Johns Hopkins Hospital; Johns Hopkins – Bayview; LifeBridge Sinai; MedStar Franklin Square Medical Center; MedStar Harbor Hospital; MedStar Good Samaritan Hospital; MedStar Union Memorial Hospital; University of Maryland Medical Center; University of Maryland – Midtown Campus.

<b>Applicant</b>	Baltimore Population Health Workforce Collaborative (BPHWC)
<b>Date of Submission</b>	5/27/2016 original submission; 10/04/2016 revised submission
<b>Health System Affiliations</b>	Johns Hopkins MedStar Lifebridge University of Maryland
<b>Total Rate Request</b>	\$6,675,666

<b>Summary of the Proposal</b>	
<p>A consortium of four major health systems that includes nine hospitals proposes to train and hire individuals from high poverty communities in the Baltimore Metropolitan area to be community healthcare workers (CHWs), peer outreach specialists (PRSs), and certified nursing /geriatric nursing assistants (CNAs/GNAs). They propose to partner with the Baltimore Alliance for Careers in Healthcare (BACH), which will coordinate the recruitment and training of individuals from the community. BACH will rely on several community organizations to select, screen, and provide essential skills training to the potential recipients of the PWSDA program. They will also target hospital employees from “high poverty communities” to train and promote them to positions with a “career ladder.” They propose to screen, select, and train 444 individuals in essential skills over three years. Of these individuals, 263 will be trained as CHWs, PRSs, or CNAs/GNAs. For the first two positions, individuals will complete 160 and 50 hours, respectively, of occupational skills training before being recruited. For the CNA position, training and certification will take place at the Baltimore County Community College. The applicant projected that the hospitals will hire 208 individuals by the third year of the program.</p>	

<b>Work Plan for the First Year</b>	
<b>Month 1</b>	<ol style="list-style-type: none"> <li>1. Execute agreements with BACH and its training programs.</li> <li>2. Establish BPHWC steering committee, comprised of health system representatives.</li> <li>3. Ongoing evaluating, learning, and making adjustments; adding new community partners when indicated.</li> </ol>
<b>Month 2</b>	<ol style="list-style-type: none"> <li>1. Begin essential skills training.</li> <li>2. Provide training on data collection to training partners.</li> <li>3. Establish and post new CHW, PRS and CNA job descriptions.</li> </ol>
<b>Month 3</b>	<ol style="list-style-type: none"> <li>1. Begin CHW, PRS, and CNA training sessions.</li> </ol>
<b>Months 4 and 5</b>	<ol style="list-style-type: none"> <li>1. Move qualified trainees into employment.</li> <li>2. Connect participants with career coaches.</li> <li>3. Develop individual workforce development plans for new employees.</li> </ol>

Steve Ports  
Deputy Director  
Health Services Cost Review Commission  
4160 Patterson Avenue  
Baltimore, Maryland 21215

Deputy Director Ports:

On behalf of the Baltimore Population Health Workforce Collaborative I am writing to provide additional information regarding the proposed plan. As you know from the revised budget submitted last week, we recalculated the budget based on incremental costs rather than cumulative costs, assumed a more reasonable ratio of individuals trained and employed as well as sustainably employing a greater number of individuals from disadvantaged areas.

The changes resulted in a budget for this proposal totaling \$6,675,000 in hospital rates with the participating hospitals contributing an additional \$3,337,833. This does not include the \$300,000 (\$200,000 in rates and \$100,000 from Sinai) for the Safe Streets Program.

Given the revised budget and the remaining funds available from the \$10 million the Commission has approved, we are planning to submit a second phase of the collaborative to train and hire additional individuals from the disadvantaged areas. We are currently working on identifying the jobs we collectively need to advance our goals for improving the health of our communities.

Thank you for your support and assistance in making the Baltimore Population Health Workforce Collaborative a success.

Sincerely,

Pegeen A. Townsend  
Vice President

Mr. Nelson J. Sabatini, Chairman  
Health Services Cost Review Commission  
4160 Patterson Ave  
Baltimore, MD 21215

Dear Chairman Sabatini, Commissioners and Staff of the HSCRC,

1199SEIU supports the final proposal submission from the Baltimore Population Health Workforce Collaborative (BPHWC).

After a productive meeting with a number of the stakeholders of the Baltimore Population Health Workforce Collaborative, and discussing the proposal in greater detail, we believe that the proposal will ultimately benefit individuals who live in economically disadvantaged communities. Although we believe that the hospital systems included in the Collaborative should be obligated to hire more individuals from the community than the 208 workers proposed, we are hopeful that the program can nevertheless effectuate positive change. We believe that the community organizations involved will strive to ensure that as many individuals as possible have a pathway to the kind of employment that will positively impact both their own individual lives and the broader health of their communities.

Sincerely,

Executive Vice-President

RY	Maryland HSCRC Rate Year
VBP	Value-based purchasing

## INTRODUCTION

The Maryland Health Services Cost Review Commission's (HSCRC's or Commission's) quality-based measurement and payment initiatives are important policy tools for providing strong incentives for hospitals to improve their quality performance over time. These initiatives hold amounts of hospital revenue at risk directly related to specified performance benchmarks. Maryland's Quality-Based Reimbursement (QBR) program employs measures that are similar to those in the federal Medicare Value-Based Purchasing (VBP) program. Because of its long-standing Medicare waiver for its all-payer hospital rate-setting system, the Centers for Medicare & Medicaid Services (CMS) has given Maryland various special considerations, including exemption from the federal Medicare VBP program. In its place, the HSCRC implements the Maryland-specific QBR program, which is discussed in further detail in the background section of this report.

HSCRC implemented the first hospital payment adjustments for the QBR program in July 2009. The QBR program currently measures hospital performance in the following areas: clinical care (process and outcomes), patient safety, and patient experience of care. The purpose of this report is to make recommendations for the QBR program for fiscal year (FY) 2019. These recommendations include: updating the measurement domains consistent with the direction of the CMS VBP Program, updating the scaling of rewards and penalties retrospectively for RYs 2017 and 2018 and prospectively for RY 2019, and holding steady the amount of total hospital revenue at risk for the QBR Program.

## BACKGROUND

### Federal VBP Program

The Affordable Care Act (ACA) established the hospital VBP program,<sup>1</sup> which requires CMS to reward hospitals with incentive payments for the quality of care provided to Medicare beneficiaries. The program assesses hospital performance on a set of measures in the following domains: the clinical process of care, patient experience of care, efficiency (i.e., Medicare spending per beneficiary), and safety. The incentive payments are funded by reducing the base operating diagnosis-related group (DRG) amounts that determine the Medicare payment for each hospital inpatient discharge.<sup>2</sup> The ACA set the reduction at 1 percent in federal fiscal year (FFY) 2013 and required that it increase incrementally to 2 percent by FFY 2017.<sup>3</sup>

CMS implemented the VBP Program with hospital payment adjustments beginning in October 2013. For the FFY 2018 (October 1, 2017 to September 30, 2018) VBP Program, CMS measures

---

<sup>1</sup> For more information on the VBP program, see <https://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/hospital-value-based-purchasing/index.html?redirect=/Hospital-Value-Based-Purchasing/>

<sup>2</sup> 42 USC § 1395ww(o)(7).

<sup>3</sup> 42 USC § 1395ww(o)(7)(C).

will include the following four domains and their relative weights in determining hospital final performance scores, with two percent of Medicare hospital payments at risk:

- Clinical care: weighted 25 percent
- Patient experience of care: weighted 25 percent
- Efficiency/Medicare spending per beneficiary: weighted 25 percent
- Safety: weighted 25 percent

HSCRC staff also notes that, for the VBP program for FFY 2018, CMS measure changes included:

- **Clinical Care**- removed AMI-7a- Fibrinolytic agent received and the IMM-2 Influenza Immunization process measures
- **Safety**- Added the PC-01 Early Elective delivery induction or cesarean section
- **Patient experience of care**- added the CTM-3 Care Transition Measure

For FFY 2019 VBP program, CMS has changed the Patient Experience of Care domain name to Patient and Community Engagement, and although not final, proposes no change to the domain weights from those used for FFY 2018.

## Maryland's QBR Program

Maryland's QBR program is similar to the federal VBP program and assesses hospital performance on a similar set of domains: clinical care (process and outcomes), patient safety, and patient experience of care. The HSCRC sets aside a percentage of hospital inpatient revenue to be held at risk for the QBR program and allocates a percentage of this amount across the three domains in a process that is referred to as scaling.<sup>4</sup> After each hospital's score is calculated, rewards (referred to as positive scaled amounts) or penalties (referred to as negative scaled amounts) are then applied to each hospital's update factor for the rate year. The rewards or penalties are applied on a one-time basis and are not considered permanent revenue.

For the FY 2018 QBR program, the HSCRC will weight the clinical care measure at 15 percent of the final score, the safety measures at 35 percent, and the patient experience of care measures at 50 percent. The HSCRC will also scale a maximum penalty of two percent of approved base hospital inpatient revenue. Figure 1 compares the QBR weighting for each domain with the CMS VBP weighting.

---

<sup>4</sup> Scaling refers to the differential allocation of a pre-determined portion of base-regulated hospital inpatient revenue based on assessment of the quality of hospital performance.

Figure 1. Domain Weights for the CMS Hospital VBP and Maryland QBR Programs for FY 2018

	Clinical Care	Patient Experience	Safety	Efficiency
<b>CMS VBP</b>	25% (3 measures: condition-specific mortality)	25% (9 measures: HCAHPS + CTM)	25% (8 measures: infection, PSI, PC01)	25% (spending per beneficiary measure)
<b>Maryland QBR</b>	15% (1 measure: all cause inpatient mortality)	50% (9 measures: HCAHPS + CTM)	35% (8 measures: infection, PSI, PC01)	N/A

HSCRC staff worked with stakeholders over the last several years to align the QBR measures, thresholds, benchmark values, time lag periods, and amount of revenue at risk with those used by the CMS VBP program where feasible,<sup>5</sup> allowing the HSCRC to use data submitted directly to CMS. Maryland has not yet implemented an efficiency measure equivalent to the CMS VBP approach, but we have begun development of a similar measure. We do apply a potentially avoidable utilization savings adjustment to hospital rates based on their costs related to potentially avoidable admissions as measured by the Agency for Healthcare Research and Quality Prevention Quality Indicators (PQIs), and to 30-day readmissions (including observation cases that are greater than 23 hours). HSCRC staff will continue to work with key stakeholders to complete development of an efficiency measure that incorporates population-based cost outcomes.

### VBP Exemption Provisions

Under Maryland’s previous Medicare waiver, VBP exemptions were requested and granted for FYs 2013 through 2015. The CMS FY 2015 Inpatient Prospective Payment rule stated that, although exemption from the hospital VBP program no longer applies, Maryland hospitals will not be participating in the VBP program because §1886(o) of the ACA<sup>6</sup> and its implementing regulations are waived under Maryland’s New All-Payer Model, subject to the terms of the Model agreement as excerpted below:

- “4. Medicare Payment Waivers.** Under the Model, CMS will waive the requirements of the following provisions of the Act as applied solely to Regulated Maryland Hospitals:
- e. Medicare Hospital Value Based Purchasing.** Section 1886(o) of the Act, and implementing regulations at 42 CFR 412.160 - 412.167, only insofar as the State

<sup>5</sup> HSCRC has used data for some of the QBR measures (e.g., CMS core measures, CDC NHSN CLABSI, CAUTI) submitted to the Maryland Health Care Commission (MHCC) and applied state-based benchmarks and thresholds for these measures to calculate hospitals’ QBR scores up to the period used for Rate Year 2017.

<sup>6</sup> Codified at 42 USC § 1395ww(o).

submits an annual report to the Secretary that provides satisfactory evidence that a similar program in the State for Regulated Maryland Hospitals achieves or surpasses the measured results in terms of patient health outcomes and cost savings established under 1886(o) of the Act....”

Under the New All-Payer Model, HSCRC staff submitted exemption requests for FYs 2016 and 2017 and received approvals from CMS on August 27, 2015, and April 22, 2016 (see Appendix I).

## ASSESSMENT

### Performance Results on QBR and VBP Measures Used for FY 2017

Consistent with work done in past years to support identifying important areas of focus in updating the QBR program policy, staff has analyzed Maryland hospital performance to date on the QBR and VBP available measures.

Staff analyzed Maryland statewide performance trends over time and compared to the nation, using the most current data available. The results are summarized in Figures 2 and 3 below. The detailed statistics are provided in Appendix II.

Figure 2 provides final RY 2017 QBR hospital scores by domain. Reflecting the statewide performance on Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS) patient experience domain, scores are lowest for this domain with an average score of 0.24 and maximum score of 0.54. The domain with the next lowest scores is safety which is also the second highest weighted domain.

**Figure 2. Ry 2017 QBR Scores Distribution by Domain**

Domains	HCAHPS Score	Clinical/ Process Score	Mortality Score	Safety Score	QBR Score
<b>Weights</b>	<b>45%</b>	<b>15%</b>	<b>5%</b>	<b>35%</b>	<b>100%</b>
<b>Minimum Score</b>	0.03	0.00	0.00	0.00	0.07
<b>25th percentile</b>	0.16	0.40	0.33	0.25	0.31
<b>Median</b>	0.23	0.60	0.60	0.39	0.38
<b>Average</b>	0.24	0.56	0.60	0.40	0.37
<b>75th Percentile</b>	0.30	0.80	0.88	0.54	0.43
<b>Maximum Score</b>	0.54	1.00	1.00	1.00	0.72
<b>Coefficient of Variation</b>	46%	59%	48%	54%	30%

In general, as illustrated in Figure 3, Maryland continued to have worse rates than the nation in patient experience measures and better rates in mortality measures; infection rates have improved, with exception of one infection category.

Figure 3. QBR Measures Dashboard

	Worse than the National Rate	Worsened	Worse Compared to Base
	Better than the National Rate	Improved	Better Compared to Base

MRSA	1.20	-10.71%	0.20%
C.diff.	1.15	-0.26%	0.15%

### *Patient Experience of Care Measures*

Staff compared the most currently available base and performance periods' data for HCAHPS, i.e. Q4-2013 to Q3-2014 and Q4-2014 to Q3-2015 (see Appendix II).

- For the eight measures in aggregate, Maryland statewide performance lags behind the nation for both periods and the gap slightly widened between Maryland and the nation across the two time periods with Maryland 6.19% lower than the nation for Q4-2013 to Q3-2014 and 6.49% lower for Q4-2014 to Q3-2015.
- The nation remained static on 5 measures and improved slightly on 3 measures across the two time periods while Maryland declined on 1 measure, improved slightly on 2 measures and remained static on 5 measures.
- On the three-part care transitions measure added to the HCAHPS survey and adopted for the FY 2018 VBP and QBR programs, Maryland performs significantly below the nation for the data periods Q4-2013 to Q3-2014 and Q4-2014 to Q3-2015, and performance for both Maryland and the nation remains static for the two time periods.<sup>7</sup>
- Additional analysis comparing Maryland to the nation since 2012 illustrates that Maryland's performance declined in 2013 compared to 2012, and then improved slightly in 2014 and 2015, but the nation has had only modest improvement year over year from 2012 to 2015. (See Figure 4).

**Figure 4. Maryland and National HCAHPS Scores over Time**

---

<sup>7</sup> The Care-Transitions Measure is a composite of three questions related to patients' and caregivers' understanding of necessary follow-up care post-discharge, detailed in questions 23-25 of the HCAHPS survey. For specifics on the measure, including question language, please see:

[https://mhdo.maine.gov/pdf/CTM%20Microspecifications%20Manual\\_%20Nov%202013\\_final.pdf](https://mhdo.maine.gov/pdf/CTM%20Microspecifications%20Manual_%20Nov%202013_final.pdf).

### ***Mortality Measures***

On the three CMS condition specific 30 day AMI, CHF and pneumonia mortality measures (See Appendix II) used in the VBP program, for the data periods Q3-2010 to Q2-2013 and Q3-2011 to Q2-2014:

- Maryland performed better than the nation with lower mortality rates on all three measures for both time periods.
- Both Maryland and the nation show improvement over the two time periods.
- The gap between Maryland and the nation is narrowing slightly for all three measures across the two time periods.

CMS and HSCRC are evaluating the accuracy of risk adjustment for the CMS mortality measures due to concerns about inaccurate ICD codes in the Medicare claims for Maryland hospitals.

For the Maryland inpatient, all-payer, all-cause mortality measure used for the QBR program, Maryland's mortality rate declined for CY 2015 compared to CY 2014, as illustrated in the table in Appendix II.

### ***Safety Measures***

For the data periods Q4-2013 to Q3-2014 and Q4-2014 to Q3-2015:

- For the early elective induction or Cesarean section delivery measure (PC-01), staff notes Maryland performed better than the nation in the Q4-2013 to Q3-2014 period, but worse with a sharp increase in the Q4-2014 to Q3-2015 period. By contrast, the nation improved from the earlier to the latter period. Staff is investigating this increase including any potential data reliability concerns as one hospital with a sharp increase in the early elective deliveries appears to drive the sharp increase (See Appendix II).
- For Centers for Disease Control National Health Safety Network (CDC NHSN) Standardized Infection Ratio (SIR) measures compared to an earlier national base reference period where the SIR was established at the value of 1 (See Appendix II), Maryland statewide performance is:
  - For central line-associated blood stream infections (CLABSI), better than the national baseline for both the earlier and latter periods, and also slightly improving over time.
  - For catheter-associated urinary tract infections (CAUTI), worse in the earlier period and better in the latter period than the national baseline, and improving significantly over time.
  - For surgical site infections (SSI) Hysterectomy, worse in the earlier period and better in the latter period than the national baseline, and improving significantly over time.
  - For SSI Colon, worse than the national baseline in the earlier and latter periods and worsening over time.
  - For Methicillin-resistant Staphylococcus aureus (MRSA), worse than the national baseline in the earlier and latter periods and improving over time.

- For C. difficile (C.diff.), worse than the national baseline in the earlier and latter periods and improving slightly over time.

In summary, Maryland's infection rates were better than the nation only in CLABSI, with the worse performance in CAUTI, which was 65.90% higher than the national rates in the earlier base period. Since the values posted to Hospital Compare are relative to the national average of 1, we can only compare Maryland's rate to the national benchmarks rather than calculating the improvement rates. Maryland's rate is now below the national baseline rate in CAUTI, and SSI-Abdominal Hysterectomy rates. Maryland's standing has improved for the rest of the infections except for SSI – Colon, which jumped from 5.50% higher than the national average to 18.50 % higher.

### **Additional Measure Results**

Staff also analyzed Maryland performance relative to the nation, and over time to the extent the data were available, on the Total Hip and Knee Arthroplasty (THA/TKA) complication measure and on emergency department wait time measures.

For the data periods Q4-2013 to Q3-2014 and Q4-2014 to Q3-2015:

- For the newly published THA/TKA complication measure, performance results were only available for the latter time period. Hospital Compare reports that all Maryland hospitals perform “as expected” on this measure (with exception of one hospital that is better and one that is worse than expected) compared with the nation; staff supports adopting the measure for the FY 2019 QBR program, consistent with the VBP program.
- Staff notes that Maryland performs poorly on the ED wait time measures compared to the nation. In addition Maryland's performance is worsening over time as is the nation's. Therefore, staff strongly advocates “active” monitoring of the ED wait times measures with consideration as to the feasibility of adding these measures to the QBR program in future years (See Appendix II).

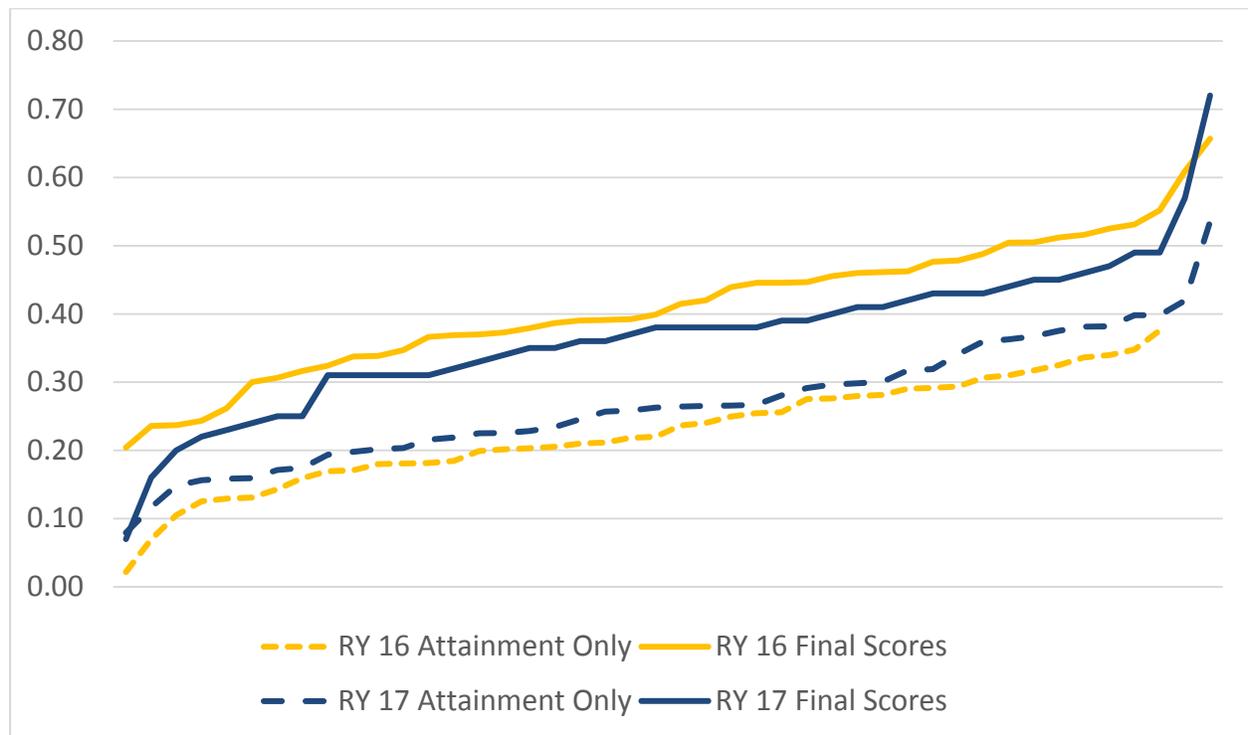

### **QBR RY 2017 Final Scores and Reward and Penalty Preset Scale**

Similar to other quality-based programs, the QBR methodology for calculating rewards and penalties was fundamentally modified for FY 2017 such that the level of rewards or penalties are determined based on performance points achieved relative to a preset scale rather than a relative ranking of the hospitals after the performance period. This transition coincided with major changes in the measures used for QBR program which entailed removal of process measures (which had higher scores), increasing the weight of HCAHPS scores (which had lower scores), and tying the benchmarks to the national distribution. At the time, staff did not have enough data to thoroughly model the implications of these changes on the performance points and set the payment adjustment scale based on the base year performance results. Hospital pay for performance programs implemented nationally and in Maryland score hospitals both on attainment (level of rates compared to benchmarks) and on improvement (rate of change from the baseline). Figure 5 below shows the difference between the attainment only scores for RYs

2016 and 2017 versus the final scores for each year, illustrating a significant increase in the final scores when improvement is taken into account. Due to lack of data, staff was not able to model the final scale for RY 2017 and agreed to set the points for the attainment only scale given the major changes in the program described above.

Staff analyzed hospital performance scores relative to the QBR preset scale determined last year and notes that almost all hospitals receive a reward for RY 2017 despite relatively poor performance, as noted above. With the recommendation to make retrospective adjustments to the readmission policy, staff had noted the issue with the QBR scaling at the June Commission meeting, and has been working since then on understanding the implications. Expecting changes to the results, RY 2017 rate orders and global budgets were sent without QBR program adjustments. Based on the analysis of attainment vs improvement points, staff asserts that the RY 2017 preset scale was set too low because it was developed using base period data to calculate attainment only scores and, again, did not take into account improvement trends. The intention to use preset scale was to improve predictability of the payment adjustments, not to lower the scale. Therefore, the Commission staff proposes a retrospective adjustment to the QBR preset scale for RY 2017 and RY 2018 as part of the RY 2019 QBR draft policy. Appendix III provides the results based on current and proposed scaling adjustments. This change will result in 20 hospitals receiving penalties totaling \$20.5 million, and 26 hospitals receiving rewards totaling \$10.6 million rewards.

**Figure 5. QBR RY 2016-RY 2017 Attainment Only and Final Scores**

## RECOMMENDATIONS

Staff commends the work of hospitals to continue to improve performance on the QBR program in light of the state's overall improvement trend, and in particular notes the state's sustained improvement trends in the Maryland inpatient, all cause, all payer mortality rate used for the QBR program as well as the CMS three condition-specific mortality measures used for the VBP program. Infection rates also improved in the state for four out of five measures. Staff also notes the continued improvement on the HCAHPS measures, as this measure constitutes 50% of hospitals' QBR scores, and at the same time recognizes the gap that remains between Maryland and national performance.

Based on the above staff observations and analysis, staff makes the following draft recommendations:

1. Adjust retrospectively the RY 2017 and RY 2018 QBR preset scale for determining rewards and penalties such that the scale takes into account attainment and improvement trends.
2. For RY 2019, use the preset scale based on RY 2017 final scores.
3. Continue to use the same domain weights: the clinical care measure at 15 percent of the final score, the safety measures at 35 percent, and the Patient and Community Engagement measures at 50 percent.
4. Continue to set the maximum penalty at two percent and the maximum reward at one percent of approved hospital inpatient revenue.

## APPENDIX I. VBP EXEMPTION REQUEST APPROVALS

DEPARTMENT OF HEALTH & HUMAN SERVICES

Office of the Administrator  
Washington, D.C. 20201

August 27, 2015

Ms. Donna Kinzer  
Executive Director, Maryland Health Services Cost Review Commission  
State of Maryland Department of Health and Mental Hygiene  
4160 Patterson Avenue  
Baltimore, MD 21215

Dear Ms. Kinzer:

Thank you for your letter, on behalf of the State of Maryland, requesting an exemption from the FY 2016 Hospital Value-Based Purchasing (VBP) Program. As you know, Section 4(e) of the Maryland All-Payer Model Agreement provides that CMS will waive the VBP Program requirements for Maryland hospitals, as set out in Section 1886(o) of the Social Security Act and implementing regulations at 42 CFR 412.160 - 412.167, provided that the State submits "an annual report to the Secretary that provides satisfactory evidence that a similar program in the State for Regulated Maryland Hospitals achieves or surpasses the measured results in terms of patient health outcomes and cost savings established under 1886(o) of the Act."

The Centers for Medicare & Medicaid Services (CMS) has reviewed your exemption request and supporting documentation. We officially grant the State of Maryland's exemption request for its hospitals as authorized by Section 1886(o)(1)(C)(iv) of the Act based on the fact that the Maryland program achieved or exceeded patient health outcomes measured in the Hospital VBP Program. CMS has also determined that the Maryland program meets the cost savings requirement for exemption from the Hospital VBP Program for FY 2015 because both programs reward high performers in a revenue-neutral manner.

Last year, when approving your request for an exemption from the Hospital VBP Program for FY 2014, we noted that your state's performance in the Patient Experience of Care domain significantly lagged behind national medium performance levels, and we strongly encouraged you to take steps to improve performance in that domain. Maryland's performance continues to lag behind the nation in Patient Experience of Care, however, as you indicated in your exemption request, you have assigned comparatively more weight to Hospital Consumer Assessment of Healthcare Providers and Systems performance in the Maryland program, and you are considering increasing that weight by an additional 5%. We support these efforts to improve Patient Experience of Care and we are eager to assist you in helping hospitals improve in this domain by other means.

Should you have any questions, please do not hesitate to contact the Maryland All Payer Model Team.

Sincerely,

A handwritten signature in black ink that reads "Patrick Conway, MD". The signature is written in a cursive, slightly slanted style.

Patrick Conway, MD, MSc

Acting Principal Deputy Administrator, CMS

Chief Medical Officer, CMS

**Center for Medicare and Medicaid Innovation**

---

April 22, 2016

Ms. Donna Kinzer

Executive Director, Maryland Health Services Cost Review Commission State of Maryland  
Department of Health and Mental Hygiene  
4160 Patterson Avenue  
Baltimore, MD 21215

Dear Ms. Kinzer:

Thank you for your letter, on behalf of the State of Maryland, requesting an exemption from the FY 2017 Hospital Value-Based Purchasing (VBP) Program. As you know, Section 4(e) of the Maryland All-Payer Model Agreement provides that CMS will waive the Hospital VBP Program requirements for Maryland hospitals, as set out in Section 1886(0) of the Social Security Act and implementing regulations at 42 CFR 412.160 412.167, provided that the State submits "an annual report to the Secretary that provides satisfactory evidence that a similar program in the State for Regulated Maryland Hospitals achieves or surpasses the measured results in terms of patient health outcomes and cost savings established under 1886(0) of the Act."

The Centers for Medicare & Medicaid Services (CMS) has reviewed your exemption request and supporting documentation. We officially grant the State of Maryland's exemption request for its hospitals as authorized by Section 1886(o)(1)(C)(iv) of the Act based on the fact that the Maryland program achieved patient health outcomes and clinic process scores not significantly different from those measured in the Hospital VBP Program. CMS has also determined that the Maryland program meets the cost savings requirement for exemption from the Hospital VBP Program for FY 2017 because both programs reward high performers in a revenue-neutral manner.

Last year, when approving your request for an exemption from the Hospital VBP Program for FY 2016, we noted that your state's performance in the Patient Experience of Care domain using data from 2014 significantly lagged behind national medium performance levels, and we strongly encouraged you to take steps to improve performance in that domain. Maryland's performance continues to lag behind the nation in Patient Experience of Care. As indicated in your exemption request, you have assigned comparatively more weight to Hospital Consumer Assessment of Healthcare Providers and Systems performance in the Maryland program, and you are continuing to increase the weight even more in the coming years. We support these efforts to improve Patient Experience of Care and we are eager to assist you in helping hospitals improve in this domain in any way possible.

Should you have any questions, please do not hesitate to contact the Maryland All Payer Model Team.

Sincerely,

A handwritten signature in black ink, appearing to read 'Stephen Cha', written in a cursive style.

Stephen Cha, MD, MHS  
Director, State Innovations Group,  
Center on Medicare and Medicaid Innovation,  
Centers for Medicare and Medicaid Services

## APPENDIX II. QBR MEASURES PERFORMANCE TRENDS

Figure 1. HCAHPS Analysis

MRSA	1.344	1	34.40%	1.200	1	20.00%
C.diff.	1.150	1	15.00%	1.147	1	14.70%

<sup>8</sup> NOTE: The score of 5 is from the previous quarter (Q314-Q215). We are in the process of validating the data for the most recent quarter.

\*Infection measures are expressed as standardized infection ratios (SIRs), adjusting for several risk factors that have been found to be significantly associated with differences in infection incidence. The SIR is calculated by dividing the number of observed infections by the number of expected infections, using infection rates from a standard population during a baseline time period. A SIR greater than 1.0 means that more HAIs were observed in a facility or state than predicted, and a SIR less than 1.0 means there were fewer HAIs observed than predicted. A score of 0, meaning no infections, is best.

**Figure 5. Emergency Department Wait Times for Monitoring**

### OVERVIEW

The Maryland Department of Health and Mental Hygiene (“Department”, or “DHMH”) and the Maryland Health Services Cost Review Commission (“HSCRC,” or “Commission”) are recommending that five proposals for health system transformation grants be partially funded, beginning in fiscal year 2017. This recommendation concludes the Commission’s decision in June 2015 to authorize up to 0.25 percent of total hospital rates to be distributed to grant applicants under a competitive process for “shovel-ready” care transformation improvements that will generate more efficient care delivery in collaboration with community providers and entities and achieve immediate results under the metrics of the All-Payer Model.

### BACKGROUND

The Commission received 22 proposals for transformation implementation award funding. Commission staff established an independent committee to review the transformation grant proposals and make recommendations to the Commission for funding. The Transformation Implementation Award Review Committee (Review Committee) included representatives from the Department and the Commission as well as subject matter experts, including individuals with expertise in such areas as public health, community-based health care services and supports, and health information technology. Following a comprehensive review process, nine of the 22 proposal applicants were awarded monies through hospital rates at the June 2016 Commission meeting, which were included in the FY 2017 rate orders.

The Commission authorized up to 0.25 percent of approved FY 2016 revenue for this program, meaning that up to \$37,036,786 may be provided through rates to support community-based care coordination and health care transformation. The initial nine grantees received a total of \$30,574,846 in FY 2017, leaving a remainder of \$6,461,940. The Commission tasked the HSCRC and DHMH with re-evaluating the proposals that did not receive funding to determine whether the remainder could be used to further the goals of the All-Payer Model by approving individual projects, or to provide partial funding to support promising collaborations and regional partnerships.

### THE REVIEW COMMITTEE AND EVALUATION CRITERIA

In this secondary review process, the review committee looked at the remaining applicants and discussed individual proposals’ strengths and weaknesses on the following criteria:

- Does this proposal have any **specific, promising programs**?
- Does the proposal have a compelling, community-based **regional partnership**?
- Does the proposal address an **underserved geographic area**?
- Will partially funding this proposal lower the **Medicare Total Cost of Care**?

## 2016 Competitive Transformation Implementation Awards

### RECOMMENDATIONS

#### Recommended Awardees

Based on its review, the Review Committee recommends five additional grant proposals for partial funding beginning January 1, 2017. Table 1 below lists the recommended awardees, the award amount, the hospitals affected, and the intent of the funding. A summary of each recommended proposal may be found in the Appendix. Note that the existing summaries do not reflect what will be funded through this program since, with the exception of Calvert Memorial Hospital, all are partially funded. The review committee provided each awardee with the projects that should be supported with the funding. Table 1 lists those projects.

**Table 1. Recommended Awardees**

<b>Partnership Group Name</b>	<b>Award Request</b>	<b>Award Recommendation</b>	<b>Hospital(s) in Proposal - Purpose of Award</b>
Calvert Memorial	\$ 361,927.00	\$ 360,424.00	<b>Calvert Memorial Hospital</b>
Lifefridge Health System	\$ 6,751,982.00	\$ 1,350,396.00	<b>Carroll Hospital Northwest Hospital Sinai Hospital</b> - 24-hour call center/care coordination hub - Efforts to enable seniors to age in place - Tele-psychiatry capability expansion
Peninsula Regional	\$ 3,926,412.00	\$ 1,570,565.00	<b>Atlantic General Hospital McCready Memorial Hospital Peninsula Regional Medical Center</b> - Inter-Hospital Care Coordination Efforts - Patient Engagement and Activation Efforts - Crisfield Clinic - Wagner Van
Totally Linking Care – Southern MD	\$ 6,211,906.00	\$ 1,200,000.00	<b>Calvert Memorial Hospital Doctor's Community Hospital Fort Washington Medical Center Laurel Regional Hospital MedStar Southern Maryland Hospital MedStar St. Mary's Hospital Prince George's Hospital Center</b> - Support the continuation of the regional partnership - Reinforce care coordination with special focus on medication management - Support physician practices providing care to high-needs patients
West Baltimore Collaborative	\$ 9,902,774.00	\$ 1,980,555.00	<b>Bon Secours Hospital St. Agnes Hospital University of Maryland Medical Center UMMC – Midtown Campus</b> - Patient-related expenditures

## 2016 Competitive Transformation Implementation Awards

			<ul style="list-style-type: none"> <li>- Care Management Teams, particularly focused on primary care</li> <li>- Collaboration and sharing resources with community providers</li> </ul>
	<b>\$27,154,371.00</b>	<b>\$ 6,461,940.00</b>	

### Reporting and Evaluation

Following Commission approval of the awards, staff will provide each awardee with a template for monitoring and reporting on the performance of the programs in meeting the goals of the All-Payer Model and consistent with the application proposal. The Commission reserves the right to terminate and rescind an award at any time for material lack of performance or for not meeting the letter or intent of an application, including not working with CRISP or not achieving results consistent with the All-Payer Model.

### Savings to Purchasers

The RFP specifically states, “in addition to the ROI for the participating hospitals, the HSCRC expects that a portion of the ROI accrue to payers. Applicants were expected to show how the ROI will be apportioned between the hospital(s), and payers, and how the payer portions will be applied (global budget reduction, etc.)” Because most applications were not specific on this point, the Commission is requiring a schedule of savings to purchasers for each awardee hospital through a reduction in its global budget or total patient revenue amounts. The following table presents the scheduled reduction in the award amount for each hospital receiving funding through rates.

**Table 2. Recommended Reduction Percentage**

FY 2018	FY 2019	FY 2020
-10%	-20%*	-30%*

\*10% more than the previous fiscal year.

## 2016 Competitive Transformation Implementation Awards

### APPENDIX

Please NOTE that these proposal summaries reflect the initial submission from the five applicants, and are therefore not wholly representative of the extent and scope of the recommended grantees’ efforts.

### Calvert Memorial Hospital

#### IT TAKES A VILLAGE: Implementation of Senior Life Centers in Calvert County Proposal Summary

<b>Hospital/Applicant</b>	Calvert Memorial Hospital
<b>Date of Submission</b>	12/21/15
<b>Health System Affiliation</b>	Calvert Health System
<b>Number of Interventions</b>	<b>1,312</b>
<b>Total Budget Request</b>	<b>\$ 361,297.00</b>

Target Patient Population (limit to 300 words)
<p>Through the creation of communities modeled on the popular “villages” concept, Calvert Memorial Hospital (CMH) aims to create three Senior Life Centers in Calvert County which will:</p> <ul style="list-style-type: none"> <li>• Serve 1,312+ Medicare-eligible participants correlating to the target population of TLC-MD thus impacting the readmission rate and cost of care for this population</li> <li>• Serve an 405 Calvert County residents (Medicare, Medicaid, other insured or non-insured) age 50+ as a prevention study population to determine the program’s effectiveness in reducing risk factors associated with chronic diseases significantly found within our Medicare population</li> <li>• Address disparities such as lack of public transportation, significantly low ratios of physician and non-physician providers, difficulty accessing and enrolling in benefits, need for navigation to and better coordination of local community resources, access to healthy food sources and basic home maintenance for healthy home environments.</li> </ul>
<p>Summary of program or model for each program intervention to be implemented. Include start date and workforce and infrastructure needs. (limit to 300 words)</p>
<p>CMH’s “Villages” model, Senior Life Centers, will use elements of various Villages-model programs to address local needs, utilize available resources, expand a long-standing successful relationship with the Offices on Aging (OOA), build on already successful programs using engaged staff and volunteers, and create a platform for growth of the program to other targeted populations. The Centers will be co-housed in three Calvert locations – the OOA in Lusby (southern Calvert), Calvert Pines in Prince Frederick (central Calvert) and the OOA in North Beach (northern Calvert). CMH currently has a MOU with the OOA’s for implementation of the <i>Ask the Nurse</i> program which has provided health and</p>

## 2016 Competitive Transformation Implementation Awards

wellness services, on a drop-in basis, to Medicare-eligible seniors throughout Calvert. Additionally, multiple social programs are offered at each senior center and volunteer opportunities abound for seniors to serve within the centers or within the greater Calvert area.

The proposed program will bring the addition of professionals to the care team at the centers including (but not limited to) primary care providers, social workers, personal trainers and diabetes educators who will address locally identified health disparities, modifiable risks and chronic disease management.

Because space is currently on hold for implementation of the Centers, and because this program extends a program with which CMH has been a partner (the *Ask the Nurse Program*) the program can begin serving participants and having an immediate impact at the onset of a grant award.

### Measurement and Outcome Goals (limit to 300 words)

As needs have been identified in the community, particularly through the Community Health Needs Assessment and through strategic planning to align with MD SHIP objectives, the concept of the Senior Life Centers has been planned and a model has been created as a mechanism to easily and efficiently take health and wellness services to seniors. Taking the care where it is needed most addresses the significant challenges in Calvert with access to care, a primary care provider shortage, avoidable ED utilization and overall better coordination of available services in the community.

The goals of the Senior Life Centers are to serve (1) the 50+ age population who are at-risk for high utilization due to health conditions and (2) those defined by our collaboration with TLC-MD as high utilizers who are part of the single-payer/"Medicare for All" models and who desire or intend to age in place. The program aims to serve 1,312+ target patients (who are also targeted as high utilizers by TLC-MD) by serving as a partner in their care coordination efforts. An additional 405 participants (age 50-64) who are engaged with the local Offices on Aging and are candidates for our Senior Life Center programs, but who are not currently being served due to program financial restrictions, will be served through the Centers in an effort to treat their conditions, or intervene while their risk is modifiable, to avoid their becoming high-utilizers.

### Return on Investment and Total Cost of Care Savings (limit to 300 words)

The return on investment (ROI) for CMH's strategies for implementation of Senior Life Centers is detailed in Table 9 of the full proposal. We will evaluate and monitoring the ROI as we move forward balancing investments with outcomes. We believe the ROI will be positive, but the range of the ROI will vary and we will be adjusting future years as we move forward based on actual experience.

A summary of projected ROI, over a three period with investments by HSCRC, yield the following:

Year 1 – 1.60

Year 2 – 1.61

Year 3 – 1.62

## 2016 Competitive Transformation Implementation Awards

<b>Scalability and Sustainability Plan</b> (limit to 300 words)												
<p>CMH aims to duplicate their Villages model program to other targeted populations in Calvert County. CMH is currently working with the Collaborative for Children and Youth and Calvert County Public Schools to identify the most urgent needs among Calvert’s youth population. Future plans include expansion of a Villages modeled program to be housed in local schools and also within planned youth/family community center. CMH is also working with their Health Ministry Network to plan a Villages model program at a local church which currently offers a food pantry, clothing program and jobs-link program and is offering space to CMH to host a Villages model (funding from the HSCRC .50% proposal with TLC-MD will support this model through the Calvert Health Ministry.)</p> <p>Sustaining the Senior Life Centers will be achieved through billable services as allowed by the grant and seeking additional grant opportunities and community investments. CMH generally invests in programs which present a cost savings to the hospital, and the program will be monitored for future investments by CMH. Utilizing the resources of local partners will also contribute to the overall sustainability and expansion of the program.</p>												
<b>Participating Partners and Decision-Making Process</b> (including amount allocated to each partners) (limit to 300 words)												
<p>In order for the Senior Life Centers to be successful, CMH will utilize existing partnerships which have proven successful in responding to the needs of the local Southern Maryland community. CMH will also utilize the partnerships, expertise and collaborative platform provided through their membership with TLC-MD – work of the Senior Life Center program will aim to help to achieve the overall goals and measures set by TLC-MD and data will be reported accordingly.</p> <p>The following chart demonstrates the existing partnerships which will be used to launch the Senior Life Centers. Decision making will take place by CMH leadership in collaboration with the Office on Aging and other community partners. MOUs or other appropriate contracts for service will be used to clarify relationships and expectations between other partners. Additional partners will be added as the program grows and needs are identified:</p>												
<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr style="background-color: #e0e0e0;"> <th style="text-align: center;">Organization/Partner</th> <th style="text-align: center;">Role</th> <th style="text-align: center;">Overview</th> </tr> </thead> <tbody> <tr> <td style="padding: 5px;">Calvert Memorial Hospital</td> <td style="padding: 5px;">Project lead</td> <td style="padding: 5px;">Manage the establishment and operation of all aspect of the senior life centers in 3 local Office on Aging facilities; manage the grant project; track and report data</td> </tr> <tr> <td style="padding: 5px;">Calvert County Office on Aging</td> <td style="padding: 5px;">Project partners</td> <td style="padding: 5px;">Access to target population; provide space, at no cost, for establishment of centers; program oversight</td> </tr> <tr> <td style="padding: 5px;">Calvert County Health Department</td> <td style="padding: 5px;">Community partner</td> <td style="padding: 5px;">Provide behavioral health services to participants at the Senior Life Centers</td> </tr> </tbody> </table>	Organization/Partner	Role	Overview	Calvert Memorial Hospital	Project lead	Manage the establishment and operation of all aspect of the senior life centers in 3 local Office on Aging facilities; manage the grant project; track and report data	Calvert County Office on Aging	Project partners	Access to target population; provide space, at no cost, for establishment of centers; program oversight	Calvert County Health Department	Community partner	Provide behavioral health services to participants at the Senior Life Centers
Organization/Partner	Role	Overview										
Calvert Memorial Hospital	Project lead	Manage the establishment and operation of all aspect of the senior life centers in 3 local Office on Aging facilities; manage the grant project; track and report data										
Calvert County Office on Aging	Project partners	Access to target population; provide space, at no cost, for establishment of centers; program oversight										
Calvert County Health Department	Community partner	Provide behavioral health services to participants at the Senior Life Centers										

## 2016 Competitive Transformation Implementation Awards

World Gym	Community partner	Low cost access to fitness and personal training
TLC-MD, Inc.	Community partner	Utilize available partnerships in the provision of services; leverage lessons learned from TLC-MD partners on best practices; share data for establishment of outcome goals set by TLC-MD

**Implementation Plan  
(limit to 300 words)**

As the program is an extension of an existing partnership between Calvert Memorial Hospital, the Calvert Office on Aging, the Calvert Health Department and other local providers, and as the program has completed the design phase through the strategic planning work of Calvert Memorial Hospital in achievement of their population health strategies, much of the pre-requisite work is completed. CMH is positioned to launch the program at the onset of a grant award in space which is on hold in the 3 local Offices of Aging, utilizing existing staff (as well as growing the program team) and working with participants already engaged at the hospital and/or Offices on Aging. A summary of the major implementation activities is charted in the full proposal; all work noted as ongoing would continue into years 2 and 3 with additional investments from HSCRC.

**Budget and Expenditures  
(include budget for each intervention)  
(limit to 300 words)**

Investments from HSCRC will be used to increase staffing to meet the greater number of participants who will utilize the OOA's programs by implementing dedicated Senior Life Centers for improvement of health among the target population and through additional outreach of services provided aboard the CMH Mobile Health Unit. Investments will be used in year one for IT infrastructure to support the program which will serve as a model for the state of MD; subsequent year IT funding will be used to support monthly per user fees. Funding for equipment and supplies will enable CMH to outfit three clinics, one at each Senior Life Center, with needed items from our CRNP, RN, specialists, dentists, hygienists, social workers, health educators, ministry partners, personal trainers and others. A dedicated nurse info phone line, as referenced by TLC-MD, will serve as a model to be expanded to other areas of MD and will work to efficiently and effectively direct patients to the right places for their health care needs (and lead to a decrease in avoidable ED and Urgent Care utilization.) Finally, to tackle the challenges of medication management, a program will be launched in partnership with local pharmacies to host pharmacists at the Senior Life Centers to counsel patients on their

## 2016 Competitive Transformation Implementation Awards

medication use and management – this, alone, stands to greatly impact the already challenged local public transportation system and will help CMH in efforts to improve medication use (and abuse) in our communities.

## 2016 Competitive Transformation Implementation Awards

### LifeBridge Health

#### Proposal Summary

<b>Hospital/Applicant:</b>	Sinai Hospital, Northwest Hospital, and Carroll Hospital
<b>Date of Submission:</b>	December 18, 2015
<b>Health System Affiliation:</b>	LifeBridge Health
<b>Number of Interventions:</b>	4
<b>Total Budget Request (\$):</b>	\$6,089,727 (CY 2016)
<b>Target Patient Population</b>	
<p>The target population is high-utilizer patients who frequent LifeBridge Health (LBH)'s acute care hospitals, including Sinai (Baltimore City), Northwest (Baltimore County), and Carroll (Carroll County). These <b>2,690 adult patients</b> had three or more inpatient or observation encounters of 24 hours or more in FY 2015, and while they represent only 2% of LBH's entire patient population, their usage accounted for 19% of total charges. Nearly all (96%) high utilizers have at least one chronic condition, and 86% have at least two (primarily hypertension, diabetes, congestive heart failure, and coronary artery disease); 70% have a behavioral health condition. Within the target population of 2,690 high utilizers (emphasizing the middle tier of 2,074 patients), LBH plans to focus on the <b>1,256 patients with Medicare</b> as their primary payer source and <b>actually reach 1,000</b> during the first ramp-up year (CY 2016).</p>	
<b>Summary of program or model for each program intervention to be implemented.</b>	
<p>In four comprehensive interventions to improve care coordination and population health based on medical and supportive needs of the target population (to begin in Q1 CY2016), LBH will:</p> <ol style="list-style-type: none"> <li><b>Optimize care coordination for high utilizers through a system-wide "care coordination hub:"</b> with an integrated, professionally staffed, <u>24/7 call center</u>; <u>expanded workforce</u> (RNs, LCSWs, care navigators, CHWs, NPs, pharmacists, and nutritionists/dietitians); use of <u>new protocols and pathways</u>; emphasis on <u>patient/caregiver engagement</u>; and <u>strengthened data reporting/analytic capabilities</u>.</li> <li><b>Provide intensive care coordination for complex patients at highest risk for readmission:</b> 240 targeted patients having 7 to 10 chronic conditions each and \$21.4 million in total charges in the last FY will benefit from the <u>evidence-based Project RED discharge model</u> system-wide, <u>improved integration with long-term and post-acute facilities</u> through the "LBH Preferred Skilled Nursing Facilities Network" and "Post-Acute Physician Partners," and aging-in-place support for seniors in partnership with community-based agencies. <u>New outpatient palliative care services</u> and <u>piloting of new technology opportunities</u> will be implemented.</li> <li><b>Strengthen primary care access and delivery:</b> New Primary and Chronic Care <u>Pavilions</u> on two campuses; <u>24/7 access to nurse triage</u> through an integrated call center; an evidence-based patient-centered medical home (<u>PCMH</u>) model; <u>embedded intensive care coordinator resources</u> within primary care practices by hiring <u>triads of RN care navigators, social workers, and medical assistants</u> and testing new technology capabilities; and connection to a medical home established for all target patients.</li> <li><b>Strengthen behavioral health care access and delivery:</b> <u>Screening tools to diagnose and assess behavioral and mental health disorders</u>, <u>coordinated programs to prioritize and refer patients</u>, and <u>centralized low-level behavioral health needs at the primary care level</u>; expansion of behavioral health workforce, including <u>primary care-based Behavioral Health Navigation Teams</u> comprising LCSW navigators, bachelor's or master's prepared social work navigators, and community health workers; and <u>piloted telepsychiatry</u> through a phased approach beginning in January 2016.</li> </ol>	
<b>Measurement and Outcomes Goals.</b>	
<p>LBH will track and report on each of the measures required by HSCRC for the target population of 1,256 Medicare high utilizers. In addition, LBH data specialists will also monitor measures specific to the interventions described above. The list of outcome and process measures is summarized below.</p> <p><b>LBH-defined process measures:</b></p> <p>Intervention #1:</p> <ul style="list-style-type: none"> <li>Patients completing a Patient Engagement Survey that tracks improved disease self-management after interventions</li> </ul>	

## 2016 Competitive Transformation Implementation Awards

<ul style="list-style-type: none"> <li>• Successful outbound or inbound telephonic contacts with patients (speaking with live patient)</li> <li>• Patients receiving follow up call to collect medication history within 48 hours of discharge</li> <li>• Patients receiving follow up call regarding medication education within 48 hours of discharge</li> <li>• Patients receiving follow up call regarding access to medications within 48 hours of discharge</li> </ul> <p>Intervention #2:</p> <ul style="list-style-type: none"> <li>• For patients discharged to a SNF in SNF Provider Network, <b>ratio</b> of instances the SNF handoff tool was used, to the total number of SNF Preferred Provider Network discharge encounters (encounter-based measure)</li> <li>• Palliative Care patients connected to O/P Palliative Care NP</li> </ul> <p>Intervention #3:</p> <ul style="list-style-type: none"> <li>• Patients proactively connected with a PCP (Care Navigators or other Care Coordination staff reach out prior to CY2016 acute episode)</li> <li>• Patients connected with a PCP after acute episode and appointment scheduled</li> <li>• Patients with identified PCP</li> <li>• Employed primary care physicians who have subscribed to the ENS CRISP alerts</li> <li>• Employed PCPs loaded patient panels into CRISP</li> </ul> <p>Intervention #4:</p> <ul style="list-style-type: none"> <li>• Patients screened for depression</li> <li>• Behavioral Health patients identified in acute setting and referred to BH specialist/program</li> <li>• Behavioral Health patients proactively connected to BH specialist/program (Care Navigators or other Care Coordination staff reach out prior to CY 2016 acute episode).</li> </ul>
<p><b>Return on Investment. Total Cost of Care Savings.</b></p>
<p>Berkeley Research Group (contracted data specialists) has validated that there will be a positive ROI through the four interventions of the transformation program described above. From a broad perspective, shifting avoidable acute care to more cost effective care in the primary care and community-based settings will inherently save payors money. LBH is estimating ROI in the amounts of 0.50, 0.68, 1.16, and 1.45 for Calendar Years 2016, 2017, 2018 and 2019, respectively. The ROI estimates are based on evidenced-based staffing ratios for the number of high utilizers and the patient profile of high utilizers. It is expected that once the program is fully ramped up, economies of scale and efficiencies will occur in which more patients will be served while using the savings from the reduction in acute hospital utilization to re-invest and expand clinical resources. Since each of the interventions are expected to positively impact patient avoidable utilizations (PAUs) and patient quality improvements (PQIs), the LBH system will invest these savings to expand upon the proposed program for continued cost savings. Specifically, LBH is strategically planning to focus on the Medicare portion of the high utilizer population during the grant period (CY 2016) to secure the highest ROI in the short term.</p>
<p><b>Scalability and Sustainability Plan</b></p>
<p>Through the four interventions described above, LBH expects to realize a sustainable and scalable model of integrated health care that better manages high-risk patients and reduces avoidable hospital admissions and ER visits. LBH plans to reinvest into the program with scalability plans for dual eligibles, followed by Medicaid beneficiaries, and finally to commercial payors. The requested rate increases will enable LBH to achieve the population health model proposed in this application, which will in turn reduce healthcare costs and ultimately ensure financial sustainability.</p>
<p><b>Participating Partners and Decision-making Process</b></p>
<p>In addition to senior leadership from LBH and each of the three lead hospitals, key internal partners include the LBH Physician Network, Carroll Health Group, and Sinai Community Care.</p> <p>More than 10 external partners (who will not receive funding through this request) include:</p> <ul style="list-style-type: none"> <li>• Berkeley Research Group (data specialists)</li> <li>• Chase Brexton (primary care provider in the Northwest region)</li> <li>• Access Carroll (primary care provider in the Carroll region)</li> <li>• Maryland Citizens' Health Initiative Education Fund (sponsoring entity for the Faith Community Network, which will assist with community-based post-discharge support)</li> </ul>

## 2016 Competitive Transformation Implementation Awards

<ul style="list-style-type: none"> <li>• Health departments of Baltimore City, Baltimore County, and Carroll County</li> <li>• Agencies serving seniors, including CHAI, Home Care Maryland, and Capital Coordinated Medicine (Carroll).</li> </ul>
<b>Implementation Plan</b>
<p>Per the attached implementation plan, there are five major areas of responsibility for program implementation in Year One. A Project Manager is responsible for "Implementation across all interventions." Implementation of each of the four interventions will be led by a Director-level LBH resource as follows:</p> <ul style="list-style-type: none"> <li>• Intervention #1: Director, Integrative Health and Navigation</li> <li>• Intervention #2: Director, Integrative Health and Navigation</li> <li>• Intervention #3: Director, Ambulatory and Practice Outcomes</li> <li>• Intervention #4: Director, Psychiatry and Behavioral Health Services</li> </ul> <p>All interventions will commence during the first quarter of CY 2016 (with some aspects of Intervention #1 commencing before grant award notification). LBH has already laid the Transformation Program groundwork for management of project integration, cost, scope, human resources, and communications.</p> <p>Following are major milestones to be reached per intervention:</p> <ul style="list-style-type: none"> <li>• Intervention 1:             <ul style="list-style-type: none"> <li>○ Establish integrated call center: 12/21/15-6/1/16</li> <li>○ Systems development: 1/4/16-4/1/16</li> <li>○ Create Care Coordination Hub: 12/21/15-12/30/16</li> <li>○ Enhance engagement among patients, providers, family and public: 2/1/16-12/31/16</li> <li>○ Strengthen referral processes to existing chronic care and wellness programs: 2/1/16-7/1/16</li> <li>○ Track population health outcomes and foster quality improvement: 1/15/16-12/30/16</li> <li>○ Manage transportation support: 3/1/16-12/30/16</li> </ul> </li> <li>• Intervention 2:             <ul style="list-style-type: none"> <li>○ Improve transitions to/integration with long-term and post-acute facilities: 2/1/16-12/30/16</li> <li>○ Enhance community partnerships for aging in place: 4/1/16-9/30/16</li> <li>○ Standardize and strengthen discharge follow-up procedures: 2/15/16-12/1/16</li> <li>○ Conduct Palliative Care home visits: 4/1/16-12/30/16</li> </ul> </li> <li>• Intervention 3:             <ul style="list-style-type: none"> <li>○ Hire and train Care Coordination teams for PCP offices: 3/1/16-6/30/16</li> <li>○ Proactively connect patients to medical home/PCP: 2/15/16-12/30/16</li> <li>○ Provide 24/7 access to expanded, integrated call center with 24/7 nurse triage: 2/1/16-3/1/16</li> <li>○ Adopt patient-centered medical home (PCMH) model (with NCQA certification) for 2 practices: 1/25/16-9/30/16.</li> </ul> </li> <li>• Intervention 4:             <ul style="list-style-type: none"> <li>○ Standardize use of depression screening tool: 3/1/16-12/30/16</li> <li>○ Add behavioral health staff to PCP offices, call center and behavioral health navigation teams: 3/1/16-5/1/16</li> <li>○ Pilot and launch Telehealth psych resource: 1/15/16-9/1/16</li> </ul> </li> </ul>
<b>Budget and Expenditures.</b>
<p>LBH requests a rate increase of %0.50 of net patient revenue for each hospital. The cost for the interventions described throughout this proposal is \$6,089,727 for the first year of the grant period (CY 2016), including \$3,187,760 for Sinai Hospital, \$1,792,587 for Northwest Hospital, and \$1,109,380 for Carroll Hospital.</p> <p>The cost per intervention (LBH total) is as follows:</p> <ul style="list-style-type: none"> <li>• Intervention #1: \$3,602,311</li> <li>• Intervention #2: \$369,692</li> <li>• Intervention #3: \$573,922</li> <li>• Intervention #4: \$1,543,802.</li> </ul> <p>In addition, LBH plans to contribute \$1,446,801 in-kind in CY 2016 for personnel &amp; contractual expenditures.</p>

## 2016 Competitive Transformation Implementation Awards

### Peninsula Regional Medical Center, Atlantic General Hospital, and McCready Memorial

Summary of Proposal:

Hospital/Applicant:	PRMC, AGH, McCready
Date of Submission:	12/21/2015
Health System Affiliation:	
Number of Interventions:	3
Total Budget Request (\$):	\$3,926,412
<b>Target Patient Population (Response limited to 300 words)</b>	
<p>The target population for the Transformation Grant is: Medicare enrollees with two or more inpatient or observation encounters, one or more chronic conditions, and or more than one visit to the emergency department within a 30 day period. The collaboration also identified Medicare patients as being at risk of high utilization based on his/her chronic conditions and patterns of care. The partners determined that the number of patients who utilize both AGH and PRMC is significant to provide services to avoid unnecessary utilization of the emergency room at both hospitals.</p> <p>More specifically, the target population for enrollment in care management program will include:</p> <ul style="list-style-type: none"> <li>• Individual Medicare beneficiaries identified to be “high utilizers” based on FY2015 activity<sup>1</sup> <ul style="list-style-type: none"> <li>○ In 2015, there were a total of 2,087 Medicare high utilizers served at</li> <li>○ Efforts will focus heavily on enrolling high utilizers with 2-6 Chronic conditions, specifically Hypertension, Diabetes, Coronary Artery Disease and Chronic Kidney Disease and congestive heart failure into care coordination and care management activities that take care from the acute setting into the community and primary care setting</li> </ul> </li> </ul>	
<b>Summary of program or model for each program intervention to be implemented. Include start date, and workforce and infrastructure needs (Response limited to 300 words)</b>	

---

<sup>1</sup> High utilizers were defined as adult patients with  $\geq 2$  inpatient or observation encounters (referred to here as “bedded care”) during FY2015

## 2016 Competitive Transformation Implementation Awards

There are three initiatives which make up the program:

1) Increasing access to primary care via a bridge clinic, and the Wagner Van which will travel to remote areas. Working with McCready, Crisfield clinic and emergence personal to serve the population on Smith Island. Start Date: February Resources:

2) Care Management and Transitions of Care: Expanding the Transitions of Care team to assist Care Managers embedded in 4 primary care practices. Partnering with AGH and McCready Health increase CM/SS workers in the emergency department to care for people who are high utilizers. Working with SNF's and nursing homes provide telemedicine to PRMC hospitalist to prevent unnecessary visits to the ED. Working with a Supportive RN Care manager to assist patients who have late disease states. Start Date: February Resources:

3) Patient Engagement: "Activation" for Disease Management and Infrastructure for Consumer Feedback and Continuous Quality Improvement – Through the actions and support of Care Management and the Transitions of Care team patients will become more empowered in self-management of their chronic diseases. Start Date: March Resources:

### Measurement and Outcomes Goals (Response limited to 300 words)

PRMC and its partners AGH and McCready are working to reduce PAU's, utilization of the ED and cost of care, while together and locally each is focusing their population health efforts to achieve the goals of the triple aim. Through the HSCRC baseline outcome core measures and process measures the collaboration will be monitoring those on a quarterly basis. The group has agreed to programmatic measures on each initiative to achieve greater patient engagement, right care within the right setting and to promote caring for patients within the community setting. These measures will also be analyzed on a quarterly basis and brought forth to the governance committee for review and discussion. These measures will be used to evaluate the success of the program.

### Return on Investment. Total Cost of Care Savings. (Response limited to 300 words)

From a broad perspective, shifting avoidable acute care to more cost effective care in the primary and community-based settings will inherently save payers money. Through annual program evaluations and evaluations of the financial efficacy other programs to be developed and considered will be physician alignment such as pay for performance for agreed upon quality metrics for which the ROI would be used. Another program such as reducing uncompensated care is another possible outcome for the payers.

Since each of the interventions are expected to positively impact PAUs and PQIs, PRMC and its collaborators will invest these savings to expand upon the proposed program for continued cost savings.

Specifically, PRMC, AGH and McCready is strategically planning to focus on the Medicare portion of the high utilizer population during the grant period (CY 2016) to secure the highest ROI in the short term. PRMC, AGH and McCready will reinvest into the programs with scalability plans for Dual Eligibles, followed by Medicaid beneficiaries, and finally commercial payers.

### Scalability and Sustainability Plan (Response limited to 300 words)

## 2016 Competitive Transformation Implementation Awards

Through the interventions listed above, PRMC, AGH and McCready anticipate a sustainable and scalable model of population health management serving high utilizers and patients who are at risk at becoming a high utilizer.

It is expected that through the ROI achieved and savings from reducing PAU's, the hospital(s) will reinvest the savings into expanding the programs with either the necessary staffing or care management technology. The requested rate increases will enable PRMC, AGH and McCready to achieve the population health model proposed in this application which in turn reduce health care costs and ultimately ensure financial sustainability. Other methods for financial sustainability will come in the form of the CCM fee collection and the TOC fee collection.

**Participating Partners and Decision-making Process. Include amount allocated to each partner.  
(Response limited to 300 words)**

Peninsula Regional Medical Center, Atlantic General Hospital, and McCready Health have agreed to form a regional partnership to collectively address clinical approaches to better serve at-risk populations in our region. The focus of this grant application is to address Medicare recipients who seek care at our organizations. Specifically it is to focus on high risk, high utilization, and the need to increase access to primary care while also supporting our communities in providing basic care and health literacy to disparate populations. Each hospital will develop and manage a score card(s) on the status of the individual strategic initiatives and the status of the goal achievement.

Two Advisory Councils (Family and Medical) will meet with The Council to provide input and guidance. A summary of the two supportive councils is as follow:

**Patient/Family Advisory Council ("PFAC"):**

Each organization's PFAC will be utilized to report to the community on the status of the collaborative projects and to gain additional input regarding other potential needs and identify any gaps from the perspective of the care consumer.

**Medical Advisory Council ("MDAC"):**

The Medical Advisory Council, ("MDAC"), a newly created council, will be composed of providers across the care continuum.

**Implementation Plan (Response limited to 300 words)**

## 2016 Competitive Transformation Implementation Awards

Please see the appendix for the plan.

Within 10 days of the grant being awarded the Medicare patient list will be refreshed with the newest list of high utilizers. The collaboration will commence with training the current and new TOC and CM nurses. The program will kick-off quickly the bridge clinics and ED care management. While there is a ramp up period of 3-4 months the collaboration is currently working amongst them and with other partners to draft and finalize workflows and communication process flows that would be ready to implement once the grant is awarded. In short the collaboration is working to have all initiatives ready within 30 days.

**Budget and Expenditures:** Include budget for each intervention. (Response limited to 300 words)

PRMC, AGH and McCreedy is requesting: \$3,926,412 million for the first year of the grant period (January-December 2016).

- 1) Increasing Access to Care: Bridge Clinic, Wagner Van, Smith Island: \$1,077,627
- 2) Care Management: Training, and Embedding Care Managers; Expansion of TOC; and Care Management in SNF, Care Management in the ED: \$2,630,435
- 3) Patient Activation for Chronic Disease Management: \$218,350

Each proposed intervention contains dollars for clinical/social staff and or technology such as tele-medical equipment and equipment such as the Wagner Van to serve the region. Each program has been developed to not only address the high utilizing Medicare patient but also that patient's remoteness within the region. While the first 6 months to 12 months requires investments in technology, clinical staff and population health administration staff it is expected that year going forward the fixed costs will level out. The budget is strategic in that it is meant to build up and lay further necessary foundational elements of care coordination and population health management.

### Totally Linking Care – Southern Md

<b>Hospitals/Applicants:</b>	TLC-MD Member Hospitals: Calvert Memorial Hospital, Doctors Community Hospital (lead on Partnership Planning Grant), Fort Washington Medical Center, Laurel Regional Hospital, MedStar Southern Maryland, MedStar St Mary's, Prince George's Health System including Bowie Center
<b>Date of Submission:</b>	December 21, 2015

## 2016 Competitive Transformation Implementation Awards

<b>Health System</b>	MedStar and Dimensions
<b>Number of Interventions:</b>	1. Care Coordination, 2. Medication Management, 3. Physician Engagement and Support, and 4. Learning Organization
<b>Total Budget</b>	<b>\$6,211,906.45</b>

**Table 1: Summary Table Delineating Differences by Intervention**

Target Patient Population (Response limited to 300 words)
<p>TLC-MD represents a commitment of all seven of the hospitals within Prince George’s, Calvert and St. Mary’s Counties to work together to achieve the Triple Aim. Our planning work to date has helped us to clearly identify a High Needs Population to target through proposed TLC-MD interventions. We have three nested populations as formal targets: (1) those identified as high-needs patients when they use our hospitals (High Needs Population), (2) those who live in our hospital service areas (the area for each hospital from which 85% of the hospitalized patients living in Maryland come) (HSA Population); and (3) those who live in our counties (Counties Population). Experience with improving care transitions and providing care coordination has taught us to include all medical diagnoses rather than to restrict the focus to a few well-studied conditions. Many of our high-needs patients have unstable or inadequate supportive services rather than particularly high-risk diagnoses. However, we also recognize that most high-needs patients have Medicare insurance and that Maryland’s agreement with CMS focuses upon this population, so we will aim to improve the care of Medicare populations substantially and quickly. Thus, the priority population for initial targeting consists of persons identified as high-needs patients with Medicare coverage now using our hospitals. The core population (including Medicare and non-Medicare patients) will be identified by having each hospital’s full list of admissions run through an algorithm to detect persons predicted to be at high risk for high future utilization of medical services.</p>
Summary of program or model for each program intervention to be implemented. Include start date, and workforce and infrastructure needs (Response limited to 300)
<p>TLC-MD plans to reduce unstable health-related situations for persons living with serious or advanced illnesses and disabilities. By doing so, we aim to improve the patient experience and the health of the population and to reduce the need to resort to the hospital. The Clinical Analysts will assist in documenting and reporting the results of the following interventions. <b>Strategy #1 – Starting January 2016.</b> The workforce includes hospital case managers to perform RCAs and work with eQHealth predictive modeling; RNs to do home visits, patient and caregiver education, medication reconciliation, navigation for primary and specialty care supportive services, care planning, patient engagement with the use of telehealth technologies with alert notifications, and communication with physicians. <b>Strategy #2 – Starting March.</b> TLC-MD recognizes the high rate of medication management shortcomings that affect persons going through hospitals, whether adherence, appropriate dosing, optimal medication choice, duplications and contraindicated medications, side effects, or costs. TLC-MD is set to test as many as four strategies: 30-day supply of medications at discharge, electronic drug monitoring with alerts, specialty skilled pharmacist involvement, and screening for Beers criteria. <b>Strategy #3 – Starting March 2016,</b> support physician practices that deal with these high-needs patients by creating individualized approaches to meet the patient’s needs, helping with transition to MIPS, and developing gain sharing arrangements. Workforce is eQHealth, MedChi, and hospitals. <b>Strategy #4 – Starting January 2016.</b> Test a list of</p>

## 2016 Competitive Transformation Implementation Awards

enhanced services such as self-care activation approach, post clinics, nurse call lines, standardize some ED test that show correlations to chronic illnesses ( ex. Vitamin D), and matching behavioral health options with services available.

### Measurement and Outcomes Goals (Response limited to 300 words)

TLC-MD measurement strategies begin with a commitment to meeting the terms of the agreement between Medicare and Maryland, and to that end TLC-MD will monitor and manage according to the goals set by the RFP, using the associated data and analysis approaches. TLC-MD will also monitor tests of interventions, looking to measures of process, outcome, potential adverse effects, costs, and spread. For data provided by HSCRC, VHQC and CRISP, TLC-MD will usually request aggregate data and data splits between Prince George’s County (northern sector) and the combination of Calvert, Charles, and St Mary’s Counties (southern sector), since otherwise gains in the more rural counties (Calvert and St. Mary’s and often Charles) will be overwhelmed by the large numbers in Prince Georges County. Similar data splits will be conducted with data generated by the coalition. Although Charles County is not a participating partner of the coalition, TLC-MD recommends including Charles County’s data and ultimately TLC-MD hopes that Charles County providers will work with the coalition on future projects. For some metrics, the frequency will be monthly and for others, the data will probably only be available quarterly. For data that is available into the past, we will request data for the last three years (2013-2015) in order to be able to establish seasonal variation and a rough baseline, as well as requesting reasonably prompt data through the future work. Some of this will be displayed on the CRISP dashboard, which we will study and use, but we also want to be able to construct useful process control charts for interventions we implement. We understand from CRISP that they will have data from dual-eligible beneficiaries first, then probably Medicare Parts A, B, and D. Once the core data are all coming in quickly after billable events, additional quality measures will become possible.

### Return on Investment. Total Cost of Care Savings. (Response limited to 300 words)

The return on investment (ROI) for TLC-MD’s strategies and testing other enhanced services in the regional learning organization model described in the Targeted Population and Program sections are shown in Table 7 in the application. The ROI was calculated using the HSCRC ZIP code data provided in mid-December 2015 on the CY 2014 patient discharges. The patients with 3+ IP/Obs>24 Medicare data was sorted by each hospital. Anticipating that 40% of the patients could be enrolled in a year, a monthly census of 392 patients was calculated and placed into one of 4 acuity level tiers. Patients may be enrolled in a 90, 180 or 365 day program, depending on acuity level or need by exception. This accounts for 1,568 patients being seen in Year 1 and 2,364 being seen in subsequent years, a 60% enrollment rate. Using the 4 tiered acuity levels, different interventions were assigned to each tier based on previous studies by Berkley Research Group (BRG) and the RCA results seen the planning stage. Cost for each service provided for each intervention was calculated from vendor contracts. Thus the Annual intervention cost per patient was calculated to be \$3,888.50. The annual charges were calculated from two data sources: first, using the average patient cost from the CRISP report developed with Mary Pohl on the highest acuity de-duplicated patients (369) and second, using the average patient cost from the HSCRC zip code data received. These per patient costs were multiplied by the number of patients to be enrolled, such as 1,568 for Year 1. In Year 1, the development year that includes much testing of interventions, the expected savings is calculated at 15% but future years TLC-MD expects a 29% savings, resulting in a (.15) ROI in Year 1 to a 1.55, 1.61 and 1.32 in future years.

### Scalability and Sustainability Plan (Response limited to 300 words)

## 2016 Competitive Transformation Implementation Awards

The current plan is to fully utilize HSCRC/DHMH’s grant dollars to operate the coalition’s work until December 2018, and to enable the program to yield substantial reductions in utilization. As savings occur at each hospital in the reduction of regulated unnecessary utilization, the variable savings could be shared with the counties, the hospitals, the providers who affected change, and HSCRC. As the program develops, TLC-MD members will be seeking financial investments from other interested parties who share the mission of TLC-MD and who want to see patients remain healthy at home (such as The Harry and Jeanette Weinberg Foundation, other granting foundations, and community partners such as Wal-Mart, Giant, Walgreens and other businesses that invest in the population health needs of their communities.) The hospital partners in TLC-MD are firmly committed to the Triple Aim for our area. We can make major improvements in the health care delivery system and the health of our communities within that budget for at least the four years we are now planning. We have planned to use the funds catalytically and strategically, targeting the high-needs patients who are not well-served in another way, and building a coalition capable of monitoring data and managing some critical parts of the overall

delivery system. The scale of this part of the work is already broad, though carefully targeted. We may find that we need somewhat more or different staffing. The pace of change is somewhat dictated by the funding and the need to ensure staff attention to the testing and implementation of interventions. TLC-MD has strategies to improve the health of the entire region over the long term, beyond just the

Participating Partners and Decision-making Process. Include amount allocated to each partner.  
(Response limited to 300 words)

The allocation to each partner is listed below by each Strategy.

	eQHealth	Communities, Counties, buses	St Mary's HEZ program	Faith Based and Communities	Behavioral Org	Primary Care Practices	Call Center Partner	UMD, Pharma Dept
Strategy 1	1,027,763.62	488,753.43	369,578.75	500,000.00	131,328.00	192,780.00	125,684.00	
Strategy 2								895,500
Strategy 3		66,000.00						
Strategy 4								
<b>Totals</b>	<b>\$ 1,027,763.62</b>	<b>\$ 554,753.43</b>	<b>\$ 369,578.75</b>	<b>\$ 500,000.00</b>	<b>\$ 131,328.00</b>	<b>\$ 192,780.00</b>	<b>\$ 125,684.00</b>	<b>\$ 895,500</b>

Implementation Plan (Response limited to 300 words)

The Implementation Plan’s categories each have milestones that show how each strategy will move from a planning to implementation phase and then to expansion phase in later years. **Strategy #1 –** Administrative/Infrastructure includes outreach and building awareness, governance, financial sustainability, and IT. The Clinical Improvement includes patient screening, monitoring hospital and eQHealth care coordination, monitor progress on high needs patients, monitor RCA results for process improvements, integrate SNF, home health, and outpatient physician activities, and test 24/7 on call systems. **Strategy #2 –**The Medication Management section defines criteria for the selection of patients, the testing of the tools, and the incorporation of the University of Maryland’s pharmacy programs to optimize medication management, and the monitoring of results. **Strategy #3 –** The Support Physician Practices section identifies the working with practices with high needs patients and identifying how to serve their population within the TLC-MD process. Milestones include activity in CCM services and billings. **Strategy #4 –**Building the Learning Organization section includes testing results, identifying new initiatives based on RCA and patient interactions, Vitamin D testing, behavioral health enhancements through improved screening and proposing alternate workflows per geographic area.

## 2016 Competitive Transformation Implementation Awards

Budget and Expenditures: Include budget for each intervention. (Response limited to 300 words)

**Strategy #1 –\$3,922,280.80.** Our High-Needs Population will have services: home visits, patient and caregiver education, medication reconciliation, navigation for primary and specialty care, supportive services, care planning, and communication with physicians. A summary include reporting (33,850), predictive modeling (12,000), expanding clinics (1,247,771.75) patient transportation (1,568), physician co-pays (192,780), call center staffing (125,684), medicine management/behavioral interventions totaling (1,573,427.05), faith and community outreach (500,000), and patient engagement with telehealth technologies (235,200). **Strategy #2 –\$1,201,664.80, which includes:** testing of Vitamin D levels during ED visit (6,272), use of medicine delivery system (203,212.80), issuance of non-medical equipment like scales (15,680), and medicine management or adherence for all tiers (976,500). **Strategy #3 – \$271,600.00, which includes:** hosting CME meetings throughout the 3 counties each year. Plans include 11 events at \$66,000 for location and food, \$7,500 for the speakers, and \$15,000 for CME fees. The distribution of patient literature on population health efforts (175,600) and CRISP outreach (7,500). **Strategy #4 –\$816,360.00, which includes:** an Executive Director, Financial and Clinical Analysts (450,000), Consultant to assist Executive Director as needed to evaluate initiatives and keep the program moving forward (75,000), Project management of timeline (30,000), Metric management of timeline and results (30,000), Directors and Officers insurance (20,000), Audit/Finance fees (100,000), legal assistance with contracts and Q/A (50,000), website maintenance (30,000), and lab services for testing interventions (31,360).

### West Baltimore Collaborative

Hospital/Applicant:	UMMC is the Lead/Application for the WBC
Date of Submission:	December 21, 2015
Health System Affiliation:	UMMC and UM Midtown, Saint Agnes and Bon Secours
Number of Interventions:	1
Total Budget Request (\$):	\$9,902,774

Target Patient Population (Response limited to 300 words)

## 2016 Competitive Transformation Implementation Awards

The West Baltimore Collaborative will offer comprehensive, robust health management services through embedment in Primary Care Practices and remotely in the community. In the program's initial iteration, service will be offered to patients from member hospitals who meet defined criteria:

- **Criterion 1:** Patient is Medicare or Dually Eligible
- **Criterion 2:** Patient had 3 or more bedded hospital encounters of great than 24 hours as an Inpatient, Observation, or ED setting
- **Criterion 3:** Patient suffers from 2 or more chronic conditions
- **Criterion 4:** Patient does not suffer from a Major Mental Diagnosis (Bipolarity, Schizophrenia, other psychotic disorder). This criterion does not include patients with Depression, anxiety, substance abuse, or and related illness.

In the future, the program criteria will be expanded to offer services to all payers and those with Major Mental diagnoses.

Summary of program or model for each program intervention to be implemented. Include start date, and workforce and infrastructure needs (Response limited to 300 words)

The WBC is a comprehensive collaboration, governed by four institutions within Baltimore City: University of Maryland Medical Center, UMMC Midtown Campus, St. Agnes and Bon Secours. These institutions, through the WBC, will contract with the University of Maryland Medical System's Population Health Services Organization to provide comprehensive, robust care management services to the target patient population. Staff, including RN/Care Managers, Social Workers and Community Health Workers will divide into teams, servicing a fixed number of identified patients. These team members will embed in affiliated primary care practices or engage patients in the community. Telephonic support will also be provided. Ancillary staff will operate out of a centralized data hub, including Clinical Pharmacists for medical reconciliations, Practice Transformation Experts who will assess primary care practices based on quality and cost data and aid in development of care practices for the target patient populations, and IT/Analysts, who would ensure operability of phone and computer connectivity, attribution software management and data analysis. Ramp up to operability would commence upon grant award, with initial service delivery to patients beginning on April 4, 2016.

## 2016 Competitive Transformation Implementation Awards

### Measurement and Outcomes Goals (Response limited to 300 words)

WBC will evaluate identified outcome, process and ROI metrics provided in the application as the program proceeds through rollout to full functionality and beyond. Understanding that the HSCRC and others, including CRISP, are still refining the recommended set of metrics, the WBC will make any necessary adjustments as the process evolves.

Programmatic Metrics will include: Does the patient have an appointment with a primary care provider prior to discharge and within 7 days of discharge; Did the patient connect with the scheduled primary care provider; Reduce emergency room visit rates; Reduce readmission rates; Was medication reconciliation completed prior to discharge; Was a follow-up call by the transitions team completed within 72 hours; Home visits within 30 days are completed; Care Plans will be completed on all patients in care management; HEDIS and MU measures for program; Total hospital cost per capita; Total hospital admits per capita; Total healthcare cost per person; ED visits per capita.

These metrics, while focused on programs, also lend to the overarching outcome metrics captured in the Core Outcomes Measures listed in Table A of the Implementation Grant Request for Proposals. Measures germane to the program, including reduction of PAUs, readmissions, and avoidable utilization of the emergency department will be captured.

### Return on Investment. Total Cost of Care Savings. (Response limited to 300 words)

The ROI calculated for the years 2017-2019 are: **0.90, 1.40, and 1.32**, respectively. By shifting avoidable acute care to more cost effective care in the primary care and community-based settings, the intervention will inherently save payers money.

Since the program is expected to positively impact PAUs and PQIs, WBC will re-invest these savings to expand the proposed program for continued cost savings. Specifically, WBC is strategically planning to focus on the Medicare and a portion of the dual eligible high utilizers. Based upon total PAU dollars and WBC financial model, it is anticipated that PAUs for the target patient population will be cut up to 15%. This utilization reduction will generate savings towards the \$33 million required by the State to meet the waiver requirement. The WBC will reinvest in the program and scale to include other dual eligible, Medicaid and commercial payers with the goal of meeting the waiver requirements to achieve the mandate of an all payer system.

### Scalability and Sustainability Plan (Response limited to 300 words)

## 2016 Competitive Transformation Implementation Awards

Scalability will be based on potential savings reinvestment, permitting model expansion of more robust staffing and infrastructure. This expansion will permit the program to change the program criteria to be more inclusive, with the ultimate aim of offering WBC services to high utilizers in all payers.

Sustainability will be based on reduction of PAUs, and it is anticipated these generated savings will be reinvested in the program. Additionally, physician alignment, so crucial to the success of the program, will be encouraged via practice transformation efforts to effectively manage chronic high utilizers and enable participating physicians to capture Medicare CCM fees. Development of saving sharing programs with physicians within legal limits are currently being explored and will be crucial to the speed of the WBC's success.

## 2016 Competitive Transformation Implementation Awards

Participating Partners and Decision-making Process. Include amount allocated to each partner. (Response limited to 300 words)

The primary participants in the WBC are the four member hospitals: UMMC, UMMC Midtown Campus, St. Agnes and Bon Secours. Additionally a number of affiliated and independent entities and practitioners have manifested intent to participate in and support the efforts of the WBC by submitted Letters of Intent and Letters of Support.

The WBC will be managed through a governance structure, consisting of the West Baltimore Governing Council, which is made up of leadership of four (4) member hospitals, and a Management Committee, consisting of WBC hospital staff and the WBC Director. The Governing Council will receive input from a Medical Advisory Committee and a Patient and Community Advisory Council.

Decisions made by the WBC, through its governance structure will include: decisions regarding the scope of partners' and participant involvement, monitoring programmatic design to achieve targeted patient and financial outcomes, monitoring funds flow, directing decisions regarding program management, directing decisions on vendor contract and decisions affecting savings management

### Implementation Plan (Response limited to 300 words)

Within the first months of funded operation, the WBC will bring organizational infrastructure online and begin program operations, endeavoring to meet the following schedule:

Upon grant award: Patients identified as eligible will be contacted; Securing program's physical space will occur; A refresh of inter-hospital data to confirm accuracy of metrics and patient capture; If necessary, program scalability will occur; Model implementation for Medicare and Dual Eligible Patients will commence at the member institutions; Candidate evaluations based upon prior position publication will commence; and WBC appoints interim program Director to provide day-to-day leadership during recruitment process.

Within 30 days of grant award: Participating hospitals will execute a Memoranda of Understanding, which will dictate member association and organizational structure; FQHCs, hospital-affiliated practices and community-based physicians will begin to execute Participation Agreements; Vetting of potential hires will continue; and the beginning of the hiring process will commence.

Within 60 days of grant award: Initiation of practice assessments to identify practice needs and provide appropriate resources and support.

Within 90 days of grant award: Enrollment of patients into the program will begin.

## 2016 Competitive Transformation Implementation Awards

Budget and Expenditures: Include budget for each intervention. (Response limited to 300 words)

The WBC budget includes ramp up costs that are fixed to bring the needs of the program's infrastructure to full capability within the first year. The budget captures not only clinical staff, but administrative and analytical staff needed for ongoing data collection and reporting.

The WBC has decided that the investment in the UMMS PHSO strategy for clinical services in the community will maximize the full potential of the monies requested; moreover, the centralized strategy allows for well-coordinated care and care management resources that are necessary to meet the needs of the West Baltimore community. The WBC is committed to supporting the community physicians and thereby making the investment in transforming primary care practices prior to the embedment of RN/CMs and their teams. It is anticipated that 100% of the programs described above will be funded by the requested grant amount.

VHA	Voluntary Hospitals of America

## INTRODUCTION

Each year, the Maryland Health Services Cost Review Commission (HSCRC) collects community benefit information from individual hospitals to compile into a publicly available, statewide Community Benefit Report (CBR). Current year and previous CBRs submitted by the individual hospitals are available on the HSCRC website.

This summary report provides background information on hospital community benefits and the history of CBRs in Maryland. It is followed by an overview of the data and narrative reporting for fiscal year (FY) 2015, which includes the second year of reporting from Maryland specialty hospitals. It concludes with a summary of data reports from the past twelve years. Attachments present additional information regarding hospital rate support, community benefit data for each hospital, and the breakdown of costs by community benefit activity.

## Background

Section 501(c)(3) of the Internal Revenue Code (IRC) identifies as tax-exempt, organizations that are organized and operated exclusively for specific purposes including religious, charitable, scientific, and educational purposes.<sup>1</sup> Nonprofit hospitals receive many benefits from their tax-exempt status. They are generally exempted from federal income and unemployment taxes, as well as state and local income, property, and sales taxes. In addition, they are allowed to raise funds through tax-deductible donations and tax-exempt bond financing.

Originally, the Internal Revenue Service (IRS) considered hospitals to be “charitable” if they provided charity care to the extent of their financial ability to do so.<sup>2</sup> However, in 1969, the IRS issued Revenue Ruling 69-545, which modified the “charitable” standard to focus on “community benefits” rather than “charity care.”<sup>3</sup> Under this IRS ruling, nonprofit hospitals are required to provide benefits to the community in order to be considered charitable. This has created the “community benefit standard,” which is necessary for hospitals to satisfy in order to qualify for tax-exempt status.

In March 2010, Congress passed the Patient Protection and Affordable Care Act (ACA).<sup>4</sup> Section 9007 of the ACA established IRC §501(r), which identifies additional requirements for hospitals that seek to maintain tax-exempt status. Every §501(c)(3) hospital, whether independent or part of a hospital system, must conduct a community health needs assessment (CHNA) at least once every three years in order to maintain its tax-exempt status and avoid an annual penalty of up to \$50,000.<sup>5</sup> The first CHNA was due by the end of FY 2013. Assessments must incorporate input

---

<sup>1</sup> 26 U.S.C. §501(c)(3)

<sup>2</sup> Rev. Ruling 56-185, 1956-1 C.B. 202.

<sup>3</sup> Rev. Ruling 69-545, 1969-2 C.B. 117.

<sup>4</sup> The Patient Protection and Affordable Care Act, P.L. 111-148 (2010), as amended by the Health Care and Education Reconciliation Act of 2010, P.L. 111-152.

<sup>5</sup> 26 U.S.C. §501(r)(3); 26 U.S.C. §4959

from individuals who represent the broad interests of the communities served, including those with special knowledge or expertise in public health, and they must be made widely available to the public.<sup>6</sup> CHNAs must include an implementation strategy describing how the hospital plans to meet the community's health needs, as well as a description of what the hospital has done historically to address its community's needs.<sup>7</sup> Furthermore, the hospital must identify any needs that have not been met by the hospital and explain why they have not been addressed. Tax-exempt hospitals must report this information on Schedule H of IRS form 990.

The Maryland CBR process was adopted by the Maryland General Assembly in 2001,<sup>8</sup> and FY 2004 was established as the first data-collection period. Under Maryland law, CBRs must include the hospital's mission statement, a list of the hospital's initiatives, the cost of each community benefit initiative, the objectives of each community benefit initiative, a description of efforts taken to evaluate the effectiveness of initiatives, a description of gaps in the availability of specialist providers, and a description of the hospital's efforts to track and reduce health disparities in the community.<sup>9</sup>

The HSCRC worked with the Maryland Hospital Association (MHA), interested hospitals, local health departments, and health policy organizations and associations to establish the details and format of the CBR. In developing the format for data collection, the group relied heavily on the experience of the Voluntary Hospitals of America (VHA) community benefit process. At the time, the VHA possessed more than ten years of voluntary hospital community benefit reporting experience across many states. The resulting data reporting spreadsheet and instructions were used by Maryland hospitals to submit their FY 2004 data to the HSCRC which resulted in the publishing of the first annual CBR in July 2005. The HSCRC continues to work with the MHA, public health officials, individual hospitals, and other stakeholders to further improve the reporting process and refine the definitions, as needed. The data-collection process offers an opportunity for each Maryland nonprofit hospital to critically review and report the activities it has designed to benefit the community.

The FY 2015 report represents the HSCRC's twelfth year of reporting on Maryland hospital community benefit data.

## Definition of Community Benefits

Maryland law defines a "community benefit" (CB) as an activity that is intended to address community needs and priorities, primarily through disease prevention and improvement of health status, including:<sup>10</sup>

- Health services provided to vulnerable and underserved populations

---

<sup>6</sup> 26 U.S.C. §501(r)(3)(B)

<sup>7</sup> 26 U.S.C. §501(r)(3)(A)

<sup>8</sup> Health-General Article §19-303 Maryland Annotated Code

<sup>9</sup> Health-General Article §19-303(a)(3) Maryland Annotated Code

<sup>10</sup> Health-General Article §19-303(c)(2) Maryland Annotated Code

- Financial or in-kind support of public health programs
- Donations of funds, property, and other resources that contribute to a community priority
- Health care cost-containment activities
- Health education screening and prevention services

As evidenced in the individual CBRs, Maryland hospitals provide a broad range of health services to meet the needs of their communities, often receiving partial or no compensation. These activities, however, are expected from Maryland's 48 acute and seven specialty nonprofit hospitals in return for their tax-exempt status.

## **ANALYSIS**

Following are highlights of the FY 2015 data reporting and narrative reporting.

### **FY 2015 Data Reporting Highlights**

The reporting period for this CBR is July 1, 2014, through June 30, 2015. Hospitals submitted their individual CBRs to the HSCRC by December 15, 2015. Audited financial statements were used to calculate the cost of each of the community benefit categories contained in the data reports. Of the 55 nonprofit hospitals in Maryland, 52 submitted individual data reports. Two hospital systems, University of Maryland Shore Regional Health and the University of Maryland Upper Chesapeake Health, submitted narratives covering both hospitals in their system. Shore Health submitted a single narrative covering both the University of Maryland Shore Medical Center at Easton and the University of Maryland Shore Medical Center at Dorchester. Upper Chesapeake Health submitted a single narrative covering both the University of Maryland Upper Chesapeake Medical Center and the University of Maryland Harford Memorial Hospital. Two specialty hospitals did not file a report for FY 2015.

As shown in Table 1, Maryland hospitals provided just over \$1.5 billion dollars in total community benefit activities in FY 2015 – a total that is slightly higher than that in FY 2014. The FY 2015 total comprises net community benefit expenses of \$471.7 million in combined charity care and Medicaid expansion services due to the ACA, \$468.6 million in mission-driven health care services (subsidized health services), \$435.8 million in health professions education, \$362.6 million in charity care, \$91.3 million in community health services, \$56.5 million in unreimbursed Medicaid costs, \$21 million in community-building activities, \$16.6 million in financial contributions, \$10.9 million in community benefit operations, \$10.8 million in research activities, and \$3.2 million in foundation-funded community benefits. These totals include hospital-reported indirect costs, which vary by hospital and by category from a fixed dollar amount to a calculated percentage of the hospital's reported direct costs.

**Table 1. Total Community Benefits**

Community Benefit Category	Number of Staff Hours	Number of Encounters	Net Community Benefit Expense	Percentage of Total Community Benefit Expenditures	Net Community Benefit Expense Less Rate Support	Percentage of Total Community Benefit Expenditures without Rate Support
Unreimbursed Medicaid Cost	0	0	56,475,886	3.56%	56,475,886	6.72%
Community Health Services	1,047,380	4,082,976	91,349,595	5.76%	91,349,595	10.87%
Health Professions Education *	6,810,049	173,372	435,849,333	27.47%	117,891,257	14.03%
Mission Driven Health Services	2,519,324	781,989	468,569,852	29.54%	468,569,852	55.76%
Research	101,193	5,909	10,819,734	0.68%	10,819,734	1.29%
Financial Contributions	35,605	187,456	16,578,083	1.04%	16,578,083	1.97%
Community Building	241,527	554,013	20,983,322	1.32%	20,983,322	2.50%
Community Benefit Operations	95,550	2,974	10,872,915	0.69%	10,872,915	1.29%
Foundation	63,332	11,721	3,218,210	0.20%	3,218,210	0.38%
Charity Care*	0	0	362,585,727	22.86%	(65,556,478)	-7.80%
ACA Medicaid Expansion Expense	0	0	109,137,135	6.88%	109,137,135	12.99%
Charity Care* + ACA Medicaid Expansion Expense	0	0	471,722,861	29.73%	43,580,656	5.19%
<b>Total</b>	<b>10,913,958</b>	<b>5,800,412</b>	<b>\$1,586,439,791</b>	<b>100.0%</b>	<b>\$840,339,510</b>	<b>100.0%</b>

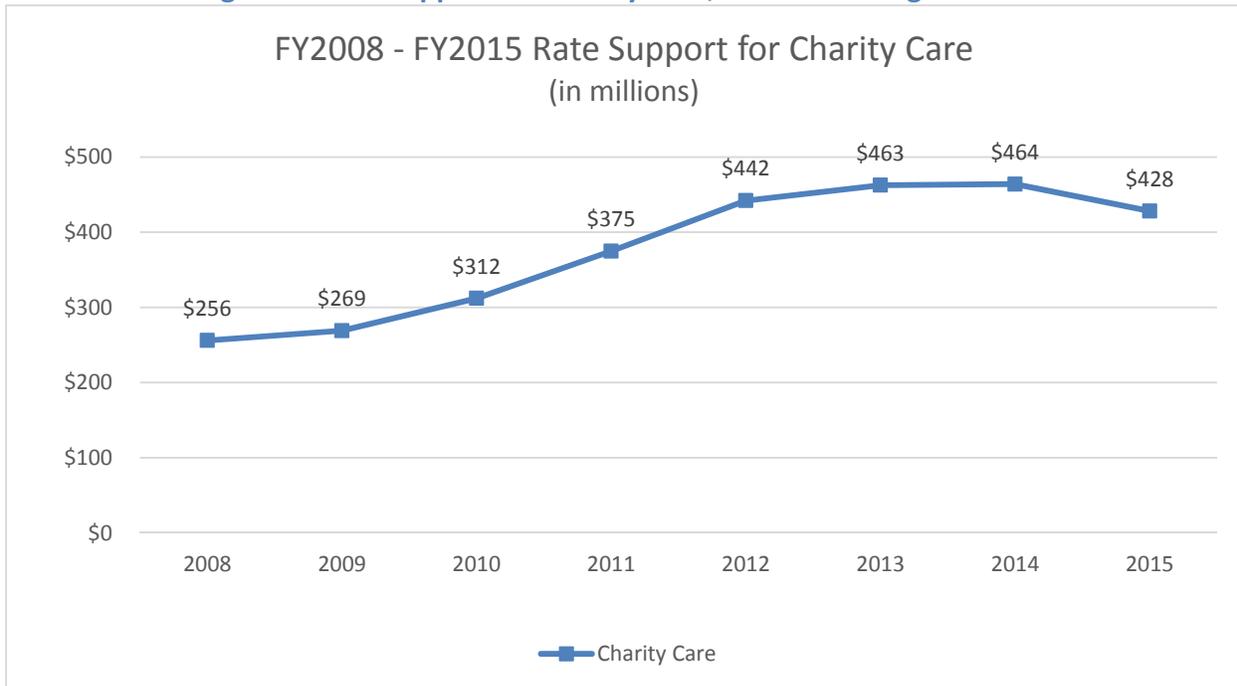

(\*) Indicates category adjusted for rate support (i.e., direct medical education, Nurse Support Program I, and charity care).

In Maryland, the costs of uncompensated care (including charity care and bad debt) and graduate medical education are built into the rates for which hospitals are reimbursed by all payers, including Medicare and Medicaid. Additionally, the HSCRC rates include amounts for nurse support programs provided at Maryland hospitals. These costs are, in essence, “passed-through” to the purchasers and payers of hospital care. To comply with IRS form 990 requirements and avoid accounting confusion among programs that are not funded by hospital rate setting, the HSCRC requests that hospitals exclude from their reports all revenue that is included in rates as offsetting revenue on the CBR worksheet. Attachment I details the amounts that were included in rates and funded by all payers for charity care, direct graduate medical education, and nurse support programs in FY 2015.

As noted, the HSCRC includes a provision in hospital rates for uncompensated care, which includes charity care, because it is considered to be a community benefit. It also includes bad debt, which is not considered to be a community benefit. As the need for charity care declined after the implementation of the ACA, and amounts provided in rates were reduced, hospitals incurred the expenses of formerly uninsured and underinsured individuals increasing their utilization of hospital services after enrolling in Medicaid. The HSCRC analyzed the enrollment and utilization data and calculated that \$109.1 million in expanded services qualify as a community benefit expense to be included in the FY 2015 report.

Figure 1 shows the rate support for charity care from FY 2008 through FY 2015. The rate support for charity care continuously increased from FY 2008 through FY 2013 and then began to gradually decline in FY 2014 due to implementation of the ACA. Attachment I shows that \$428.1 million in charity care was provided through Maryland hospital rates in FY 2015 and funded by all payers. When offset by the \$362.6 million in charity care reported by hospitals, and the \$109.1 million in expanded services to the Medicaid population, the net amount of charity and ACA Medicaid expansion services provided by the hospitals and not through rates is \$43.6 million dollars

**Figure 1. Rate Support for Charity Care, FY 2008 through FY 2015**

Another social cost funded through Maryland’s rate-setting system is the cost of graduate medical education, generally for interns and residents who are trained in Maryland hospitals. Included in graduate medical education costs are the direct costs (i.e., direct medical education, DME), which include the residents’ and interns’ wages and benefits, faculty supervisory expenses, and allocated overhead. The HSCRC’s annual cost report quantifies the DME costs of physician training programs at Maryland hospitals. In FY 2015, DME costs totaled \$302.6 million.

The HSCRC’s Nurse Support Program I (NSPI) is aimed at addressing the short- and long-term nursing shortage impacting Maryland hospitals. In FY 2015, \$15.3 million was provided in hospital rate adjustments for NSPI. See Attachment I for detailed information about rate funding provided to specific hospitals.

When the reported community benefit costs for Maryland hospitals were offset by rate support, the net community benefits provided in FY 2015 totaled \$840.3 million, or 5.72 percent of total hospital operating expenses. This is an increase from the \$724.6 million in net benefits provided in FY 2014, which totaled 5.14 percent of hospital operating expenses (see Attachment II: FY 2015 Community Benefit Analysis for additional detail).

Table 2 shows the breakdown of staff hours, number of encounters, and expenditures for health professions education by activity. The education of physicians and medical students comprises the majority of expenses in the category of health professions education, totaling \$379.4 million.

The second highest category is the education of nurses and nursing students, totaling \$27.2 million. The education of other health professionals totaled \$19.4 million.

**Table 2. Health Professions Education Activities and Costs, FY 2015**

Health Professions Education	Number of Staff Hours	Number of Encounters	Net Community Benefit with Indirect Cost
Physicians and Medical Students	5,841,483	38,141	\$ 379,449,051
Nurses and Nursing Students	475,296	55,322	\$ 27,203,753
Other Health Professionals	343,259	51,893	\$ 19,352,956
Other	142,392	26,178	\$ 6,640,883
Scholarships and Funding for Professional Education	7,619	1,838	\$ 3,202,739
<b>Total</b>	<b>6,810,049</b>	<b>173,372</b>	<b>\$ 435,839,332</b>

Table 3 presents the number of staff hours, number of encounters, and expenditures for community health services by activity. Health care support services comprise the largest portion of expenses in the category of community health services, totaling \$40.7 million. Community health education is the second highest category, totaling \$25.5 million, and the “other” category is the third highest, totaling \$8.2 million. For additional detail and a description of subcategories of the remaining community benefit categories, see Attachment III: FY 2015 Hospital Community Benefit Aggregate Data.

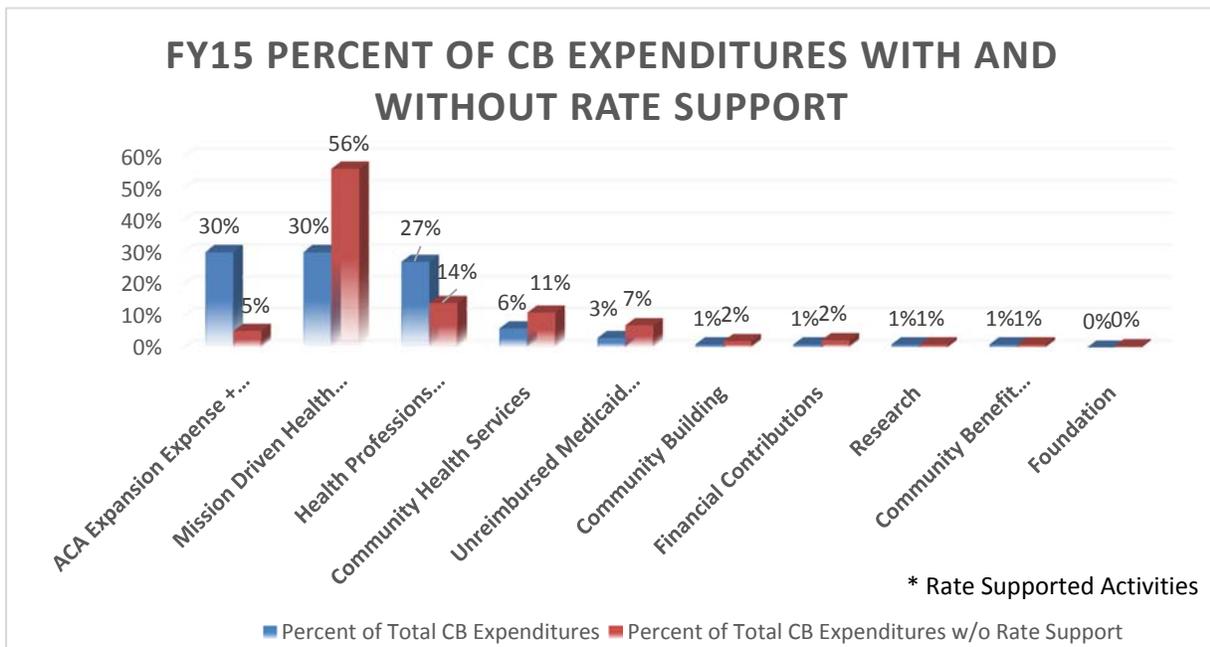

**Table 3. Community Health Services Activities and Costs, FY 2015**

Community Health Services	Number of Staff Hours	Number of Encounters	Net Community Benefit With Indirect Cost
Health Care Support Services	250,379	190,090	\$ 40,713,064
Community Health Education	299,811	3,083,111	\$ 25,461,832
Other	57,738	129,276	\$ 8,197,656
Community-Based Clinical Services	280,714	358,387	\$ 6,457,454
Free Clinics	42,497	33,112	\$ 3,861,581
Screenings	40,749	53,970	\$ 2,832,583
Self-Help (Wellness and Health Promotion Programs)	26,557	179,657	\$ 1,566,072
Support Groups	15,206	26,288	\$ 1,384,292
Mobile Units	30,081	11,658	\$ 511,841
One-Time and Occasionally Held Clinics	3,649	17,427	\$ 363,220
<b>Total</b>	<b>1,047,380</b>	<b>4,082,976</b>	<b>\$ 91,349,595</b>

Rate offsetting significantly affects the distribution of expenses by category. Figure 2 shows expenditures in each community benefit category as a percentage of total expenditures. ACA

expansion expenses and charity care, mission-driven health services, and health profession education represent the majority of the expenses, at 30 percent, 30 percent, and 27 percent, respectively. Figure 2 also shows the percentage of expenditures by category without rate support, which changes the configuration significantly: Mission-driven health services becomes the category with the highest percentage of expenditures, at 56 percent. Health professions education follows, with 14 percent of expenditures, and community health services comprises 11 percent of expenditures.

**Figure 2. Percentage of Community Benefit Expenditures by Category with and without Rate Support**

Utilizing the data reported, Attachment II: FY 2015 Community Benefit Analysis compares hospitals on the total amount of community benefits reported, the amount of community benefits recovered through HSCRC-approved rate supports (i.e., charity care, direct medical education, and nurse support), and the number of staff and staff hours dedicated to community benefit operations. On average, in FY 2015, 1,803 staff hours were dedicated to community benefit operations, an increase of 19 percent from 1,514 staff hours in FY 2014. Seven hospitals reported zero staff hours dedicated to community benefit operations, the same number as in FY 2014. The HSCRC continues to encourage hospitals to incorporate community benefit operations into their overall strategic planning.

The total amount of community benefit expenditures as a percentage of total operating expenses ranged from 3.03 percent to 45.06 percent, with an average of 10 percent. This is a decrease from an average of 10.47 percent in FY 2014. Fifteen hospitals reported providing benefits in excess of 10 percent of their operating expenses, compared with 22 hospitals in FY 2014. In addition, 21 hospitals reported providing benefits between 7.5 percent and 10 percent of their operating expenses, compared with 17 hospitals in FY 2014.

## FY 2015 Narrative Reporting Highlights

Maryland's 53 hospital community benefit narrative reports were reviewed by a consultant on behalf of the HSCRC. There are five main sections in the narrative portion of the CBR: the community the hospital serves, the hospital's community benefit administration, external community benefit collaborations, the community's health needs and how they were identified, and the hospital's community benefit initiatives.

For the first section, hospitals are required to provide a detailed description of the community they serve, including a list of Community Benefits Service Area (CBSA) zip codes, and a description of how the CBSA was determined. Thirty-six hospitals provided an adequate description of their CBSA that included a list of CBSA zip codes. Only 20 hospitals reported that their CBSA determinations were driven by need-related factors. Examples of need-related factors included the prevalence of poverty, infants with low birth weight, specific diseases or conditions, predominant areas of residence for charity care patients, and designation as a medically underserved area.

The second section of the narrative report focuses on community benefit administration; hospitals answer a series of yes/no questions and provide related narrative descriptions. As shown in Table 4, all hospitals completed the required checklists, with all but two hospitals indicating that community benefit planning was part of the hospitals' strategic plan.

**Table 4. Community Benefit Administration Summary, FY 2015**

Question	Checklist Response		Provided Adequate Narrative Description
	Response = Yes	Response = No	
Is community benefits planning part of your hospital's strategic plan?	51	2	41
Are hospital stakeholders involved in the hospital's community benefit process/structure to implement and deliver community benefit activities?	53	0	43
Is there an internal audit of the HSCRC Community Benefit Inventory Spreadsheet?	50	3	37
Is there an internal audit of the HSCRC Community Benefit Narrative?	44	9	37
Is there Board approval of the HSCRC Community Benefit Inventory Spreadsheet?	45	8	
Is there Board approval of the HSCRC Community Benefit Narrative Report?	41	12	

FY 2015 was the first year in which the HSCRC required narrative descriptions for the community benefit administration section. Although many hospitals provided an adequate narrative description for the required questions, a substantial number did not.

“Community Benefit External Collaboration” was added as a new narrative report section in FY 2015. The first question asks whether hospitals engage in external collaboration with one of the following entities: other hospital organizations, local health departments, local health improvement coalitions, schools, behavioral health organizations, faith-based community organizations, and social service organizations. Forty-nine hospitals responded that they collaborated with at least one of the listed entities. When asked whether they collaborated with meaningful core partners to conduct the CHNA, 41 hospitals provided complete entries, and eight hospitals responded incompletely, omitting one or more of the required fields. The final question in this section concerns the hospital’s participation and leadership in the Local Health Improvement Coalition (LHIC) for jurisdictions in which the hospital targets community benefit dollars. Of the 49 hospitals that responded, 37 indicated that a hospital representative attended LHIC meetings, and 17 indicated that a hospital representative chaired a relevant LHIC. Of the 14 hospitals in Baltimore City, ten indicated that they had neither led nor participated in an LHIC, and three of these hospitals responded that there were no active LHICs in Baltimore City.

The fourth section of the report focuses on the CHNA and implementation strategy. All 53 hospitals indicated that they had conducted a federally compliant CHNA within the previous three FYs, and 52 of the hospitals indicated that they had adopted a federally compliant implementation strategy. Table 5 displays the number of hospitals that addressed the 18 CHNA and implementation strategy elements that were developed based on federal requirements. The breadth and depth of the CHNAs and implementation strategies varied significantly from hospital to hospital.

**Table 5. CHNA and Implementation Strategy Element Summary, FY 2015**

<b>CHNA and Implementation Strategy Element</b>	<b>Number of Hospitals Addressing</b>
Adequate description of data sources	46
Description of analytical methods	45
Description of information gaps	20
Identification of collaborating organizations	48
Identification of third parties who assisted in conducting the CHNA	22
Qualifications of third parties who assisted in conducting the CHNA	16
A description of how hospital obtained community input from representatives of the broad interests of community	51
If organizational input was taken into account, organizations identified	40
Name and title supplied for organization(s) providing input	32

CHNA and Implementation Strategy Element	Number of Hospitals Addressing
Specific identification of public health experts providing input	15
Identification of public health experts by name, title, and affiliation	13
Description of public health experts' areas of expertise	3
Identification of leaders and representatives of specific populations providing input	7
A prioritized description of all of the community health needs identified through the CHNA	36
Description of process and criteria used to prioritize identified health needs	32
Description of the existing health care facilities and other resources in the community available to meet the CHNA-identified community health needs	27
Implementation strategy describes how the hospital facility plans to meet CHNA-identified community health needs	46
Implementation strategy identifies CHNA-identified needs that it does not intend to address and explains why the hospital does not intend to address them	27

The last section focuses on community benefit initiatives. Hospitals are asked to provide a clear and concise description of the primary needs identified in the CHNA, the principal objective of each evidence-based initiative, how the results of initiatives will be measured, and whether the outcome measures are aligned with measures such as the State Health Improvement Process and all-payer model monitoring measures. Collectively, hospitals reported 310 community benefit programs and initiatives to address a wide variety of community needs. The “primary needs” that these hospitals intended to address included: access to care, behavioral health, substance abuse/addiction, obesity, diabetes, cancer, heart disease/hypertension/stroke, healthy lifestyle, and other chronic diseases. Needs associated with social determinants of health (e.g., housing, economic factors, access to healthy food, employment, advocacy, and education) were the object of several initiatives.

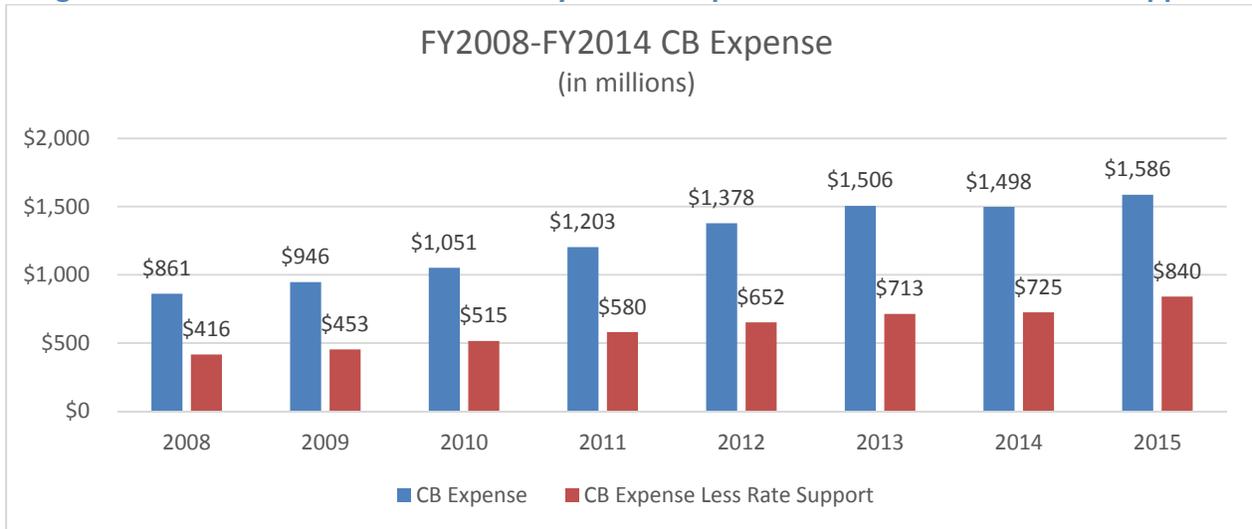

## FY 2004 – FY 2015 TWELVE-YEAR SUMMARY

FY 2015 marks the twelfth year since the inception of the CBR. In FY 2004, community benefit expenses represented \$586.5 million, or 6.9 percent of operating expenses. In FY 2015, these expenses represented \$1.5 billion, or 10 percent of operating expenses. As Maryland hospitals have increasingly focused on implementation of cost- and quality-improvement strategies, an increasing percentage of operating expenses has been directed toward community benefit initiatives.

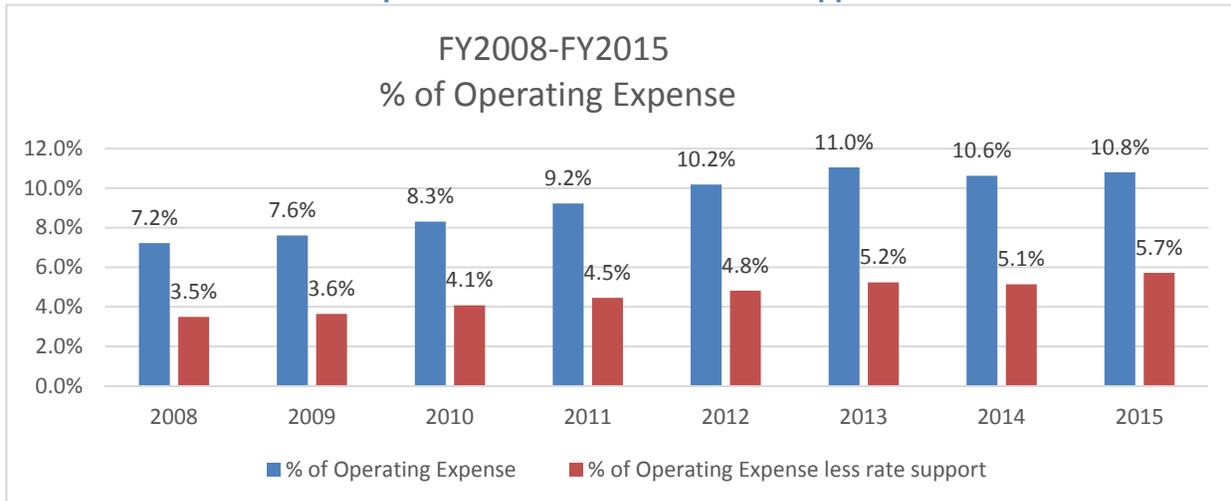

The reporting requirement for revenue offsets and rate support has changed since the inception of the CBR in FY 2004. For consistency purposes, the following figures illustrate community benefit expenses from FY 2008 through FY 2015. Figures 3A and 3B show the trend of

community benefit expenses with and without rate support. On average, approximately 50 percent of expenses have been reimbursed through the rate-setting system.

**Figure 3A. FY 2008 – FY 2015 Community Benefit Expenses with and without Rate Support**

**Figure 3B. FY 2008 – FY 2015 Community Benefit Expenses as a Percentage of Operating Expenses with and without Rate Support**

## CHANGES TO FY 2015 REPORTING REQUIREMENTS

The changes to Maryland’s hospital narrative reporting requirements have resulted in more detailed narrative reports. For FY 2016, Section V. Hospital Community Benefit Program and Initiatives was updated to provide informational links to the CDC’s website. Section VI. Physicians was updated to include a table to assist in the reporting of information related to physician subsidies. The HSCRC will continue to modify the community benefit reporting requirements to enhance consistency and improve evaluations.
