Part II Declaration of Officer

6 I authorize the U.S. Treasury and its designated Financial Agent to initiate an ACH electronic funds withdrawal (direct debit) entry to the financial institution account indicated in the tax preparation software for payment of the organization's federal taxes owed on this return, and the financial institution to debit the entry to this account. To revoke a payment, I must contact the U.S. Treasury Financial Agent at 1-888-353-4537 no later than 2 business days prior to the payment (settlement) date. I also authorize the financial institutions involved in the processing of the electronic payment of taxes to receive confidential information necessary to answer inquiries and resolve issues related to the payment.

If a copy of this return is being filed with a state agency(ies) regulating charities as part of the IRS Fed/State program, I certify that I executed the electronic disclosure consent contained within this return allowing disclosure by the IRS of this Form 990/990-EZ/990-PF (as specifically identified in Part I above) to the selected state agency(ies).

Under penalties of perjury, I declare that I am an officer of the above named organization and that I have examined a copy of the organization's 2009 electronic return and accompanying schedules and statements and to the best of my knowledge and belief, they are true, correct, and complete. I further declare that the amount in Part I above is the amount shown on the copy of the organization's electronic return. I consent to allow my intermediate service provider, transmitter, or electronic return originator (ERO) to send the organization's return to the IRS and to receive from the IRS (a) an acknowledgement of receipt or reason for rejection of the transmission, (b) an indication of any refund offset, (c) the reason for any delay in processing the return or refund, and (d) the date of any refund.

4a (Code:) (Expenses \$ 13,331,709. including grants of \$) (Revenue \$ 214,047,675.)
St. Agnes Hospital provides a substantial portion of its services to
the elderly and poor. During the fiscal year ending June 30, 2010,
approximately 44% of the value of services rendered were to elderly
patients under the Medicare program, and approximately 14% of the value
of services were provided to patients who were deemed indigent under
state, county, or hospital guidelines. In the spirit of principles
adopted by Ascension Health, St. Agnes Hospital has taken proactive
steps to address those issues that will affect accessibility, the
financing, and the delivery of healthcare to all persons, especially
the uninsured, underinsured, and the underserved. During the fiscal
year ending June 30, 2010, the estimated unreimbursed cost of services
provided to the elderly, uninsured, and underinsured totaled

- 4 **Community information.** Describe the community the organization serves, taking into account the geographic area and demographic constituents it serves.
- 5 **Community building activities.** Describe how the organization's community building activities, as reported in Part II, promote the health of the communities the organization serves.
- 6 Provide any other information important to describing how the organization's hospitals or other health care facilities further its exempt purpose by promoting the health of the community (e.g., open medical staff, community board, use of surplus funds, etc.).
- 7 If the organization is part of an affiliated health care system, describe the respective roles of the organization and its affiliates in promoting the health of the communities served.
- 8 If applicable, identify all states with which the organization, or a related organization, files a community benefit report.

Part I, Line 3c: Generally, discounted care to low income individuals

is provided on a sliding scale for those not exceeding 300% of the federal

poverty level. For emergency department patients and other outpatients

(account balances under \$500.00) may be granted charity exclusively based

upon the use of the automated eligibility software only. In those

instances, a signed/completed application will not be required.

Additionally, patients may also be eligible for charity care if they meet

criteria that would determine that they are experiencing a financial

hardship. Financial hardship is defined as medical debt for medically

necessary services incurred by a family with income below 500% of the

federal poverty level that exceeds 25% of the family income over a 12

month period. Medical debt is out of pocket expenses, excluding

copayments, coinsurance and deductibles for medical costs billed by St.

Agnes Healthcare. The patient and any immediate family member of the

patient living in the same household are eligible.

Part I, Line 7: The costing methodology used to complete Line 7a

(Charity Care) and Line 7B (Unreimbursed Medicaid) in the table was the

cost to charge ratio. The cost to charge ratio was calculated in

Part VI Supplemental Information

accordance with worksheet 2 of the Internal Revenue Service instructions

for Schedule H, which suggests using the operating expenses from the

consolidated St. Agnes Healthcare financial statements, excluding bad debt

and certain other adjustments, and applies the result to the gross charges

from the consolidated St. Agnes Healthcare financial statements. The

resulting ratio is used to calculate charity care at cost and unreimbursed

Medicaid.

Part I Line 7 Charity Care at cost - Line 7a Column D

Maryland's regulatory system creates a unique process for hospital payment

that differs from the rest of the nation. The Health Services Cost Review

Commission, (HSCRC) determines payment through a rate-setting process and

all payors, including governmental payors, pay the same amount for the

same services delivered at the same hospital. Maryland's unique all-payor

system includes a method for referencing Uncompensated Care in each

payors' rates, which does not enable Maryland hospitals to breakout any

offsetting revenue related to Uncompensated Care.

benefit expenses are equal to Medicaid revenues in Maryland, as such, the

Part VI Supplemental Information

net effect is zero; Medicaid recognizes full reimbursement. The exception to this is the impact on the hospital of its share of the Medicaid assessment. In recent years, the state of Maryland has closed fiscal gaps in the state Medicaid budget by assessing hospitals through the rate-setting system.

The amounts reported in Part I, Line 7b represent unreimbursed Medicaid costs for unregulated health care activities.

Part I Line 7 Column F

Bad debt expense from Part IX, Statement of Functional Expenses, excluded from the denominator used to calculate total charity care expense was \$14,127,101.

Part III, Line 4:

Part III Section A - Bad Debt Expense Line 2 & 3

The bad debt expense reported at cost was estimated using the bad debt expense from the consolidated St. Agnes Healthcare financial statements, applying the cost to charge ratio developed using worksheet 2 from the Schedule H instructions. The state of Maryland is an "all payor" state regulated by the Health Services Cost Review Commission (HSCRC) where all payors, including governmental payors, pay the same amount for the same services delivered at the same hospital. Therefore, self pay discounts, are largely not applicable for regulated activity and have no impact on bad debt expense. The estimated amount of bad debt expense, at cost, attributable to patients eligible under the organization's charity care policy was estimated by examining all bad debt write-offs at the patient account level during the fiscal year. Those accounts that had an insurance

Part VI Supplemental Information

classifications of charity, charity pending, or Medicaid pending that was subsequently written off to bad debt, are assumed to be patients that would have been eligible for assistance under the charity care policy if sufficient information would have been provided to make that determination. The sum of those accounts, multiplied by the cost to charge ratio, is reported in Section A, Line 3.

Part III Line 4 Section A - Bad Debt Expense

Net patient service revenue is reported at the estimated realizable amounts from patients, third-party payors, and others for services provided and includes estimated retroactive adjustments under reimbursement agreements with third-party payors. Revenue under certain third-party payor agreements is subject to audit, retroactive adjustments, and significant regulatory actions. Provisions for third-party payor settlements and adjustments are estimated in the period the related services are provided and adjusted in future periods as additional information becomes available and as final settlements are determined. Laws and regulations governing the Medicare and Medicaid programs are complex and subject to interpretation. As a result, there is at least a possibility that recorded estimates will change by a material amount in the near term. During 2010 and 2009, approximately 44% and 45%, respectively, of net patient service revenue was received under the Medicare program and 14% and 13%, respectively, under various state Medicaid programs. The Health Ministry grants credit without collateral to its patients, most of whom are local residents and are insured under third-party payor arrangements. Significant concentrations of accounts receivable at June 30, 2010 and 2009 include Medicare (31% and 29%, respectively) and various states' Medicaid (20% and 23%, respectively)

Part VI Supplemental Information

programs. The provision for bad debts is based upon management's assessment of expected net collections considering economic conditions, historical experience, trends in health care coverage, and other collection indicators. Periodically throughout the year, management assesses the adequacy of the allowance for uncollectible accounts based upon historical write-off experience by payor category, including those amounts not covered by insurance. The results of this review are then used to make any modifications to the provision for bad debts to establish an appropriate allowance for uncollectible accounts. After satisfaction of amounts due from insurance and reasonable efforts to collect from the patient have been exhausted, the Health Ministry follows established guidelines for placing certain past due patient balances with collection agencies, subject to the terms of certain restrictions on collection efforts as determined by Ascension Health. Accounts receivable are written off after collection efforts have been followed in accordance with the Health Ministry's policies.

Part III, Line 8: Included in line 5 and 6 of section B are Medicare allowable costs and reimbursement reported on the Hospital's Medicare Cost Report. This includes reimbursable acute hospital services. In addition, the Hospital has also included Medicare net revenues and expenses for non-hospital services necessary to support hospital operations. This includes professional radiology, anesthesia and other physician specialty services. The Medicare surplus of \$21,367,810 for hospital services was calculated by subtracting the Medicare costs (gross Medicare revenue multiplied by the cost to charge ratios reported on the Medicare cost report) from the Medicare payments. Non-hospital services shortfall of \$9,925,980 was calculated by multiplying each non-hospital services'

Part VI Supplemental Information

Medicare patient share by the non-hospital services' annual operating loss. Maryland's regulatory system creates a unique process for hospital payment that differs from the rest of the nation. The Health Services Cost Review Commission, (HSCRC) determines payment through a rate setting process and all payors, including governmental payors, pay the same amount for the same services delivered at the same hospital. This unique payment system is designed for all payors to share the cost of healthcare equally meaning the cost shifting to private payors that is commonly seen in other states, is not experienced in Maryland. This model results in a surplus of payment over expense.

Part III, Line 9b: It is St. Agnes Healthcare's policy to place accounts that have been written off to bad debt with a collection agency for additional collection effort. Patients may apply for financial assistance at any time during the revenue cycle. Patients who work to apply for charity care whose account resides at the agency will be referred to the hospital by the agency. The agency will delete the account and the hospital will work with the patient to complete the charity care application process. Emergency department patients and other outpatients (account balances under \$500.00) may be granted charity exclusively based upon the use of an automated eligibility software. A signed/ completed application will not be required in those instances.

Part VI, Line 8 Supplement Information

St. Agnes Healthcare files a community benefits report with the Health Services Cost Review Commission (HSCRC), the regulatory agency in the state of Maryland. The report is then made public by the HSCRC. Additionally, community

Part VI Supplemental Information

benefit information is available in the St. Agnes Healthcare

Annual Report and the St. Agnes Healthcare Fact Sheet.

Both documents are available on the hospital website.

Part VI, Line 2: St. Agnes Healthcare prepares a community needs

assessment every three years, which was last updated in

April 2007. The health status of a community

can be measured by a variety of methods. This can

include birth and death rates, life expectancy, morbidity,

health insurance coverage, health resources availability,

and population data. To the extent possible, St. Agnes

Healthcare seeks to consider many of these areas. St. Agnes

Healthcare's community needs assessment focuses on health status

indicators that have been grouped into four key areas:

demographics, socioeconomic status, health status, and health

resource utilization/physician manpower needs. To support the

analysis, readily available data was gathered from the

U.S. Census and Maryland discharge databases for inpatient

and emergency services, and population forecasts.

The first health status indicator grouping involves demographics.

The analysis of demographic data includes a review of population

density, population age less than or equal to five years

old, population age greater than or equal to sixty-five

years old, female population ages fifteen to forty-four,

female population growth ages fifteen to forty-four,

population growth age greater than or equal to seventy-five years old, and

minority population.

The second health status indicator grouping involves

Part VI Supplemental Information

socioeconomic status. The analysis of socioeconomic data includes

a review of the percent of households in poverty, children

living in poverty, average household income, population

of uninsured, population age eighteen to twenty-four

with a high school diploma, total population without

a high school diploma, population with disabilities,

unemployed civilian labor force, level of rental housing,

and level of vacant housing.

The third data grouping involves a review of the health

status. The health status analysis reviews ambulatory

sensitive hospitalizations, such as asthma, congestive

heart failure, chronic obstructive pulmonary disease,

diabetes, hypertension, and pneumonia. The health

status analysis also examines maternal and infant health,

including the level of births to teen moms, the level of

low birth weight infants, the level of birth defects, the

level of infant mortality, and the level of births with

insufficient prenatal care. Additionally, major disease

prevalence is also examined. This includes examining

the cancer, cardiovascular, and stroke discharges per

one thousand population. Major disease prevalence also

includes examining lifestyle behaviors and indicators, such as obesity,

mental health, substance abuse, tobacco use and HIV.

The final data grouping examines health resource utilization

and the physician manpower need. This analysis reviews acute care

discharges, acute care inpatient days, and outpatient emergency visits per

one thousand population. Furthermore, primary care and specialty physician

needs are evaluated.

Part VI Supplemental Information

The assessment provides a comparative analysis of the communities that comprise St. Agnes Healthcare's service area. The primary methodology utilized is a ranking of the community scores for each indicator against the Central Maryland average. An index is created where 1.0 is the average of Central Maryland. In the analysis, any score above 1.0 is worse than average and anything below 1.0 is better than average. Composite scores are developed for each of the four major assessment areas and these are then summarized to generate a composite overall need index. This methodology is modeled after the approach formerly utilized by the Maryland Department of Health and Mental Hygiene for the statewide Primary Care Access Plan.

Part VI, Line 3: St. Agnes Healthcare displays signage, in both English and Spanish in all registration areas that inform patients of the availability of financial assistance programs and contact information. The signage is accompanied by brochures that explain the various financial assistance programs that are available. The Maryland State Financial Assistance application is also available. Registration areas are routinely checked to insure these materials are prominently displayed. St. Agnes Healthcare has employees who are responsible for screening admissions to identify patients who may be eligible for charity, medicaid, or other state programs. Once these patients are identified St. Agnes Healthcare employees assist them with completing the eligibility process.

All inpatients are provided the Patient Billing and Financial

Part VI Supplemental Information

Assistance Information Sheet at the time of admission.

It is also mailed to the patient with the summary bill that is sent after discharge. The information sheet is provided in both English and Spanish and provides the patient with information regarding St. Agnes Healthcare's financial assistance policy, how to apply for financial assistance and medical assistance and the patient's rights and obligations.

A public notice is also published annually in the Baltimore Sun newspaper notifying the public of the availability of uncompensated care at St. Agnes Healthcare.

Part VI, Line 4: The areas surrounding St. Agnes Healthcare have a diverse socioeconomic composition with a mix of urban and suburban communities that are consistent with the range of communities found in any large metropolitan region. For St. Agnes Healthcare, the challenge of serving these communities lies in meeting the different needs associated between some of the poorest and most affluent neighborhoods in Central Maryland all located within a three mile radius of the hospital campus. A further challenge is the rapidly changing composition of the neighborhoods located most immediate to St. Agnes Healthcare, which over the last five years, have experienced increasing urban blight.

St. Agnes Healthcare's service area spans five Maryland counties including Baltimore County, Baltimore City, Anne Arundel County, Howard County, and Carroll County. Within those counties, eleven communities are served representing 22 postal zip codes. Those communities include Arbutus, Brooklyn/

Part VI Supplemental Information

Linthicum, Catonsville, Ellicott City, Glen Burnie, South

Carroll, Pasadena, South Baltimore City, Southwest

Baltimore City, West Baltimore City, and Woodlawn. This

study area represents approximately 81% of the discharges

for St. Agnes Healthcare, with Arbutus and Catonsville relying

most heavily on St. Agnes Healthcare for their inpatient health

care needs. The demographics of St. Agnes Healthcare's service area

average out to be the same as Central Maryland overall.

However, independently each indicator varies substantially

from Central Maryland. The service area shows a significantly

higher than average population density of 2,345 per

square mile, compared to 1,155 for Central Maryland.

Children under age five and adults sixty-five and older

totaled 49,793 and 89,932 respectively, compared to Central

Maryland averages of 165,227 and 314,862 respectively.

Females ages fifteen to forty-four totaled 157,576 for the

service area while the Central Maryland average was 554,037.

The service area is significantly more racially and ethnically

diverse than the Central Maryland averages. Specifically,

communities that comprise the southwest corner of Baltimore

City and Baltimore County contain populations where 90%

of the populations consist of nonwhite racial or ethnic

groups.

Typical to the urban environment, each community located in

Baltimore City is projected to experience a population

decline, while suburban areas like Ellicott City, South

Carroll, and Pasadena are projected to have population

growth. The overall population growth is expected to exceed

Part VI Supplemental Information

the Central Maryland average, but the growth rates of persons over the age of seventy-five is expected to lag behind. The demographic analysis shows that West Baltimore City continues to exhibit demographic characteristics with higher need, while Arbutus and Catonsville exhibit comparatively lower need characteristics.

Lower socioeconomic status is highly correlated with poor health outcomes, decreased access to health services, and unhealthy lifestyles. Overall, the St. Agnes Healthcare service area is marked by a less favorable socioeconomic status than that of Central Maryland as a whole. The indices are divided as urban communities are less favorable and suburban communities are more favorable than the Central Maryland average. The percentage of households with low income was 40% for the service area, compared to 30% for the Central Maryland average. The average household income in the service area was lowest in West Baltimore City at \$39,014 and highest in Ellicott City at \$101,620.

The overall average for the service area was \$68,017 compared to the Central Maryland average which was \$83,587.

The rate of uninsured patients was closely tied to average household income with West Baltimore City showing the highest uninsured rate, 39%, and Ellicott City showing the lowest uninsured rate, 6%. Overall, the service area had a 20% uninsured rate while the Central Maryland average had a 16% rate.

Income and education attainment can be causal factors for many health disparities in the community. Higher education provides greater potential for higher income, which enables

Part VI Supplemental Information

increased access to medical care, better housing, access to safer neighborhoods, and increased likelihood of developing healthier lifestyle behaviors. The needs assessment data showed that St. Agnes Healthcare's service area underperformed the Central Maryland average in other socioeconomic measures. This includes the percentage of individuals age twenty-five and older with less than a high school diploma, the unemployment rate, the percentage of rented housing, and the percentage of vacant housing.

St. Agnes Healthcare also performs a community health status assessment. This assessment captures data for white and nonwhite populations separately, which highlights the racial disparities present within each community and the influence on health status and hospitalization rates. St. Agnes Healthcare evaluates Ambulatory Sensitive Hospitalizations, which are acute care hospital admissions that potentially could have been prevented through better overall patient management, primarily through primary care systems. St. Agnes Healthcare collected data on six different chronic illnesses, which include asthma, congestive heart failure, chronic obstructive pulmonary disease, diabetes, hypertension, and pneumonia.

For each chronic illness examined, St. Agnes Healthcare's service area had higher rates of illness, for both white and nonwhite populations, when compared to the Central Maryland average. In comparing the racial disparities, the rate of hospitalization in the St. Agnes Healthcare service area proves to be influenced by socioeconomic factors more so than race. In less affluent communities, the nonwhite population had a higher

Part VI Supplemental Information

rate of hospitalization than the white population of the same community. However, the inverse is true in the affluent communities where the nonwhite population has a lower admission rate than their white counterparts.

St. Agnes Healthcare compiles and analyzes maternal and infant health data. One of the most potentially vulnerable populations in the service area is poverty-stricken women and their children, especially those living in poverty. The socioeconomic analysis revealed that an estimated 40% of children in the service area are living in poverty, with the urban areas experiencing rates of greater than 50%. The quality of life and health status of women has far reaching implications. Teen pregnancy, access to adequate prenatal care, low birth weight and birth defects generate increased demands for future health care needs and impact not just this generation, but subsequent generations as the cycle of poverty is continued. The health status assessment examined the percentage of births to teen moms, percentage of newborns with low birth weights, the percentage of birth defects, infant mortality, and the percentage of mothers with insufficient prenatal care.

In nearly every category, the service area had more incidences than the Central Maryland average. The percentage of infants with low birth weight, for white populations, and the infant mortality rates, with nonwhite populations, were the only two areas that had slightly less incidences than the Central Maryland average. Unlike ambulatory hospitalization, the nonwhite populations have substantially higher rates of births to teen mothers, infants with low birth weight, infants with birth defects, as well as births with insufficient prenatal care in all

Part VI Supplemental Information

communities within the service area.

St. Agnes Healthcare also analyzes major disease prevalence.

Traditionally, mortality data is utilized to evaluate the impact of

leading causes of disease and illness in the community. However,

vital statistic data is not readily available at the

zip code level. Therefore, as a proxy, the assessment

utilized acute care discharge data from the leading causes

of mortality, including cancer, cardiovascular, and stroke. The

analysis revealed once again that the service area experienced

higher disease prevalence of cancer, cardiovascular, and stroke

than the Central Maryland average, with stroke being the

least favorable. Furthermore, nonwhite populations showed a

greater need in each of the three major disease categories

than white populations. Also, continuing the trend, the

urban areas of West Baltimore, South Baltimore, Southwest

Baltimore, and Brooklyn have the least favorable indices

for these major diseases.

Finally, the needs assessment also examines lifestyle

behavior as a component of the overall health status,

which includes indicators related to obesity, mental health, HIV,

substance abuse, and tobacco use.

Part VI, Line 5: The information provided as Community Support, in

Part II, Community Building Activities, represents funds spent for

disaster readiness and public health emergency activities. These costs,

which are partially funded by the Department of Health and Mental Hygiene,

support activities such as education and preparedness training,

decontamination equipment and supplies needed for victim's ease, comfort

and tracking during decontamination.

Part VI, Line 6: St. Agnes Healthcare furthers its exempt purpose by

promoting the health of the community in various ways. A majority of the

organization's governing body resides in St. Agnes Healthcare's service

area and is neither composed of employees nor contractors of the

organization. The governing body had nineteen voting members, eighteen of

which were independent community members. Additionally, St. Agnes

Healthcare has an open medical staff and credentials all qualified medical

staff, including community based providers. St. Agnes Healthcare applies

surplus funds to improve patient care in various ways. For instance,

surplus funds are used to reinvest in the latest equipment and

technologies to improve patient safety, comfort, and outcomes. Surplus

funds are also used to renovate existing facilities and construct new

facilities in order to improve the healthcare environment. As a member of

a national health system, Ascension Health, surplus funds generated by St.

Agnes Healthcare may also be directed to Ascension Health to apply towards

strategic initiatives or to be re-distributed to other member healthcare

providers within Ascension Health. This allows St. Agnes to not only

service the surrounding community, but also help fund the care for the

underprivileged throughout many parts of the United States.

Part VI, Line 7: St. Agnes Healthcare is a member of Ascension Health,

a national health care system. Ascension Health is the

sole corporate member of St. Agnes Healthcare.

St. Agnes Healthcare is the sole corporate member of Seton

Medical Group Inc., which provides Primary Care, Gynecology

and Obstetrics care for patients in St. Agnes Healthcare's

service area. St. Agnes Healthcare is also the sole corporate

member of St. Agnes Foundation, the philanthropic arm of St. Agnes

those who are poor and vulnerable. As a Catholic Healthcare Ministry

and a member of Ascension Health, we are dedicated to the art of

healing to sustain and improve the lives of the individuals, families

and communities we serve. We advocate for a just society.

Through our words and deeds, we minister in an atmosphere of deep

respect, love and compassion.

Patients are our passion. Our physicians, nurses and associates are our

pride. Healing is our joy. We are widely known for the way our

physicians, nurses and associates combine sophisticated medical

technology with spirituality and compassion. Shoulder-to-shoulder, we

stand united in our commitment to care for those in need. We will be a

waiting room of the community care clinic promoting early development

of reading skills; activities related to the successful discharge of

patients such as providing transportation, prescriptions, oxygen,

durable medical equipment, and short-term stays

in nursing or rehabilitation centers; and providing gynecological

services to uninsured, largely Spanish speaking persons at the

Esperanza clinic.

St. Agnes Healthcare has a long standing tradition of providing medical

education and training. St. Agnes administers a five year, fully

accredited, general surgery residency program consisting of twenty

surgical residents. This academically oriented, community based,

university affiliated residency program is the second oldest surgical

residency program in the United States. The program is active in both

basic and advanced laparoscopic surgery. Residents are offered a broad

based surgical experience with exposure not only to the field of

greater general surgery, but also to all the surgical specialties.

There is extensive experience and training in managing the critically

ill surgical patient. Additionally, the program also contains rotations

in burn management, trauma, transplant and gastrointestinal endoscopy.

The Department of Surgery includes more than 160 surgeons in 10

surgical specialties. There are five full-time surgeons in the

department complimented by attending surgeons who are dedicated to the

residency-training program and are actively involved in the teaching

program. Medical students have also been a part of St. Agnes' training

program for more than six decades. The opportunity for the residents to
teach the students contributes significantly to the professional
development of the resident and provides a vital service to the
student.

St. Agnes also has a medical residency program consisting of forty
residents. The dynamic interaction between the faculty and the house
staff creates a stimulating intellectual environment centered on the
key principles of patient care, education and clinical research.
Similar to the surgical residents, the medical residents are involved
in the teaching of medical students. Due to St. Agnes' affiliation with
the University of Maryland Medical School and Johns Hopkins School of
Medicine, the residents are presented an opportunity to rotate through
those hospitals, further enriching the patient care experience. The
residency program allows the residents to become proficient in
obtaining clinical data by patient interview, physical examination, and
interpretation of laboratory data. The residents also become proficient
in utilizing clinical data to prioritize problems and formulate
differential diagnoses. The training program helps the residents learn
to formulate diagnostic and therapeutic plans demonstrating awareness
of risks, benefits, costs, patient preferences, and ethical and
psychosocial issues.

Form 990, Part VI, Section A, line 7a: St. Agnes Healthcare has a sole
corporate member, Ascension Health, who has the ability to elect members to
the governing body of St. Agnes Healthcare.

Form 990, Part VI, Section A, line 7b: Ascension Health has designed a
system authority matrix which assigns authority for key decisions that are
necessary in the operation of the system. Specific areas that are
identified in the authority matrix are: New organizations and major
transactions; Governing documents; Appointments/Removals; Evaluation; Debt
limits; Strategic and Financial plans; System policies and procedures.
These areas are subject to certain levels of approval by Ascension Health
per the system authority matrix.

Form 990, Part VI, Section B, line 11: Management, including certain
officers, works diligently to complete the Form 990 and attached schedules
in a thorough manner. Management presents the form to the finance committee
and certain members of the audit committee and addresses any questions that
arise. Once the finance committee and audit committee review is completed,
the Form 990 is then made available to the full board of directors via a

officer level staff is performed by an outside compensation consulting

firm, which specializes in executive compensation. On an annual basis the

compensation committee of the board of directors, sends an engagement

letter outlining the positions requiring compensation analysis, and seeks

analysis and recommendations. The consulting firm then performs a market

analysis of compensation and benefits for the executives with recommended

salary ranges by executive position, and those are reviewed and approved by

the compensation committee. The CFO and CEO of the hospital are

specifically included in the group of persons whose compensation is

reviewed by an outside consulting firm.

Board members, Bonnie Phipps, Scott Furniss, Yolanda Copeland

and key employee, Adrian Long, work at St. Agnes Healthcare as well as

related organizations, Seton Medical Group and St. Agnes Foundation.

For disclosure purposes the average hours worked at related

organizations is estimated by using the number of hours served on board

committees for the related organizations. Bonnie Phipps works 3.77

hours per week, on average, serving on committees at Seton Medical

Group and St. Agnes Foundation. Scott Furniss works 2.30 hours per

week, on average, serving on committees at Seton Medical Group and St.

Agnes Foundation. Yolanda Copeland works .92 hours per week, on

average, serving on committees at St. Agnes Foundation. Adrian Long

works 1.38 hours per week, on average, serving on committees at Seton

Medical Group.

(Continuation)

This data is accumulated by examining ICD-9 diagnosis coding. Similar

to the other health and wellness measures, the service area was less

favorable than the Central Maryland average for every lifestyle

behavior indicator. Also, consistent with the previous measures, the

urban areas experienced the least favorable results. The least

favorable overall was South Baltimore City, which was found to have the

highest utilization rates for mental health, HIV, and emergency room

substance abuse visits. Racial disparities are evident in urban areas,

where the rate of admission for the nonwhite population is
significantly higher than that of the white population, especially in
the cases of obesity, HIV and tobacco use. The most favorable composite
index scores were in suburban areas like Ellicott City and South
Carroll, which were nearly 100% below their urban community
counterparts. The final component of the community needs assessment
examined health resource utilization and physician manpower need. This
analysis utilizes acute care admission rates, acute care days, and
outpatient emergency room visit rates. The logic underlying our
analysis of these indicators is that communities with high utilization
rates have a greater need for health care resources. All three measures
showed less favorable results than the Central Maryland average. The
index scores were 1.12, 1.22, and 1.22 for admissions, days, and
emergency room visits, respectively. The physician manpower need index
score was .89. The Central Maryland average is indexed at 1.0, with
scores greater than 1.0 indicating less favorable results and scores
less than 1.0 indicating favorable results. The overall average index
score for health resource utilization and physician manpower need was
.89.

In summary, all of the components of the needs assessment were
summarized and indexed resulting in an overall index score of 1.09.
Overall, the St. Agnes Healthcare service area has higher demonstrated
need across all measures when compared to the Central Maryland region.
The overall need is highly correlated to socioeconomic status, with
racial diversity alone having less of an influence on health care
status.
